CENTRAL BANK OF SRI LANKA

Issued By Macroeprudential Surveillance Department

Date 11.04.2025

Findings of the Systemic Risk Survey (SRS) conducted by the Central Bank of Sri Lanka

The Central Bank of Sri Lanka (CBSL) has released key findings of the SRS conducted for the first half of 2025.

The SRS quantifies and tracks, market participants' views on risks to, and their confidence in, the stability of the Sri Lankan financial system. The sampling frame of the survey includes licensed banks, licensed Finance Companies, a Specialised Leasing Company, insurance companies, unit-trust managing companies, margin providers & underwriters, stock-brokering companies, licensed microfinance companies and rating agencies.

These findings will be useful as a source of reference, especially for those who are engaged in financial sector risk management.

The Findings of the SRS are available in electronic form and can be accessed via the CBSL website at the following link:
