Your password and PIN are like your toothbrush! Do not share them!

If you think someone else has used them, change them immediately!

ASK YOURSELF BEFORE SHARING

- Are you asked to share your OTP or password?
- Are you asked for your PIN or login details?
- Are you being pressured to reveal your credentials urgently?
- Are you told it's "safe" because the requester is official?
- Are you asked to confirm transactions with your OTP?

If the answer is 'YES", it may be a scam

KEEP YOUR INFORMATION PRIVATE

- Never share your passwords, PINs or OTPs - No bank or trusted authority will ever ask for them
- Secure your devices - Use strong passwords and lock your apps
- Verify before acting - Contact your bank or trusted institution directly if in doubt
- Stay alert - Phishing attempts often create urgency; take your time and think
