PRESS RELEASES
April 2010

1. Inflation declined in March 2010

Inflation, as measured by the point-to-point change in the Colombo Consumers' Price Index (CCPI) (2002=100), computed by the Department of Census and Statistics, decreased to 6.3 per cent in March, 2010 from 6.9 per cent in February 2010. The CCPI for March 2010 stood at 214.8, a 1.0 per cent decline compared to 216.9 in February 2010. The annual average inflation, recorded a slight increase to 3.2 per cent in March, 2010 from 3.1 per cent in the previous month.

The decline in the Index during the month was due entirely to low food prices. The sub category of Food and non-alcoholic beverages declined by 2.0 per cent. More specifically, prices of rice, red onion, big onion, potatoes, dhal, sugar, some varieties of vegetables and fish contributed towards the decline in the sub index. However, the full impact of these decreases on the index was partly off-set by marginal price increases in the sub categories of Clothing and footwear (0.44 per cent); Miscellaneous goods and services (0.39 per cent); and Furnishing, household equipment and routine household maintenance (0.04 per cent). Meanwhile, prices in the Housing, water, electricity, gas and other fuels; Health; Transport; Communication; Recreation and culture; and Education sub categories remained unchanged during the month.

2. The Summary of the Annual Report of the Central Bank of Sri Lanka for the Year 2009

Section 35 of the Monetary Law Act requires the Monetary Board of the Central Bank of Sri Lanka (CBSL) to submit a report giving details of the state of the economy, the condition of the Central Bank and the policies and measures adopted by the Monetary Board during the year to the Minister in charge of the subject of Finance within four months of the commencement of the following year.

The 60th annual report of the Monetary Board was submitted to H.E. the President of Sri Lanka and the Minister of Finance and Planning today, the 5th of April 2010. Following are some of the highlights of the report.

The economy of Sri Lanka demonstrated its resilience by growing at 3.5 per cent in 2009 amidst

challenging domestic and external conditions. This remarkable performance was largely due to the steady recovery in the economy since the second quarter of the year, resulting in a notable growth of 6.2 per cent in the final quarter. On the external front, Sri Lanka continued to be impacted by the spill-over effects of the global financial and economic crises, while domestically, the

conflict, which had ravaged the country for almost three decades reached a critical juncture during the early part of the year. The sudden withdrawal of short term capital by foreign investors resulting from adverse global conditions placed an enormous strain on the country's foreign reserves and the management of liquidity. The slump in global demand and the consequent contraction in external trade as well as the slowdown in domestic economic activity had a negative impact on government revenue. In addition, higher government expenditure on defence, interest payments, salaries and wages as well as the continued expenditure on urgent resettlement, rehabilitation and reconstruction (RRR) activities exerted a heavy burden on government finances.

Despite these unprecedented challenges, the country made an extraordinary recovery in the second half of the year. The end to the prolonged conflict and the coordinated and timely policy actions of CBSL and the government, including the securing of the Stand-by Arrangement (SBA) from the International Monetary Fund (IMF) and measures taken to preserve financial system stability, were instrumental in turning around the domestic economy. Enhanced investor confidence in the economy saw a sharp reversal in foreign financial flows helping the country to record an unprecedented surplus in the balance of payments (BOP) of US dollars 2.7 billion by end 2009 and raising foreign exchange reserves from a low level of US dollars 1.1 billion in March 2009 to a historic high of US dollars 5.1 billion by end 2009.

A notable achievement in 2009 was the sharp deceleration in inflation, a result of the stringent monetary policy measures adopted by CBSL over the last two years and the significant decline in global commodity prices. Inflation, as measured by the year-on-year change in the Colombo Consumers' Price Index (CCPI), which reached 28.2 per cent in June 2008, declined sharply to 4.8 per cent by end 2009, recording an average rate of 3.4 per cent in 2009, the lowest since 1985. This enabled CBSL to relax its monetary policy stance to support the domestic economy, which was affected by the global economic downturn. The Penal rate of interest applicable on reverse repurchase (reverse repo) transactions with CBSL when participating institutions exceeded their monthly quota, which served as an effective ceiling for interbank interest rates was reduced gradually from 19 per cent in January 2009 and was harmonised with the Reverse Repo rate in May 2009. Further, Repo and Reverse Repo rates were brought down in several steps to 7.5 per cent and 9.75 per cent, respectively. In response to the significant reduction in policy interest rates, there was a substantial downward adjustment of market interest rates across the term structure, albeit with a time lag. However, the demand for credit from the private sector

remained subdued largely due to the sluggish recovery in the domestic and the global economies as well as the cautious approach to lending by banks. However, monetary growth, which remained subdued during the first half of the year, began to increase during the second half with the unprecedented expansion in net foreign assets (NFA).

The policy action of CBSL, supported by the government, successfully mitigated the contagion of the global financial crisis and the failure of a few entities connected to certain domestic financial institutions. The strong regulatory and supervisory framework and enhanced risk management systems that have been put in place over time enabled the financial system to withstand the shocks from the external and domestic fronts and maintain confidence in the financial system. However, the spill-over effects of the global economic downturn on the domestic economy posed a challenge for banks and other financial institutions. In this challenging environment, financial institutions remained profitable and reasonably well capitalised, although credit risk increased due to tight market conditions.

The impact of the challenging domestic and global environment resulted in an overall set-back in fiscal operations in 2009. Despite several revenue measures introduced during the year, there was a significant shortfall in revenue due to the slowdown in economic activities and the contraction in imports. In addition, government expenditure increased due to higher security related spending during the decisive phase of the conflict and continued urgent RRR activities in the second half of the year, as well as increased salaries and wages, interest payments and expenditure on continuing public investment projects. Accordingly, the budget deficit widened to 9.8 per cent of GDP in 2009 compared to the revised target of 7.0 per cent leading to an increase in the borrowing requirement. In financing the deficit, greater reliance was placed on domestic sources during the early part of 2009. However, the availability of foreign financing during the latter part of the year enabled the settlement of some high cost domestic debt. The higher financing requirement together with lower growth in nominal GDP led to an increase in the debt to GDP ratio, reversing the declining trend observed in the recent past.

Real Sector Developments

The economy grew by 3.5 per cent, in real terms, in 2009, a commendable achievement in spite of a number of external and domestic shocks. The economy recovered strongly to record a notable 6.2 per cent growth in the fourth quarter from 1.6 per cent in the first quarter. The impact of adverse global developments that affected almost all sectors of the economy at varying

levels, and unfavourable domestic weather conditions that lowered agricultural output were the main causes for the lower growth rates in the first quarter. However, since the second quarter, growth has rebounded driven by the end to the conflict and the gradual recovery of the global economy.

In 2009, all major sectors of the economy contributed positively to economic growth. The Agriculture sector recorded a low growth of 3.2 per cent compared to a high growth of 7.5 per cent in 2008, mainly owing to the contraction in the output of tea and paddy. However, within the Agriculture sector, the fisheries sub-sector performed well recording a 6.9 per cent growth driven by increased coastal fishing with the relaxation of security restrictions. While tea production was adversely affected by the drought in the major tea planting districts in the early part of the year, paddy production in the Yala season was severely affected as a result of the delay in the monsoon. Coconut production in 2009 declined largely owing to the lagged effect of the unfavourable weather conditions that prevailed during the previous year. Sugar production also declined during the year due to the decline in sugar cane supply on account of adverse weather conditions. Nevertheless, the healthy performances of several sub-sectors, such as rubber, other field crops mainly maize and big onions, fisheries and livestock, helped maintain a moderate growth in the Agriculture sector in 2009.

The Industry sector slowed down registering a growth rate of 4.2 per cent compared to a growth of 5.9 per cent in 2008. All sub-sectors of the Industry sector, except for electricity, gas and water, recorded low growth rates compared to the previous year, largely as a result of the fall in demand in both international and domestic markets. The output of textile, wearing apparel and leather products, rubber based products and other export market based products recorded a low growth in 2009. However, major players in the textile, wearing apparel and leather products category continued to maintain their competitiveness by supplying high quality and high valued products. Small and medium scale manufacturers were affected by the low demand in both export and domestic markets and the increase in the cost of production. Lower growth in disposable income and subdued performance in the construction sub-sector contributed towards the low demand for domestic market oriented industries. However, the food, beverages and tobacco products category was able to maintain its growth momentum in 2009 as a result of access to new markets in the Northern and the Eastern provinces and the revival of tourism, including domestic tourism, during the second half of the year.

The Services sector grew by 3.3 per cent in 2009 contributing 55 per cent to the overall economic

growth. The wholesale and retail trade sub-sector, which is the largest contributor to the Services sector, registered a sluggish performance, mainly reflecting the contraction in import and export trade. The transport and communication sub-sector also slowed down considerably due to the low growth in telecommunication services and cargo handling. The hotels and restaurants sub-sector recovered strongly compared to the set-back it faced in 2008, due to the end of conflict and the expansion in both local and foreign tourist activities. Meanwhile, the banking, insurance and real estate sub-sector grew moderately due to the slowdown in domestic economic activity.

In 2009, total investments of the country declined, while the savings and investment gap narrowed. Private investment declined significantly to 17.9 per cent of GDP from 21.1 per cent in the previous year, while public investment increased marginally to 6.6 per cent. As a result, total investment as a percentage of GDP declined to 24.5 in 2009 from 27.6 in 2008. Meanwhile, national savings increased to 23.9 per cent of GDP from 17.8 per cent in the previous year. The decline in investments coupled with the significant increase in national savings narrowed the savings-investment gap to 0.7 per cent of GDP in 2009 from 9.8 per cent in 2008, reflecting the significant contraction in the current account deficit of the BOP.

The slowdown in domestic economic activity resulted in a marginal increase in the unemployment rate (excluding the Northern Province), to 5.8 per cent in 2009 from 5.4 per cent in 2008.

External Sector Developments

The external sector recovered strongly during 2009 amidst a challenging global economic environment. The external sector position deteriorated from the latter part of 2008 until the end of the first quarter of 2009. The sharp outflow of foreign investment, the non-rollover of short-term debt, drying up of new commercial financing and higher petroleum bills were the main reasons for this downturn. Amidst the challenging domestic and external environment, gross official reserves declined to a low level by end March 2009. However, with the end to the conflict and improved investor confidence, the external sector rebounded strongly, recording the highest ever level of reserves by end of the year.

External trade, which contracted in 2009 due to the impact of the global economic crisis, improved towards the latter part of the year. Earnings from exports declined by 12.7 per cent, led by lower demand for industrial exports, while expenditure on imports declined by 27.6 per cent, mainly due to the substantially lower expenditure on petroleum and fertilizer imports.

Accordingly, the trade deficit contracted by 47.8 per cent to US dollars 3,122 million in 2009 compared to the 63.6 per cent expansion in 2008 to US dollars 5,981 million, reflecting a significantly larger reduction in import expenditure in 2009 relative to the decline in export earnings.

The current account of the BOP improved remarkably due to the lower trade deficit and increase in migrant workers' remittances. In spite of the sluggish growth in the first quarter of the year, workers' remittances grew by 14.1 per cent to US dollars 3,330 million in 2009. The current account, which recorded a surplus of US dollars 339 million for the first nine months of the year, turned around to record a deficit of US dollars 214 million due to the increase in the trade deficit during the last quarter of 2009. The current account deficit was US dollars 3,886 million in 2008. As a percentage of GDP, the current account deficit narrowed substantially from 9.5 per cent in 2008 to a marginal level of 0.5 per cent in 2009. The inflows to the capital and financial account increased substantially during the second half of the year.

As a result of these developments, the overall BOP, which was a deficit of US dollars 1,385 million in 2008, recorded an unprecedented surplus of US dollars 2,725 million in 2009. The BOP recorded a deficit of US dollars 688 million by end of the first quarter of 2009. However, it improved to record a surplus from the second quarter of the year in response to measures taken by CBSL, which was further reinforced by improved investor confidence with the ending of prolonged conflict and the approval of the IMF-SBA facility of Special Drawing Rights (SDR) 1.65 billion (US dollars 2.6 billion) as BOP support. The first two tranches of the SBA facility amounting to US dollars 652 million and the SDR allocations by IMF of US dollars 508 million were received during the second half of the year. Accordingly, the total external official reserves, excluding Asian Clearing Union (ACU) receipts, rose to its highest ever level of US dollars 5,097 million by end 2009 compared to US dollars 1,594 million at end 2008, which was sufficient to cover 6 months of imports compared to 1.4 months of imports in 2008.

Fiscal Sector Developments

The fiscal sector came under severe stress in 2009 as in many other countries, resulting in a significant deviation from the original fiscal targets. According to Budget 2009, the overall budget deficit was expected to reduce to 5.9 per cent of GDP after grants. However, with the subsequent developments in the domestic as well as the external fronts, the budgetary estimates were revised, targeting an overall deficit of 7.0 per cent of GDP. During the first half of 2009, there was a severe

strain on fiscal operations mainly due to the lower growth in government revenue as a result of the slowdown in domestic economic activity and the contraction of imports reflecting the adverse impact of the global economic crisis. Meanwhile, the intensified security situation, urgent RRR activities in the Northern and the Eastern provinces and increased interest payments, while continuing expenditure on the public investment programme, raised government expenditure. During the second half of the year, the positive impact of the ending of the conflict in May 2009 and the rebound in domestic economic activity in line with the gradual recovery in the global economy eased fiscal operations to some extent, with the overall budget deficit recording 9.8 per cent of GDP in 2009.

The high deficit was a combined outcome of a shortfall in revenue, overrun in recurrent expenditure and increased expenditure on infrastructure projects. The government revenue was significantly below the targeted level. The total revenue as a percentage of GDP declined to 14.6 per cent in 2009 compared to 14.9 per cent in 2008 and 16.3 per cent in 2006. Meanwhile, total expenditure and net lending increased to 24.9 per cent of GDP, compared to that of 22.6 per cent in 2008 and 24.3 per cent in 2006. Recurrent expenditure increased significantly, as a percentage of GDP to 18.2 per cent from 16.9 per cent in 2008. Public investment increased to an encouraging level of 6.8 per cent of GDP in 2009 compared to 6.0 per cent in the previous year.

In financing the deficit, the government raised more funds from domestic sources during the early part of 2009 and from foreign sources during the latter part of the year. The increased borrowing requirement and the tight liquidity conditions in the international capital markets led the government to depend heavily on domestic borrowings during first half of the year. However, the significant increase in foreign investments in government securities and the receipt of proceeds from the international sovereign bond during the second half of the year enabled the government to retire a large amount of Treasury bills held by CBSL. As a result, total borrowing from the banking sector declined to Rs. 49 billion by end 2009 compared to Rs. 189.6 billion at end July 2009. Total net domestic financing in 2009 amounted to 5 per cent of GDP while net foreign financing was 4.8 per cent of GDP, which consisted of foreign loans (1.8 per cent of GDP) and foreign investments in government securities (3.0 per cent of GDP). Meanwhile, the outstanding government debt to GDP ratio increased slightly to 86.2 per cent in 2009 mainly reflecting the higher budget deficit and the lower growth in nominal GDP.

Monetary Sector Developments

CBSL relaxed its monetary policy stance in 2009 to support domestic economic activity. Accordingly, the Penal interest rate applicable on reverse repo transactions when participating institutions exceeded the maximum number of times they could access the reverse repo window, which was introduced in November 2007, was reduced gradually and harmonised with the Reverse Repo rate in May 2009. At the same time, restrictions on access to Central Bank's repo and the reverse repo facilities were also removed, thus re-establishing the interest rate corridor. The Central Bank's policy interest rates were also gradually reduced during the year: the Repo rate was reduced by 300 basis points to 7.50 per cent and the Reverse Repo rate was reduced by 225 basis points to 9.75 per cent. In addition, margin deposit requirements that were imposed to restrict the demand for credit for certain categories of vehicle and non-essential imports, were removed during the first half of the year, to ease credit conditions.

CBSL took timely and appropriate measures to manage rupee liquidity in the market. The continued capital outflows during the first quarter of the year necessitated CBSL to supply foreign currency to the market resulting in a drain in rupee liquidity from the market. CBSL lowered the Statutory Reserve Ratio (SRR) by a further 75 basis points to 7 per cent in February 2009, following the reduction in the SRR imposed on all rupee deposits of commercial banks by 225 basis points in the last quarter of 2008 releasing about Rs.9 billion to the market. In addition, CBSL purchased Treasury bills from the primary market, while also engaging in reverse repo transactions to enhance rupee liquidity. CBSL also removed the restriction on access to reverse repo standing facility by market participants in 2009.

However, since June 2009, there has been a turnaround in liquidity, posing a challenge to managing the surplus. Renewed investor confidence with the end to the conflict and the securing of the SBA facility from IMF substantially increased foreign investments in government securities from May 2009 onwards. The proceeds of these inflows were purchased by CBSL to stabilise the foreign exchange market and to build official reserves. The resulting increase in rupee liquidity in the market was absorbed through the Central Bank's open market operations (OMO), thus leading to a significant reduction in the Central Bank's holdings of government securities necessitating the use of alternative instruments to conduct OMO. Accordingly, Central Bank Securities were issued to absorb liquidity on overnight basis and term basis from October 2009. In addition, CBSL commenced foreign exchange swap transactions as an additional instrument for absorbing liquidity from November 2009.

The targets for monetary aggregates, which were initially set out in the Monetary Programme for 2009 and announced in the Central Bank's 'Road Map: Monetary and Financial Sector Policies for 2009 and beyond' (Road Map) were subsequently revised downward. The reduction in the SRR, the rapid decline in inflation and the slowdown in the domestic economy were the main factors that warranted this downward revision. Accordingly, the target for the growth in reserve money was revised downward from 5 per cent to 2.8 per cent, while that of broad money was lowered from 14 per cent to 13 per cent. Although the growth in reserve money contracted during the first three quarters of 2009 largely due to the lowering of SRR in the last quarter of 2008 and the first quarter of 2009, it began to increase in the last quarter of 2009, due to the increase in credit to the government from CBSL and the dissipation of the impact of the changes in SRR in the last quarter of 2008, on reserve money. Accordingly, the annual average growth in reserve money contracted by 0.7 per cent, which was within the target set in the revised Monetary Programme for 2009. The growth in broad money, which moderated during the first half of the year, gathered pace thereafter, with annual average broad money growing by 13.6 per cent, which was marginally above the target set in the revised Monetary Programme for 2009.

Interest rates across the term structure shifted downwards in line with the changes in the policy rates and the improvements in market liquidity. The average weighted call money rate (AWCMR) was brought within the policy interest rate corridor, improving the effectiveness of the Central Bank's monetary policy operations. Other market interest rates also declined in line with these changes, although lending rates of commercial banks declined at a slower pace.

Financial System Stability

During 2009, the financial sector remained resilient and financial system stability was maintained despite challenging market conditions. Financial sector institutions were confronted with the stresses caused by the spill-over effects of the global financial crisis and the consequent decline in demand in the domestic economy which had an adverse impact on their business operations. As the global financial turmoil deepened and the global economy contracted, there was an outflow of foreign investments in government securities creating a liquidity shortage in money markets, although this situation turned around with the money market becoming liquid and the equity market rebounding after the end of the conflict in May 2009. The loss of investor confidence and liquidity constraints faced by several entities connected to banks and finance companies in the Ceylinco Group had an adverse impact on the finance and leasing sectors.

However, swift and decisive actions taken by CBSL and the government contributed towards restoring public confidence and continued stability in the financial system. CBSL successfully resolved the liquidity problems encountered by Seylan Bank, a systemically important licensed commercial bank (LCBs), which was a part of the Ceylinco Group. Seylan Bank was recapitalised by issuing new shares and is currently carrying on normal business operations. With a view to resolving the liquidity constraints faced by distressed registered finance companies (RFCs) and specialised leasing companies (SLCs) in the Ceylinco Group, CBSL appointed managing agents and obtained the services of a panel of experts to advise and guide the recovery process. In addition, a special stimulus package and a guarantee scheme were put forward by CBSL with the support of the government to assist RFCs and SLCs that were experiencing liquidity problems. These measures were successful in facilitating the commencement of business operations and bringing stability to the sector.

Outlook

The end to the prolonged internal conflict and the restoration of peace provide a greater optimism for economic prosperity and a strong basis for long-term

sustainable development, supported by appropriate policies. The opportunities created by the restoration of peace, will be complemented by the ongoing global economic recovery. The low inflation and interest rate regime that prevails also provides a conducive environment to fuel economic activities. To harness these opportunities, the existing bottlenecks that hinder a faster growth need to be addressed urgently. Infrastructure projects, already commenced and planned, need to be accelerated to expand the productive capacity of the economy and to improve the efficiency and productivity of economic activities. At the same time, special attention needs to be paid to implement much needed structural and institutional improvements, including the enhancement of the profitability and productivity of public enterprises that are a significant drain on public finances. The fiscal consolidation process also needs to be strengthened. The contribution of the private sector to overall economic development needs to be increased. The regulatory framework has to be further strengthened. Establishment of a strong development planning and monitoring process would be helpful to prioritise projects, avoid delays and ensure the optimal allocation of resources. In the short to medium-term, moving to a high growth trajectory, while maintaining price stability remains a key policy challenge.

3. External Sector Performance – January 2010

Earnings from exports stood at US dollars 472 million, indicating a marginal decline of 3.9 per cent in January 2010, year-on-year, attributable to lower industrial exports, despite higher earnings from agricultural exports. The expenditure on imports increased substantially by 70.1 per cent to US dollars 1,161 million, due to increased expenditure on all major categories, particularly intermediate goods led by petroleum imports. As a result, the trade deficit expanded to US dollars 689 million, compared to that of January 2009.

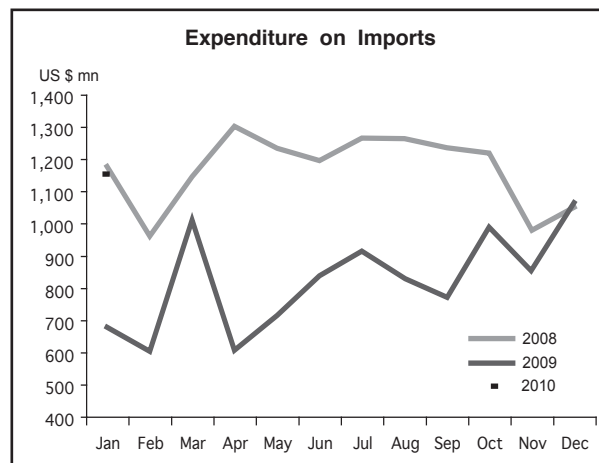

Earnings from agricultural exports increased in January 2010, as a result of sound performance by the tea, rubber and minor agricultural exports. Year-on-year, export volumes of both, tea and rubber rose by 18.5 per cent and 32.6 per cent, supported by significant increases in export prices, to US dollars 4.32 per kg and US dollars 2.79 per kg, respectively, from December 2009. Earnings from minor agricultural exports were propelled by better performance of commodities such as cashew nuts and spices (cinnamon, cloves and nutmeg and mace). However, the decline in earnings from textile and garments exports, which accounted for 37 per cent of total exports, weighed down on the overall

export performance in January 2010. The decline in textile and garments exports is attributed mainly to the lower export volumes compared to January 2009 amidst lower global demand and higher competition from other countries. However, the imports of textile and clothing, which are used as inputs of apparel exports, increased by 8.1 per cent to US dollars 121.5 million in January 2010, reflecting the potential growth in apparel exports in the coming months. Several other categories of industrial exports, such as food, beverages and tobacco, petroleum products, machinery and equipment and diamond and jewellery performed well in January 2010, compared to January 2009.

The increase in import expenditure was led

Sources : Central Bank of Sri Lanka
Sri Lanka Customs Department

Sources : Central Bank of Sri Lanka
Sri Lanka Customs Department

by petroleum and rice, which contributed 52 per cent and 7 per cent, respectively, towards the year-on-year growth in import expenditure. Expenditure on petroleum imports increased due to both, the increased import volumes and the substantially higher prices in the international market. The average price of crude oil imports increased by 87.2 per cent to US dollars 78.08 per barrel in January, 2010, from US dollars 41.71 per barrel in January 2009. The increased expenditure on rice imports was attributed mainly to the larger volumes of rice imports as the government reduced taxes applicable on rice imports to prevent a potential shortage of rice in the domestic market. Rice import volumes increased to 80,310 metric tons in January 2010 compared to 630 metric tons recorded in January 2009. However, import expenditure on fertilizer, declined in January 2010 largely owing to the substantially higher prices that prevailed in January 2009.

In January 2010, US dollars 289.8 million was received from Sri Lankan migrant workers, recording a growth of 12.3 per cent over January 2009. The gross official reserves, with and without Asian Clearing Union (ACU) funds, were at US dollars 5,328 million and US dollars 5,135 million, respectively, by end January 2010. Based on the previous 12 month average imports of US dollars 890 million per month, the gross official reserves, without ACU funds, were equivalent to 5.8 months of imports.

Data on imports for 2009 were revised based on the new information received from the Sri Lanka Customs. Imports for 2009 that increased, comprised mostly of consumer goods (food and medicine for the internally displaced) and investment goods, particularly machinery and equipment (for rehabilitation and reconstruction activities in the Northern and Eastern provinces). However, much of this increase occurred during the fourth quarter due to significantly higher imports of investment goods (mostly, machinery and equipment). The relatively low deficits in the trade and income

accounts in 2009 were offset by the higher inflows of workers' remittances and the surplus maintained in the services account. However, the current account recorded a marginal deficit of US dollars 214 million in 2009 compared to the significantly high deficit of US dollars 3,886 million in 2008. As a result, the current account recorded a deficit of 0.5 per cent of GDP in 2009, down from 9.5 per cent of GDP in 2008, although the previously compiled data had indicated a surplus.

The performance of external trade during the period is further illustrated in the following table.

External Trade and Private Remittances Performance: January 2009

Category	January 2009 (US \$ mn)	January 2010 (US \$ mn)	Growth - January (%)
Exports	491.1	472.0	-3.9
Agricultural	101.0	142.5	41.1
of which, tea	61.5	90.9	47.7
Industrial	385.1	319.9	-16.9
of which,			
textiles and garments	240.6	173.7	-27.8
Mineral	5.1	9.6	88.3
Imports	682.6	1,160.9	70.1
Consumer Goods	154.0	233.5	51.6

4. Monetary Policy Review – April 2010

Inflation, as measured by the year on year change in the Colombo Consumers' Price Index declined to 6.3 per cent in March 2010, while the annual average inflation increased marginally to 3.2 per cent compared to the previous month. The decline in year on year inflation is largely attributable to the reduction in the price of several key food items. The continued improvement in supply conditions is expected to subdue inflationary pressures.

The expansion in monetary aggregates has begun to decelerate. Growth in broad money supply, which picked up towards end 2009, has declined to 17.4 per cent by February 2010. The declining trend in credit to the private sector bottomed out in October 2009 and has since been growing in absolute terms, reflecting the gradual recovery in economic activity. This has been aided by the recovery in the global economy, the easing of the monetary policy stance as well as increased investor confidence. Growth in the domestic economy is expected to gain momentum during the year, supported by these favourable conditions.

Reserve money has been expanding at a higher rate since the last quarter of 2009. The expansion has been mainly due to the increase in currency in circulation

on account of the two elections held during the early part of 2010 coupled with the seasonal demand for currency. The Bank is also monitoring the developments in the money market as excess rupee liquidity continues to remain high. However, reserve money has begun to contract following the festive period. The Bank will continue to closely monitor the movements in monetary aggregates and take appropriate action if necessary.

Considering these developments, the Monetary Board, at its meeting held on 21 April 2010, decided to maintain the policy interest rates of the Central Bank unchanged.

The release of the next regular statement on monetary policy will be on 20 May 2010.

STATISTICAL APPENDIX

Definitions and Explanatory Notes

The following general notes supplement the footnotes given below the individual tables:—

1. The data cover monthly figures available at the time the Bulletin goes to print, and the latest available information does not relate to the same month, in every table.

To enable comparison, annual figures for recent years are given.

2. In an attempt to bring the material up-to-date provisional figures are included in some tables.
3. Figures in some tables have been rounded off to the nearest final digit. Hence there may be a slight discrepancy between the total as shown and the sum of its components.
4. Differences as compared with previously published figures are due to subsequent revisions.
5. The following symbols have been used throughout:—
 - n.a. = not available
 - = nil
 - ... = negligible

(a) Revised

(b) Provisional

(c) (1) Includes manufacturing and export processing industries. Small industry is defined as those units having supply of electricity at 400/230 volts and contract demand is less than 50 KVA, medium industry as supply of electricity at 400/230 volts and contract demand is equal or more than 50 KVA and large industry as supply of electricity at 11KV, 33KV and 132KV.

(2) Figures include electricity consumption of hotels.

(d) Sales other than to Ceylon Electricity Board.

(e) Excluding Petroleum exports.

Note: The Index numbers are calculated by the Labour Department on fixed weights based on the numbers employed as at 31 December 1978. The wage rate used in the calculation of Index numbers are minimum wages for different trades fixed by the Wages Boards.

Sources : Labour Department
Central Bank of Sri Lanka

- (a) The Index refers to wage rates of tea growing and manufacturing, rubber growing and manufacturing, coconut, cocoa, cardamoms and pepper growing trades only.
- (b) Includes baking, brick and tile manufacturing, coconut manufacturing, printing textile, tyre and tube manufacturing, coir mattresses & bristle fibre export, hosiery manufacturing, engineering, garment manufacturing, match manufacturing, biscuit manufacturing, tea export and rubber export trades only.
- (c) This includes cinema, motor transport and nursing homes trade only.
- (d) Combined Index for workers in Agriculture, Industry & Commerce and Services.
- (e) Provisional.

(a) Daily wages represent payments in cash where meals are not provided by the employer. Annual and quarterly figures are averages of monthly figures.

Source: Central Bank of Sri Lanka

(b) Wages in the construction sector are paid on both daily payment and contractual basis. The series on contractual basis in previous bulletin publications has been replaced by the series on daily payment basis from the monthly bulletin of December 2005 onwards for comparison with wages in other sectors.

(c) Daily wages up to December 2004 are the average of daily wages for the two activities. From January 2005 onwards the daily wages cover both activities under a single category following the restructuring of data collection schedules.

(d) Provisional.

(a) Consists of government expenditure excluding contributions to sinking funds, direct payment of public debt and subscriptions to international financial organisations. Also excludes book adjustments arising from losses on Advance Account operations incurred and financed in the previous financial year. Hence, the figures may not tally with the figures published in the accounts of the Government of Sri Lanka.

(b) Special payments and receipts on account of Sri Lanka's contribution to and from the IMF and the IDA and special loans from these payments are excluded from both recurrent expenditure and Central Bank Advances.

(c) Provisional.

(d) Excludes foreign investments in Treasury bills.

(e) Excludes foreign investments in Treasury bonds.

(f) Net foreign investments in Treasury bills and Treasury bonds are included.

(a) Computed from weekly averages.

(b) Footnote (d) of Table 14 in the Annual Report 2009 gives the conversion formula used for the conversion of the volume of the three main types of coconut exports to their nut equivalent (from kgs).

(c) This refers to prices of the best quality copra.

(a) A series with a wide coverage and 1997 as the base year. In order to accommodate the variability arising from a monthly frequency, in computing the monthly trade indices, first the volume index is computed as a Laspeyres index and then the unit value index is derived as the ratio between the value index and the volume index. This methodology avoids the subjective imputation of prices that would be required in deriving a price index first when certain items are not exported or imported in a particular month.

(a) A series with a wide coverage and 1997 as the base year. In order to accommodate the variability arising from a monthly frequency, in computing the monthly trade indices, first the volume index is computed as a Laspeyres index and then the unit value index is derived as the ratio between the value index and the volume index. This methodology avoids the subjective imputation of prices that would be required in deriving a price index first when certain items are not exported or imported in a particular month.

Source: Central Bank of Sri Lanka

- (a) The above presentation conforms as far as possible to international practice as followed by the International Monetary Fund (IMF), in the Balance of Payments Manual, 5th edition (1993). In addition, beginning 1994, Offshore Banking Units have been treated as a part of the domestic banking system.
- (b) Provisional
- (c) Exports are recorded on f.o.b. valuation; imports on c.i.f. valuation.
- (d) Includes port related services.
- (e) Passage collections by foreign shipping agents and airlines are included in passenger fares.
- (f) Indicates outright grants received in the form of programme, food and commodity aid, cash and technical assistance.
- (g) Indicates outright grants received in the form of project aid.
- (h) Credit entries refer mainly to an increase in liabilities resulting from imports under trade credits. The debit entries in respect of such imports are in the merchandise account and are recorded on an arrivals basis. Debit entries refer to a decline in such liabilities and are recorded at the time of settlement of payment for such imports.
- (i) The change in capital of the monetary sector is based on local records.
- (j) The figures shown in the credit column relate to the increase in liabilities to the IMF arising from drawings from the IMF and the receipts under the Stand-by Arrangement facility in 2009. US dollar and Sri Lanka Rupee values reflect changes in the representative rate of the Special Drawing Rights (SDRs). Figures in the debit column are in respect of repurchases or repayments, made in installments to the IMF, in respect of earlier drawings. Subscriptions to the IMF, consequent to successive increases in Sri Lanka's quota, are also shown in the debit column.
- (k) General and special allocations of SDRs by the IMF.

Balance of Payments^(a) – US dollars million

Source: Central Bank of Sri Lanka

- (a) The above presentation conforms as far as possible to international practice as followed by the International Monetary Fund (IMF), in the Balance of Payments Manual, 5th edition (1993). In addition, beginning 1994, Offshore Banking Units have been treated as a part of the domestic banking system.
- (b) Provisional
- (c) Exports are recorded on f.o.b. valuation; imports on c.i.f. valuation.
- (d) Includes port related services.
- (e) Passage collections by foreign shipping agents and airlines are included in passenger fares.
- (f) Indicates outright grants received in the form of programme, food and commodity aid, cash and technical assistance.
- (g) Indicates outright grants received in the form of project aid.
- (h) Credit entries refer mainly to an increase in liabilities resulting from imports under trade credits. The debit entries in respect of such imports are in the merchandise account and are recorded on an arrivals basis. Debit entries refer to a decline in such liabilities and are recorded at the time of settlement of payment for such imports.
- (i) The change in capital of the monetary sector is based on local records.
- (j) The figures shown in the credit column relate to the increase in liabilities to the IMF arising from drawings from the IMF and the receipts under the Stand-by Arrangement facility in 2009. US dollar and Sri Lanka Rupee values reflect changes in the representative rate of the Special Drawing Rights (SDRs). Figures in the debit column are in respect of repurchases or repayments, made in installments to the IMF, in respect of earlier drawings. Subscriptions to the IMF, consequent to successive increases in Sri Lanka's quota, are also shown in the debit column.
- (k) General and special allocations of SDRs by the IMF.

(a) Special Drawing Rights (SRDs), the unit of account of the International Monetary Fund.

Source: Central Bank of Sri Lanka

(b) The NEER is the weighted average of nominal exchange rates of the 24 trading partner and competitor countries. Weights are based on the trade shares reflecting the relative importance of each currency in the currency basket.

(c) The REER is computed by adjusting the NEER for inflation differentials with the countries whose currencies are included in the basket.

(d) REER computation is based on CCPI.

(e) The REER Indices for 2009 are provisional.

(a) Annualised Forward Premium (f^d) is computed using the following formula.

Source: Central Bank of Sri Lanka

$$f^d = \{ [F_t^{t+1} - S_t] / S_t \} * 100 * (12/t)$$

Where F_t^{t+1} is the forward rate for period $t+1$ that exists in period t and S_t is the interbank spot rate at period t .

(b) Provisional

(a) Includes assets/liabilities of National Development Bank which merged with NDB Bank Ltd., with effect from August 2005.

Source: Central Bank of Sri Lanka

(b) External assets (net) of the Central Bank and commercial banks (including outward bills).

(c) Currency and demand deposits held by the public.

(d) Credit extended by the banking system to the government, net of government deposits with banks and government cash balances.

(e) Restructuring bonds worth Rs.19,392.6 million, which were issued by the government to the two state banks, have been converted to Treasury bonds upon their maturity in October 2006. This amount, which previously appeared under Other Assets has been included in Net Credit to Government since October 2006.

(a) The balance sheet data of the Central Bank from January 2002 is based on the International Accounting Standards (IAS). Accordingly, foreign securities of the Central Bank have been valued at current market prices since January 2002. These data prior to January 2002 are according to local books at cost or face value whichever is less.

(b) Includes securities acquired from government institutions.

(c) According to IAS, the amount of Sri Lanka's quota with the IMF has been taken into the Central Bank's balance sheet.

(d) According to IAS, balance sheet of the CBSL is prepared on accrual basis and receivables show interest receivables on foreign securities.

(e) From February 1975, loans and advances to other include amounts granted under the Medium and Long-term Credit Fund. Credit provided under "Susahana" Refinance Credit Scheme is included from December 2005.

(f) According to IAS, government and government guaranteed securities are at fair value basis since January 2002.

Note : The number of reporting banks were 23 until January 2006, and 22 from October 2008.

- (a) Includes assets/liabilities of National Development Bank which merged with NDB Bank Ltd., with effect from August 2005.
- (b) Restructuring bonds worth Rs. 19,392.6 million, which were issued by the government to the two state banks, have been converted to Treasury bonds upon their maturity in October 2006. This amount, which previously appeared under Other Assets has been included in Treasury bonds since October 2006.

(c) Includes Central Bank securities and DFCC Bonds.

(d) Fixed and other assets consists of banks' property, furniture, fittings and sundries (commission, interest receivable etc.).

(e) Liquid assets consist of Cash on hand, Balances due from Central Bank, Foreign currency on hand and Balances due from banks abroad, Government of Sri Lanka Treasury bills and bills discounted. With effect from 18 May 1998, Treasury bonds are considered as part of liquid assets of commercial banks. Balances due from domestic banks and cash items in process of collection have been excluded from liquid assets and domestic inter-bank deposits have been excluded from demand deposits, because from the view point of the commercial banking system as a whole such claims and deposits cancel out.

(a) This monetary survey is based on the aggregated data pertaining to both Domestic Banking Units (DBUs) and Offshore Banking Units (OBUs) of banks operating in Sri Lanka. Definitional changes have been adopted in aggregating DBUs and OBUs data to avoid double counting and misclassification of assets and liabilities. The major changes are:

(Contd.)

- (1) All DBU placements in OBUs are recorded as domestic assets, while all DBU borrowings from OBUs are recorded as domestic liabilities.
- (2) Foreign currency deposits of DBUs are classified on the basis of ownership rather than on the basis of currency. Hence, the following apply :
 - (i) One half (50 per cent) of NRFC deposits are treated as domestic deposit liabilities;
 - (ii) All RNNFC balances are treated as foreign liabilities;
 - (iii) All other domestic foreign currency accounts are treated as domestic deposit liabilities.
- (b) Includes assets / liabilities of National Development Bank which merged with NDB Bank Ltd., with effect from August 2005.
- (c) External assets (net) of the Central Bank and commercial banks (including outward bills).
- (d) Currency and demand deposits of the public.
- (e) Time and savings deposits of the public held with commercial banks.

(f) Credit extended by the banking system to the government, net of government deposits with banks and government cash deposits.

Source: Central Bank of Sri Lanka

(g) Restructuring bonds worth Rs. 19,392.6 million which were issued by the government to the two state banks, have been converted to Treasury bonds upon their maturity in October 2006. This amount, which previously appeared under Other Assets, has been included in Net Credit to Government since October 2006.

Note :

DBUs - Domestic Banking Units

OBU - Offshore Banking Units

LSBs - Licensed Specialised Banks include Regional Development Banks, DFCC Bank, National Savings Bank, State Mortgage & Investment Bank, Ceylinco Savings Bank, SANASA Development Bank, HDFC Bank, SME Bank, NDB Housing Bank, Lankaputhra Development Bank and Sri Lanka Savings Bank. The SME Bank merged with Lankaputhra Development Bank in January 2008. Merchant Bank of Sri Lanka acquired a majority stake in Ceylinco Savings Bank Ltd. in July 2009. The name of which was subsequently changed to MBSL Savings Bank Ltd.

RDBs - Regional Development Banks

RFCs - Registered Finance Companies

Source: Central Bank of Sri Lanka

(a) This financial survey is based on the aggregate data pertaining to Domestic Banking Units (DBUs), Offshore Banking Units (OBUs), Licensed Specialised Banks (LSBs) and Registered Finance Companies (RFCs) operating in Sri Lanka. Definitional changes have been adopted in aggregating DBUs, OBUs, LSBs and RFCs data to avoid double counting and misclassification of assets and liabilities. The major changes are:

- (1) All DBUs placements in OBUs are recorded as domestic assets, while all DBUs borrowings from OBUs are recorded as domestic liabilities.
- (2) Foreign currency deposits of DBUs are classified on the basis of ownership rather than on the basis of currency. Hence, the following apply:
 - (i) One half (50 per cent) of NRFC deposits are treated as domestic deposit liabilities;
 - (ii) All RNNFC balances are treated as foreign liabilities;
 - (iii) All other domestic foreign currency accounts are treated as domestic deposit liabilities.

(b) External assets (net) of the Central Bank, Commercial banks (including outward bills), LSBs and RFCs.

(c) Currency, demand deposits and quasi money in DBUs in this table differ from those in table 52 due to the fact that LSBs and RFCs are not treated as public under this broad monetary survey (M₄) definition.

(d) Time and savings deposits of the private sector with commercial banks, LSBs and RFCs.

(e) Credit extended by the monetary authority, DBUs, OBUs, LSBs and RFCs to the Government, net of Government deposits with banks and Government cash deposits.

(a) Under Sections 10c, 93, 94, 96 and 97 of the amended Monetary Law Act (Chapter 422), commercial banks and other financial institutions are required to maintain reserves against their deposit liabilities as prescribed by the Monetary Board. Currently, only commercial banks are subject to reserve requirements. With effect from 24 January 1992, an amount of till cash over and above two per centum of the total deposit liabilities, but not exceeding four per centum, could be maintained as a part of required reserves in the form of Sri Lanka currency notes and coins. Details of required reserve ratios, which were applicable in the past and computational methods have been published in the Appendix table on the 'Reserve Position of Commercial Banks' in the Annual Reports prior to 2003.

(b) Reserve data are for the last reserve week of each month. The required reserves recorded in the table refer to the cumulative reserves for the week, while commercial bank deposits with the Central Bank are the cumulative deposits for that particular reserve week. Excess/Deficit on SRR is the difference between the cumulative SRR for the reserve week and cumulative deposits of the commercial banks for the week.

(c) Excludes interbank deposits.

(d) With effect from 03 April 2003, the basis of computing the Statutory Reserve Requirement (SRR) was changed from deposit liabilities and vault cash balances at the close of business on Wednesday of the previous reserve week, to the average of deposit liabilities and vault cash balances during the week ending Tuesday of the previous reserve week.

(e) SRR was reduced from 7.75 per cent to 7.00 per cent with effect from 27 February 2009.

(a) All interest rates are as at the end of period, unless otherwise stated.

(b) This is the rate at which the Central Bank grants advances to commercial banks for temporary liquidity purposes. With effect from 04 January 1991, the rate was increased to 17 per cent from 15.5 per cent. As at end 1999 this rate was 16 per cent. With effect from 02 October 2000 the rate was increased to 18 per cent and further increased to 25 per cent with effect from 21 November 2000. With effect from 02 July 2001, this rate was brought down to 23 per cent and further reduced to 18 per cent with effect from 27 December 2001. On 15 August 2003, the rate was reduced to 15 per cent.

(c) Average Weighted Deposit Rate (AWDR) is calculated monthly by the Central Bank based on the weighted average of all outstanding interest bearing deposits of commercial banks and the corresponding interest rates.

(d) The Average Weighted Prime lending Rate is estimated weekly by the Central Bank based on commercial banks' lending rates offered to their prime customers during the week. These monthly figures are average values of estimated weekly rates.

(e) The Sri Lanka Inter-Bank Offered Rate (SLIBOR) is computed daily by the Central Bank, based on rates offered by commercial banks in the inter-bank market. The rate shown is the average of such offered rates by selected commercial banks.

(a) Issue of Treasury bonds commenced in March 1997.

(b) The yields on Rupee Loans are administratively determined and not market determined unlike the yields on Treasury bills and Treasury bonds.

(c) The secondary market information is based on data provided by Primary Dealers in Government Securities and is available since October 2000.

(d) Yield rates are averages of bid and offer rates.

(e) Interest with tax for 4 year maturity.

(f) Interest with tax for 2 year maturity.

Note : Treasury bonds are not issued on a regular basis. Hence a continuous series of primary market yield rates is not available.

(a) Rate on ten year certificates. The issue of this certificate is discontinued. The rate reflects the rate on earlier issues.

(b) Issuing National Savings Certificates commenced in October 1997.

(c) DFCC Bank commenced deposit mobilisation in April 1996.

(d) Private savings and development banks include Sanasa Development Bank which was established in October 1997. From 2003 it only includes Sanasa Development Bank.

(e) The minimum rate represents the refinance rate charged under the Small and Medium Scale Industries (SMI) Scheme. NDB became a licensed commercial bank with effect from 01 August 2005.

ATM and Credit Cards		
ATM cards – Issuing fee	Rs. 750	Rs. 75
Credit cards – Issuing fee	Rs. 6,000	Rs. 180
Renewal fee	Rs. 5,000	Rs. 120

Notes :

- (1) Commercial banks charge a variety of fees and commissions on their services. The table gives a range of the maximum and minimum fees and commissions which are based on the information provided by commercial banks. These charges, which do not change very frequently are published semi-annually to enable the public to negotiate best terms. These fees and commissions could be different when services and products are provided as a package.
- (2) These are standard charges of commercial banks. However, charges for some specific products could include charges payable to banks abroad. For example, banks in Sri Lanka may include in their charges fees payable to banks abroad such as for adding confirmation to Letters of Credit, and for correction of discrepancies.
- (3) In the case of Documentary Credits, the charges for outward transmission from Sri Lanka would differ, on the mode of transmission used.
- (4) Loan application processing fees vary according to the loan amount.
