CENTRAL BANK OF SRI LANKA

Issued By Domestic Operations Department

Date 31 July 2024

The Central Bank of Sri Lanka publishes its inaugural Market Operations Report

The Central Bank of Sri Lanka (the Central Bank) released its inaugural Market Operations Report (MOR) with the aim of enhancing awareness and knowledge among the stakeholders on monetary operations carried out by the Central Bank in line with the prevailing monetary policy stance. The MOR would be a catalyst to improve transparency and accountability of the Central Bank under the Flexible Inflation Target (FIT) framework by effectively communicating the monetary policy implementation process.

The MOR is also expected to support aligning actions and expectations of stakeholders of the economy in line with the monetary policy stance of the Central Bank, and facilitate in achieving the intended outcomes in relation to the domestic price stability objective of the Central Bank.

The MOR which will be published bi-annually, presents a synopsis of the key monetary operations of the Central Bank, while articulating the developments in the domestic money market. Special articles on the topical issues and selected indicators of market operations and transactions are also presented in the MOR.

The MOR is available in electronic form in all three languages and can be accessed through the Central Bank website
