This chart indicates the origin of Money supply in Sri Lanka.

- 2 (a) "Government Finance" shows the claims of the Banking system on the Government net of rupee cash holdings of the Government.
- (b) "Credit to Public" shows the claims of the Banking system on the private sector net of time and savings deposits.

The total money supply line is below the line limiting government finance at the end of 1966, 1967 and at end of January 1968 to Aug. 1972, because net external banking assets were negative in these months.

The image shows a document page, likely a ledger or notebook, with a grid-like structure. The page is heavily degraded with noise and artifacts, making the text illegible. The grid consists of many small, dark, rectangular cells arranged in rows and columns. The overall appearance is that of a low-quality scan of a physical document.
