Overview

Merchandise exports recovered in December 2020 from the impact of the second wave of the COVID-19 pandemic in the country, while merchandise imports continued to decline on a year-on-year basis supported by the continuation of restrictions on non-essential imports and comparatively low global oil prices. Overall, the trade deficit contracted significantly by US dollars 2.0 billion in 2020 compared to 2019. Recording the historically highest monthly inflow, workers’ remittances continued to support the external sector resilience in December 2020 as well. In the financial account, both foreign investment in the government securities market and the Colombo Stock Exchange (CSE) recorded marginal net outflows in December 2020. At the end of the year, gross official reserves stood at US dollars 5.7 billion. During 2020, the Sri Lankan rupee depreciated by 2.6 per cent in 2020. The exchange rate experienced some volatility in December 2020 as well as during the period thus far in 2021.

(e) Data available for the first nine months of each period and includes foreign loans to Direct Investment Enterprises as recorded by the BOI and net direct investment to the CSE.

Trade Balance and Terms of Trade

The deficit in the trade account narrowed in December 2020 by US dollars 222 million to US dollars 562 million, from US dollars 784 million recorded in December 2019, due to a larger decline in imports compared to the decline in exports.

Further, the overall deficit in the trade account in 2020 narrowed to US dollars 5,978 million from the deficit of US dollars 7,997 million recorded in 2019. The major contributory factors for this outcome are depicted in Figure 1.

Terms of trade, i.e., the ratio of the price of exports to the price of imports, improved by 3.2 per cent in December 2020, compared to December 2019, with higher export prices and lower import prices.

Figure 2: Monthly Trade Deficit (2019 – 2020)

Figure 3: Terms of Trade – 2020

Sources: SLC, CBSL

Source: CBSL
Overall exports: Earnings from merchandise exports recovered to a great extent in December 2020 from the setback suffered in the previous two months due to the second wave of the pandemic. Earnings from exports in December 2020 were recorded at US dollars 964 million with a marginal decline of 3.5 per cent from the US dollars 1,000 million recorded in December 2019. Gradual easing of lockdowns in Sri Lanka and improved demand from export destinations contributed to this outcome. Earnings from exports in the year 2020 amounted to US dollars 10,077 million, recording a decline of 15.6 per cent from the previous year. This decline was a result of disruption to production caused by lockdowns during the first and the second waves of the COVID-19 spread in Sri Lanka, as well as lower global demand and disruptions to global supply chains.

Industrial exports: Earnings from the export of industrial goods declined by 5.4 per cent in December 2020 compared to December 2019, mainly due to the decline in the export of textiles and garments by 6.5 per cent and the decline in the export of petroleum products by 43.6 per cent. The export of garments to the EU increased slightly, while exports to the USA and other destinations declined significantly. Earnings from the export of petroleum products that comprises bunkering and aviation fuel and other petroleum products declined due to the decline in quantities supplied as well as prices. Further, earnings from the export of rubber tyres, gems and jewellery, animal fodder, most of the items under leather, travel goods and footwear and most of the items under base metals and articles (except copper and articles thereof) declined. On the other hand, the export of surgical and other gloves increased significantly. Sizable increases were also recorded in the export of food, beverages and tobacco (mainly coconut milk and cream and manufactured tobacco, among others); machinery and mechanical appliances (mainly electronic equipment and industrial machinery); chemical products (mainly activated carbon); ceramic products (mainly tableware, kitchenware, wall-tiles and ornaments); and certain wood and paper products.

Agricultural exports: Export earnings from agricultural goods increased by 4.1 per cent in December 2020 compared to December 2019, due to the increase in the export of spices (pepper, cinnamon, nutmeg, mace, cloves, etc.), tea, coconut kernel and non-kernel products and natural rubber. The increase in earnings from tea exports was mainly due to the increase in the unit price as the increase in volume exported was marginal. Agricultural products that recorded a decline in export earnings in December 2020 compared to December 2019 were seafood, minor agricultural products (fruits, arecanuts, betel leaves, etc.), unmanufactured tobacco and vegetables.
**Mineral exports:** Mineral exports increased in December 2020 compared to December 2019, due to the increase in earths and stone and ores slag and ash (mainly titanium and zirconium ores).

**Export indices:** The export volume index declined by 6.0 per cent while the unit value index increased by 2.7 per cent on a year-on-year basis in December 2020. This indicates that the decline in export earnings was due to lower export volumes.

Performance of Merchandise Imports

Overall imports: Merchandise imports declined in December 2020 compared to 2019, continuing the year-on-year declining trend observed since March 2020, mainly due to relatively low crude oil prices and restrictions imposed by the Government on the importation of non-essential goods. Expenditure on merchandise imports declined by 14.4 per cent to US dollars 1,527 million in December 2020 compared to December 2019. Declines recorded in all three major categories of imports, namely, consumer, intermediate, and investment goods, contributed to this outcome. Total expenditure on imports amounted to US dollars 16,055 million in 2020, recording a 19.5 per cent reduction from 2019.

Consumer goods: Expenditure on the importation of consumer goods in December 2020 declined by 16.2 per cent compared to December 2019, mainly as a result of the decline in imports of vehicles for personal use. Expenditure on non-food consumer goods, that includes vehicles for personal use, declined by 30.1 per cent. A general decline of import expenditure was recorded in many subcategories under non-food consumer goods in December 2020, such as clothing and accessories, cosmetics and toiletries, printed materials and stationery, etc. On the other hand, mobile phones recorded a sizable increase along with many types of household appliances. Consumer goods that are food and beverages recorded an increase of 6.8 per cent, mainly due to the increase in import of coconut oil, sugar, milk powder and dried sprats. Import expenditure on most of the items classified under other food types, such as vegetables, fruits, fresh fish, spices, and beverages were lower than December 2019.

Intermediate goods: Expenditure on the importation of intermediate goods declined by 9.6 per cent in December 2020 compared to December 2019, driven by a 29.5 per cent decline in expenditure on fuel imports. The average import price of crude oil in December 2020 was US dollars 51.89 per barrel, in comparison to US dollars 71.78 per barrel in December 2019. Other intermediate good categories that showed a marked decline include textiles and textile articles, diamonds and precious metals, base metals (such as iron and steel and aluminium articles), palm oil, etc. Intermediate good imports that recorded notable increases included fertiliser and wheat (due to higher volumes), synthetic rubber, certain chemical products and animal fodder.

Investment goods: Imports of investment goods declined by 23.6 per cent in December 2020 compared to December 2019, with declines in all three subcategories, namely, machinery and equipment, building material and transport equipment. Declines in import expenditure were
particularly apparent in articles of iron and steel, ceramic products, cement, some engineering equipment (such as cranes, lifts and skip hoists, automatic regulating instruments), medical and laboratory equipment and commercial purpose vehicles. However, notable increases in import expenditure were observed in relation to computers, agricultural machinery, tractors, etc.

**Import indices:** The import volume index and the unit value index declined by 14.0 per cent and 0.5 per cent, respectively, on a year-on-year basis in December 2020. This indicates that the decline in import expenditure was caused by the combined impact of lower import volumes and prices.

Other Major Inflows to the Current Account

With the launch of the pilot project to resume tourism, a few tourist arrivals were recorded in December 2020. Accordingly, 393 tourists from Ukraine visited Sri Lanka in December 2020. Consequently, total tourist arrivals were recorded at 507,704 in 2020, compared to 1,913,702 arrivals in 2019. Accordingly, cumulative earnings from tourism, which are estimated based on tourist arrivals, amounted to US dollars 957 million in 2020.

Workers’ remittances increased to a record high in December 2020. Remittances grew by 22.2 per cent in December 2020, year-on-year, to US dollars 813 million. The improvement observed from June 2020 helped workers’ remittances to record a year-on-year growth of 5.8 per cent in 2020, to reach US dollars 7,104 million during the year.

Financial Flows

Foreign investment in the government securities market recorded a marginal net outflow during the month. A net outflow of foreign investment amounting to US dollars 10 million was recorded in the rupee denominated government securities market in December 2020, increasing the cumulative net outflow to US dollars 553 million during 2020. The total outstanding exposure of foreign investment in the rupee denominated government securities market remained low at US dollars 37 million by end December 2020.
There were net outflows of US dollars 16 million from the secondary market of the CSE in December 2020. On a cumulative basis, the CSE recorded a net outflow of US dollars 225 million, from both primary and secondary markets, during 2020.

**International Reserves**

Gross official reserves at end December 2020 amounted to US dollars 5.7 billion. This level was equivalent to 4.2 months of imports. Total foreign assets, which consist of gross official reserves and foreign assets of the banking sector, amounted to US dollars 8.5 billion at end December 2020, providing an import cover of 6.4 months.

**Figure 10: Gross Official Reserves and Reserve Adequacy**

![Graph showing Gross Official Reserves and Reserve Adequacy from January 2018 to December 2020. The graph displays the trend in gross official reserves (left axis) and reserve adequacy (months of imports, right axis). The highest gross official reserves recorded were in February 2018 at around 9.5 US dollars billion, while the lowest were in August 2019 at around 6.5 US dollars billion. Reserve adequacy peaked at 7.6 months in December 2019.](source: CBSL)
Exchange Rate Movements

A notable depreciation pressure on the Sri Lankan rupee was observed during December 2020. Even amidst such intermittent volatile periods, particularly driven by speculative market behaviour, the overall depreciation of the rupee was limited to 2.6 per cent against the US dollar in 2020. The Central Bank was able to absorb US dollars 283 million, on a net basis, from the domestic foreign exchange market in 2020. The depreciation pressure re-emerged in January 2021, but with temporary regulatory restrictions being adopted in the domestic foreign exchange market to curtail speculation, the rupee stabilised again in the latter part of January 2021. Meanwhile, reflecting cross-currency movements, the Sri Lankan rupee depreciated against the euro, the pound sterling, the Japanese yen, the Australian dollar and the Indian rupee in 2021 up to 11 February 2021.
