EVENTS OF THE MONTH
April 2013

Fiscal Sector

- Profits and income (other than dividends and interest) of the following institutions were exempted from the income tax :
 - College of General Practitioners of Sri Lanka
 - Sri Lanka Social Security Board
 - Provision of services free of charge by public corporation out of the funds from the consolidated fund or out of any loan arranged by the Government
 - Sri Lanka Savings Bank which is merged with the National Development Trust Fund
 - Lanka Puthra Development Bank Limited
 - Any Government assisted private school (not incorporated under Companies Act, No. 07 of 2007) which is registered with Ministry of Education and mandated to follow the Government curricula.
- Profits and income from the following were exempted from the income tax :
 - profits and income from any off-shore business where goods are procured from one country and transported to another country other than Sri Lanka
 - royalties, franchising fee or any payment for designing made to any foreign collaborator by a BOI registered company during the period of tax holiday, where the foreign direct investments raised outside Sri Lanka exceeds US dollars 50 million, if such services are essential in carrying out activities in Sri Lanka and not obtainable in Sri Lanka
 - interest income from investments made on or after January 01, 2013 in Corporate Debt Securities (quoted in any Stock Exchange) or municipal bonds issued with the approval of the Secretary of the Ministry of Finance.
 - income from emoluments arising in Sri Lanka of any individual who is not a citizen of Sri Lanka and brought to Sri Lanka by a BOI registered company during the period of tax holiday where the total investment made is out of foreign direct investments exceeding US dollars 50 million.
- interest earned by any person, partnership or other body of persons outside Sri Lanka from investment made out of foreign currency brought in to Sri Lanka.
- profits and income from cultivation of any renewable energy crops and transactions connected with manufacturing, distribution and marketing of organic fertilizer.
- Following tax concessions were provided to Sri Lankans citizens earning outside Sri Lanka :
 - 183 days rule will only be applied in deciding residency of an individual
 - the profits and income derived from source outside Sri Lanka by an individual will be exempted if such income is remitted to Sri Lanka through a bank in Sri Lanka.
 - extending the present exemption on profits and income derived from outside Sri Lanka applicable to dual citizens who arrive and stay in Sri Lanka, to individuals who have obtain permanent resident status in any other country or any similar status in which such individual obtains the citizenship in Sri Lanka and any other country.
- Concessionary income tax rates were applicable on the following :
 - rate in relation to unit trust management companies will be reduced to 10 per cent from the current rate of 28 per cent
 - the maximum rate of income tax applicable to pilots on the profits from employment and qualified employees providing professional services to persons out of Sri Lanka reduced to 16 per cent.
 - the maximum rate of income tax applicable on employment income being compensation for loss of employment which is not uniformly applicable to all the employees reduced to 16 per cent.

- reducing the tax rate on profits from poultry farming to 10 per cent.
- treating supply of goods manufactured in Sri Lanka or provision of services, to foreign ships for payments in foreign currency as deemed exports and taxing the profit and income there from, subject to the concessionary rate of 12 per cent.
- treating the sale of any product manufactured in Sri Lanka for payment in foreign currency through foreign exchange earning account authorized by the Central Bank of Sri Lanka as deemed exports and taxing the profits and income there from, subject to the concessionary rate of 12 per cent.
- classifying “Organic tea in bulk” as non-traditional goods, for the application of the concessionary rate of 12 per cent.
- increasing the annual turnover of Rs. 300 million to Rs. 500 million for the application of the concessionary rate of 10 per cent for any undertaking engaged in the manufacture of any article or in the provision of any service.
- reducing tax payable by any company listing its shares on or after April 01, 2013, and more than 20 per cent of its shares are issued to general public, by 50 per cent for the year of assessment in which such shares are listed and for the 2 years of assessment immediately succeeding that year of assessment.
- the profit and income of any person or partnership from operating any mini hydro power project or other alternative energy source will be taxed at a rate of 12 per cent.

- Considered cost of acquisition of any plant, machinery or equipment of/for following industries/activities as an allowance for depreciation :

Industry / Activity	Allowable Rate
technology upgrading or introducing any new technology	50% per year
providing more than 30% of the total requirement of the power generation out of alternative energy resources	100%
the establishment of Broker Back Office system to be compliant with the CSE requirements	100%
any export industry	50% per year

- Extended the triple deduction allowed for expenditure on research and development carried out through the Government institutions to such expenditure incurred on research carried out through private institutions.
- Make the following provisions in relation to interest income on Corporate Debt Securities not exempted from income tax :
 - deduction in the full interest for the respective period at the time of issue, or where the security is issued with floating rate of interest, at the time beginning of each reviewing period.
 - where no deduction has been made up from front, deduction at the time of payment of interest (payable on or after April 01, 2011)
- Reduced the present time bar period applicable for income tax from two years to 18 months
- Exempted the Central Bank of Sri Lanka from ESC.

External Sector

A Loan from the Exim Bank of China

An agreement was signed between the Government of Sri Lanka and Exim Bank of China, on 24 April 2013, for a loan amounting to Renminbi Yuan 960 million (approximately Rs. 19.7 billion) to finance the Hambantota Port Development Phase I for Ancillary Works and Supply of Equipment Project. The loan carries an interest fee of 2 per cent per annum, a commitment fee of 0.25 per cent per annum and a management fee of 0.25 per cent per annum. The loan is repayable in 20 years including a grace period of 5 years.

A Loan from the Hatton National Bank PLC

An agreement was signed between the Government of Sri Lanka and HNB, on 02 April 2013, for a loan

amounting to Sterling pound 6.78 million (approximately Rs. 1.3 billion) to finance the Construction of 210 Steel Bridges Project. The loan carries an interest fee of 6 months LIBOR + 6 per cent per annum and a management fee of 0.35 per cent per annum. The loan is repayable in 10 years including a grace period of 2 years.

A Loan from the DFCC Bank

An agreement was signed between the Government of Sri Lanka and DFCC, on 05 April 2013, for a loan amounting to Euro 3.87 million (approximately Rs. 328 million) to finance the Implementation of Greater Rathnapura Water Supply Phase I Project. The loan carries an interest fee of 6 months LIBOR + 5.9 per cent per annum. The loan is repayable in 8 years including a grace period of 1 years.

Part II

PRESS RELEASES

April 2013

1. External Sector Performance – January 2013

The trade deficit continued to narrow and recorded a 24 per cent year-on-year decline in January 2013. The policy measures implemented early in 2012 to discourage non-essential imports have continued to ease pressure on the trade deficit and therefore on the current account balance.

The policy measures adopted have therefore helped withstand the adverse impact of the slowing down of global demand on exports. Inflows on account of exports of services remained favourable in January 2013, further supporting the current account, thereby helping maintain the balance of payments position and international reserves at healthy levels.

Expenditure on imports declined by 21.3 per cent, year-on-year, to US dollars 1,507 million in January 2013, reflecting the effectiveness of the policies introduced early in 2012 to curb import expenditure. Imports of refined petroleum declined by 58.4 per cent, year-on-year, in January 2013, partly due to increased hydro power generation. Lower expenditure on imports of transport equipment, gold and vehicles also made a significant contribution toward the decline in import expenditure in January 2013. However, expenditure on imports of certain intermediate goods such as chemical products, agricultural inputs, plastic and articles thereof and wheat and maize which accounted for about 11 per cent of imports, increased on a year-on-year basis in January 2013. Import expenditure on investment goods also declined on a year-on-year basis in January 2013, as imports of transport equipment and machinery and equipment declined. Nevertheless, import expenditure on building materials, categorised under investment goods, increased in January 2013. With respect to consumer goods imports, expenditure on imports of food and beverages as well as non-food consumer goods declined. Vehicle imports, which declined by 51.7 per cent, year-on-year, made the largest contribution towards the decline in expenditure on consumer goods imports.

As demand for exports remained fettered by the slow recovery of major export destinations, namely, the EU and the USA, the decline in export earnings continued into 2013. Earnings from exports declined

by 18.2 per cent to US dollars 727 million in January, as earnings from all major categories of exports declined, on a year-on-year basis. The decline was mainly driven by industrial exports which declined by 20.7 per cent. Earnings from exports of textiles and garments declined by 8.9 per cent. Exports of transport equipment, gems, diamonds and jewellery and rubber products were the other categories of export that contributed significantly to the decline in export earnings. Earnings from agricultural exports declined in January 2013, as a result of earnings from both traditional and non-traditional agricultural exports declining. Despite exports of tea continuing to fetch favourable prices, the drop in demand from main markets led to a decline in earnings from tea exports in January. However, export earnings from green tea, although its share remains low, recorded an year-on-year increase. While the price of natural rubber has decreased globally, the decline in volumes of rubber exports could be attributed partly to the demand from local manufacturers of rubber based products. Of non-traditional agricultural exports, earnings from the export of spices increased in January

2013, led mainly by the commendable performance of pepper and cloves exports. Further, earnings from the export of unmanufactured tobacco increased marginally in January 2013.

Tourist arrivals in January 2013 increased by 13.4 per cent, year-on-year, to 97,411 while earnings from tourism grew at a healthy rate of 20.5 per cent when compared with the corresponding month of 2012, to US dollars 107 million. Workers' remittances amounted to US dollars 524 million in January 2013, compared to US dollars 473 million in January 2012, thus recording a year-on-year growth 10.8 of per cent.

In January 2013, net sales by foreign investors at the Colombo Stock Exchange (CSE) amounted to US dollars 10.4 million whereas net foreign purchases amounting to US dollars 4 million were recorded in January 2012. However, there has been a noticeable increase in transaction volumes at the CSE in January

2013, when compared with the corresponding month of January 2012. Meanwhile, there have been significant inflows of foreign investments to the Government securities market, with net inflows to Treasury bills and Treasury bonds amounting to US dollars 289 million during January 2013 compared to a net inflow of US dollars 170 million in January 2012. Further, in January 2013, long-term loans obtained by the government amounted to US dollars 125 million.

Gross official reserves amounted to US dollars 6,855 million by end January 2013, while total international reserves which include gross official reserves and foreign assets of commercial banks, amounted to US dollars 8,538 million by end January 2013. In terms of months of imports, gross official reserves were equivalent to 4.4 months of imports by end January 2013, while total reserves were equivalent to 5.5 months of imports.

Table 1

A Summary of External Trade Performance – January 2013^(a)

Category	January 2012 (US \$ mn)	January 2013 (US \$ mn)	Growth January (%)
Exports	888.2	726.7	-18.2
<i>Of which,</i>			
Agricultural Products	181.5	167.0	-7.9
<i>of which,</i> Tea	103.9	101.0	-2.8

<i>of which,</i> Textiles and Garments	366.6	333.9	-8.9
Rubber Products	78.2	62.8	-19.8
Food, Beverages and Tobacco	20.8	12.4	-40.3
Mineral Products	2.6	1.0	-60.4
Imports	1,915.0	1,507.2	-21.3
<i>Of which,</i>			
Consumer Goods	287.7	246.8	-14.2
<i>of which,</i> Food and Beverages	124.5	114.2	-8.2
Other Consumer Goods	163.2	132.6	-18.8
Intermediate Goods	1,096.5	819.6	-25.3
<i>of which,</i> Fuel	515.1	269.7	-47.6
Textiles and Textile Articles	203.0	203.2	0.1
Investment Goods	523.3	440.2	-15.9
<i>of which,</i> Machinery and Equipment	250.3	250.1	-0.1
Transport Equipment	144.7	52.7	-63.6
Building Material	127.7	137.0	7.2
Balance of Trade	-1,026.8	-780.4	-24.0
Workers' Remittances	472.8	524.0	10.8
Portfolio Investments (Net)	4.1	-10.4	
Earnings from Tourism	88.9	107.2	20.5
Inflows to the Government (b)	325.7	801.8	146.2
<i>Of which,</i>			
Treasury Bills and Bonds	229.6	676.2	194.5
Long-term Loans	95.7	125.1	30.6

(a) Provisional

(b) Inflows to the Government include capital and current transfers to the government, inflows from sale of Treasury Bills and Treasury Bonds and long-term loans of the Government.

2. Financial System Stability Review – 2012

An assessment of the performance and stability of the financial sector of Sri Lanka is presented by the Central Bank in the Financial System Stability Review annually. In its 2012 issue, it was highlighted that Sri Lanka's financial sector expanded and strengthened playing a key role in supporting the growth momentum of the economy.

Despite challenging global as well as domestic market conditions, the risk absorbency capacity and the overall soundness of the financial sector improved with higher levels of capital, adequate liquidity buffers, healthy earnings, enhanced supervisory and regulatory frameworks and integrated risk management frameworks. Further, public confidence improved with financial safety net mechanisms and consumer protection measures in place. Although asset growth moderated responding to the ceiling on credit growth in force during the year, access to finance increased with the extension of branch networks specifically in the regional areas.

The multi-pronged policy measures implemented by the Government and the Central Bank during early 2012 facilitated conducive macroeconomic conditions and subdued the volatilities in the financial markets, improving investor confidence. This was reflected in the continued foreign investments in both equity and government debt securities markets during the year. The banks were successful in securing funding from foreign sources enabling their funding to be diversified and their balance sheets to be strengthened.

With further relaxation of exchange control measures, corporate entities were also allowed to borrow abroad with greater ease. Further, several initiatives including tax incentives were introduced during the year to fast track the development of the capital markets, specifically the corporate debt market.

The regulatory and supervisory frameworks governing the financial sector were strengthened in line with international standards facilitating an effective financial intermediation function. Directions were issued to licensed banks on integrated risk management and safeguarding of customer interests while guidelines were issued on business conduct and good market practices on foreign exchange trading activities. The Central Bank initiated the process of taking measures to introduce capital and liquidity standards to banks under Basel III. A panel of auditors was appointed for licensed finance companies (LFCs) and specialised leasing companies (SLCs) to strengthen the audit process. Further, directions were issued to LFCs in relation to information systems security and upper limits for interest rates offered for deposits while SLCs were issued directions in relation to increase in capital, assessment of fitness and propriety of directors and key management personnel, maximum amount of borrowings and liquidity requirements.

With a view to improving transparency and reliability of financial reporting of the financial institutions, accounting standards in line with international financial reporting standards were adopted in 2012. Solvency margin rules were further strengthened and initial measures are being taken to introduce a risk based capital adequacy framework for the insurance sector. The close monitoring and proactive risk management practices have ensured reliability and smooth operations of the payment and settlement systems in the country.

3. The Summary of the Annual Report of the Central Bank of Sri Lanka for the year 2012

Section 35 of the Monetary Law Act requires the Monetary Board of the Central Bank of Sri Lanka to submit a report giving details of the state of the economy, the condition of the Central Bank and the policies and measures adopted by the Monetary Board during the year to the Minister in charge of the subject of Finance within four months of the commencement of the following year.

The 63rd Annual Report of the Monetary Board was submitted to H.E. the President of Sri Lanka and the Minister of Finance and Planning today, the 9th of April 2013. Following are some of the highlights of the report.

The Sri Lankan economy grew at a healthy rate of 6.4 per cent in 2012 while inflation was maintained at single digits for a fourth consecutive year, despite several global and domestic challenges. Improved business and consumer confidence, which supported a robust economic growth of 8 per cent in the preceding two consecutive years, was accompanied by high credit and monetary expansion and a widening trade deficit fuelled by high import demand.

To further strengthen the macroeconomic environment, by containing the rapid expansion of monetary aggregates and the widening trade deficit, the Central Bank and the government implemented a comprehensive policy package in early 2012. Accordingly, the Central Bank adopted a tight monetary policy stance by raising policy interest rates and issuing a Direction under Section 101(1) of the Monetary Law Act in March 2012 to moderate credit growth by licensed banks. The Central Bank also allowed greater flexibility in the determination of the exchange rate and limited its intervention in the domestic foreign exchange market. To curtail imports, tariffs on selected imports were raised. Further, in order to reduce the losses being incurred by state owned enterprises and their impact on overall macroeconomic stability, several administratively determined prices, mainly relating to energy, were revised.

Inflation was maintained within single digit levels in 2012 for the fourth consecutive year. Inflation declined to a low level of 2.7 per cent in February 2012. However, the upward adjustment of energy prices and transport fares in February 2012 to reflect the rise in oil prices in the international market, the pass-through of the depreciation of the rupee, supply disruptions on account of adverse weather conditions that prevailed in major cultivation areas and the impact of past high monetary expansion resulted in inflation edging up to end the year at 9.2 per cent. Nevertheless, within a relatively short period of time the impact of the policy measures adopted was evident with the trade deficit and credit granted to

the private sector decelerating while managing inflation expectations also helped, containing inflation at single digit levels throughout the year. By end 2012, the annual average rate of inflation stood at 7.6 per cent.

Reflecting the government's continued commitment to the fiscal consolidation process, the overall fiscal deficit was contained significantly below the previous year's level, although it marginally exceeded the target in the budget. The slowdown in economic activity and the decline in imports had a negative impact on government revenue collection. However, by maintaining a tight rein on recurrent expenditure and scaling back on capital expenditure, the overall fiscal deficit was contained at 6.4 per cent of GDP, marginally above the targeted level of 6.2 per cent of GDP and significantly below the 6.9 per cent of GDP in 2011. Raising the tax to GDP ratio by broadening the tax base and improving tax compliance would be critical to sustaining the fiscal consolidation process in the medium term. Although major tax reforms resulted in a simplification of the tax structure, revenue collection remained weak.

The external sector strengthened during the year benefiting from the policy measures that were adopted in early 2012 to improve macroeconomic stability. Import expenditure declined by 5.4 per cent with non-fuel imports declining at a faster rate of 8.6 per cent. Despite the decline in exports by 7.4 per cent due to weak external demand and the decline in international commodity prices, the trade deficit contracted to 15.8 per cent of GDP in 2012. The improvement in the trade account, increased inflows from trade in services including tourism and transportation, and continued high growth in workers' remittances helped contain the current account deficit to 6.6 per cent of GDP in 2012. The improvement in the current account together with higher inflows to the capital and financial account from the proceeds of the fifth international sovereign bond, higher inflows to the government to finance infrastructure development projects and increased foreign borrowing by commercial banks and the private sector as a result of the relaxation of exchange control regulations, resulted in the BOP recording a surplus of US dollars 151 million in 2012. Accordingly, gross official reserves rose to US dollars 6.9 billion by end 2012.

The financial sector remained resilient and continued to support domestic economic activity despite the elevated risks from global and domestic developments. The financial sector expanded during the year with increased access to finance although asset growth moderated as the credit ceiling was imposed early in the year. Nevertheless, soundness of financial sector institutions improved with higher capital levels, adequate liquidity buffers and healthy earnings. With the raising of funds abroad, the banking sector was able to diversify its sources of funding, further strengthening its balance sheet. Significant attention was directed over the year towards strengthening the effectiveness of the regulatory and supervisory framework, in line with international standards and best practices, and providing an enhanced focus on governance practices and risk management to address potential risks to financial stability. The payments and settlement system too continued to operate with a high degree of availability and safety, facilitating the financial intermediation function.

Real Sector Developments

The economy grew by 6.4 per cent in real terms in 2012 amidst the slow recovery in global demand and the multi-pronged policy measures introduced to strengthen macroeconomic stability. All key sectors contributed positively to economic growth in 2012. The Industry sector was the main driver of growth with the construction sub sector making the most significant contribution, reflecting the massive public investment programme and several private sector real estate projects. Growth in the Services sector moderated largely on account of the slowdown in external trade and the deceleration in the transport sub sector. Despite adverse weather conditions in the second half of the year, the Agriculture sector performed better in 2012 than in 2011. Reflecting the expansion in economic activities, the unemployment rate declined to 4 per cent in 2012 from 4.2 per cent in 2011.

The Agriculture sector grew by 5.8 per cent in 2012, recovering from a slow growth of 1.4 per cent in 2011, amidst drought conditions in the third quarter of the year and heavy monsoonal rains and floods in the latter part of the year. The favourable weather conditions that prevailed in the early part of the year produced a bountiful paddy harvest in the Maha season, contributing to the recovery of the paddy despite the significant setback in paddy production in the Yala season due to adverse weather conditions. The performance of the agriculture sector was also driven by the improvement in vegetable production, highland crops, livestock and a significant increase in fish production during the year. The fisheries sub sector also contributed significantly

towards the growth in the Agriculture sector while milk production supported by concerted efforts by the government to promote the dairy industry. In the export agricultural sector, coconut production increased largely due to the lag effect of favourable weather conditions that prevailed in major coconut growing areas. However, tea production was adversely affected by the drought while rubber production declined due to the torrential rainfall. Within the minor export crops sector, pepper production increased significantly while the production of cinnamon and cloves declined in 2012. Most agricultural commodities benefited from the favourable prices that prevailed in 2012.

The Industry sector grew by 10.3 per cent, contributing substantially to the expansion of the economy in 2012. The sustained increase in construction activities, which accelerated the growth momentum of the construction sub sector spurred the growth in the Industry sector. The continuation of major government funded infrastructure development projects and increased construction activities of the private sector, including tourism related new construction and renovation activities, contributed to this growth. A high level of activity in the construction sector bolstered demand for minerals and construction material enabling the mining and quarrying sub sector to increase its share in GDP. Manufacturing, the largest sub sector within the Industry sector, decelerated in terms of value added growth due to subdued domestic and external demand. The factory industry sub sector, which accounted for around 90 per cent of manufacturing output, decelerated in 2011. The apparel industry has been able to sustain its performance despite the slowdown in major export destinations due to the high quality of export products and strong domestic demand arising from the tourism sector. The contribution from the electricity, gas and water sub sector to industry growth was also lower in comparison to the previous two years, partly due to the drop in value addition from hydro power generation during the second and third quarters of the year. Government initiatives in the form of regional industrial development, productivity improvements, support for small and medium enterprises (SME) and research and development for innovation continued to be the focus of industrial policy in 2012.

Services sector growth moderated to 4.6 per cent in 2012 from an expansion of 8.6 per cent in 2011 mainly due to the deceleration in the wholesale and retail trade sub sector. As a result, the relative share of the Services sector in GDP reduced to 58.5 per cent in 2012 from 59.5 per cent in 2011. The wholesale and retail trade sub sector grew by a modest 3.7 per cent in 2012 from 10.3 per cent in the previous year. The slowdown in import trade, reflecting the impact of policy measures

taken to curb imports, and the decline in exports due to the sluggish recovery in the global economy largely contributed to the deceleration in this sub sector. Transport and communications, banking, insurance and real estate and hotels and restaurants sub sectors grew at a positive, albeit slower pace in 2012, also contributing to the modest growth in the Services sector.

Domestic and national savings improved considerably as a result of the improvement in the current account deficit. The lower growth in consumption expenditure mainly on account of imports resulted in an increase in the domestic savings rate to 17 per cent of GDP in 2012 from 15.4 per cent of GDP in 2011. However, there was a deterioration in government dis-savings during the year. The continued growth of private remittances from abroad raised the overall national savings rate to 24 per cent of GDP in 2012 from 22 per cent of GDP in 2011. Hence, despite the increase in investment as a percentage of GDP to 30.6 per cent, the savings-investment gap as a percentage of GDP, improved to 6.6 per cent in 2012, from 7.9 per cent in 2011.

External Sector Developments

Overcoming the challenges encountered towards the latter part of 2011, the external sector performed well during 2012 benefiting from the comprehensive policy package implemented by the Central Bank and the government during early 2012. These policy measures mainly aimed at reducing the widening trade deficit in 2011 and early 2012, by curtailing non-essential imports and improving export competitiveness. The imposition of the ceiling on credit growth, and the upward revision to policy interest rates and tariff rates on selected imports helped curtail expenditure on imports during the year. However, due to the sluggish economic recovery in the US and in the euro area, the major markets for Sri Lankan exports, as well as the decline in the price of major export commodities, earnings from exports declined during the year. Nevertheless, in absolute terms, the decline in import expenditure was larger than the decline in export income, resulting in a contraction of the trade deficit. Further, the current account deficit improved as a substantial portion of the trade deficit was cushioned by increased inflows on account of trade in services and private current transfers. Long term inflows to the financial account, including the proceeds from the fifth international sovereign bond, FDI inflows, and other inflows to the banks and private sector, helped strengthen the BOP to record a surplus of US dollars 151 million by end 2012.

Earnings from exports contracted by 7.4 per cent in 2012. Industrial exports declined by 7.8 per cent mainly due to the reduction in textiles and garments,

which has the largest share (around 40 per cent) in total export earnings, by 4.8 per cent. The sharp decline in international cotton prices from the peak levels recorded in March 2011 also resulted in a drop in the average unit price of garments. Garment exports to EU, which constituted approximately 50 per cent of total garment exports, declined by 9.2 per cent in 2012, while garment exports to the US, Sri Lanka's second largest market for garments, also declined by 4 per cent in 2012. Earnings from agricultural exports declined by 7.8 per cent in 2012. Earnings from tea, which accounts for about 15 per cent of total earnings from merchandise exports, declined mainly due to geo-political tensions that continued to hamper demand from some Middle Eastern countries.

Expenditure on imports in 2012 declined by 5.4 per cent, year-on-year, while that on non-fuel imports, declined at a faster pace of 8.6 per cent. As a consequence of the higher import tariff imposed on vehicle imports and the depreciation of the rupee, expenditure on imports of motor vehicles declined by 43.8 per cent to US dollars 495 million in 2012, in contrast to the sharp increase recorded in 2011. This largely contributed to lowering expenditure on the importation of consumer goods in 2012. Expenditure on intermediate goods imports declined in 2012, mainly as a result of lower expenditure on the importation of gold. However, the expenditure on petroleum products increased due to higher dependence on thermal power generation. Also, the continuing US sanctions against Iran curtailed Sri Lanka's import of crude oil for its refineries, resulting in higher imports of refined petroleum products at a relatively high cost partly contributing to the increased expenditure on petroleum products during the year. Investment goods imports increased with continued development activities in the country in 2012. In absolute terms the decline in import expenditure was much higher than the decline in export earnings, reflecting the effectiveness of concerted policy measures adopted to reduce import expenditure. As a result, the trade deficit declined from 16.4 per cent of GDP in 2011 to 15.8 per cent of GDP in 2012.

The services account recorded a significant improvement in 2012 mainly due to increased earnings from transportation, information technology services, travel and tourism. Remittances by migrant workers increased by 16.3 per cent to US dollars 6 billion during the year, continuing to be the largest single source of foreign exchange inflows to Sri Lanka. The improvement in the trade balance and increased inflows from trade in services and current transfers helped restrain the current account deficit of the BOP. Accordingly, the current account deficit was contained at US dollars 3.9 billion (6.6 per cent of GDP) in 2012 from US dollars

4.6 billion (7.8 per cent of GDP) in 2011. In the capital and financial account, inflows to the private sector as well as to the government were substantial in 2012. The narrowing of the external current account deficit and increased inflows into the capital and financial account resulted in a surplus in the BOP, amounting to US dollars 151 million in 2012, thereby boosting external reserves of the country.

The receipt of the last two tranches under the IMF Stand-by-Arrangement (IMF-SBA) obtained in 2009 and proceeds of the fifth international sovereign bond led to a sizeable increase in gross official reserves to a comfortable level in 2012, thereby improving the resilience of the economy to external shocks. Gross official reserves (excluding ACU balances) increased to US dollars 6.9 billion by end 2012 from US dollars 6.0 billion in 2011. Meanwhile, total international reserves of the country increased to US dollars 8.4 billion from US dollars 7.2 billion in 2011.

The increase in official reserves reduced the country's vulnerability to external shocks as reflected in the measures of reserve adequacy. The import coverage of gross official reserves (excluding ACU balances) was 4.3 months in 2012, compared to the internationally accepted norm of 3 months of imports. Reserve adequacy, as measured by the ratio of gross official reserves to short term external debt (with remaining maturity of one year or less) improved to 63 per cent by end 2012.

Fiscal Sector Developments

The fiscal policy strategy in 2012 focused on strengthening the fiscal consolidation process while maintaining a high level of investment to facilitate sustained economic growth. Accordingly, the budget deficit for 2012 was targeted at 6.2 per cent of GDP with revenue (including grants) and expenditure and net lending as a percentage of GDP, set at 15 per cent and 21.2 per cent, respectively. However, budgetary operations during the year became challenging in an environment of high interest rates, rising debt service payments due to exchange rate movements, reduced imports, and moderate economic growth. Nevertheless, the government succeeded in reducing the budget deficit to 6.4 per cent of GDP in 2012 from 6.9 per cent of GDP in 2011, further consolidating the achievements made in the recent past to lower the fiscal deficit. Despite a shortfall in revenue, a tight rein on recurrent expenditure together with the curtailment of non-priority capital expenditure, enabled the government to steer fiscal operations close to the 2012 budget target. Expenditure restraint in both current and capital outlays reduced total expenditure and net lending of the government from 21.4 per cent of GDP in 2011 to

19.7 per cent of GDP in 2012. While public investment, as a percentage of GDP, was maintained at 5.5 per cent, the reduction in recurrent expenditure to 14.4 per cent of GDP in 2012 from 15.4 per cent of GDP in 2011 was an over-performance in terms of the 2012 budget target of 14.8 per cent. Consequently, the primary balance, which excludes interest payments declined to a deficit of 1.1 per cent of GDP in 2012 from a deficit of 1.4 per cent of GDP in 2011. Despite the reduction in current expenditure, the current account deficit, increased to 1.4 per cent of GDP in 2012 from 1.1 per cent of GDP in 2011 due to lower tax revenue mobilisation. Revenue as a percentage of GDP declined to 13 per cent in 2012 from 14.3 per cent in the previous year, reflecting the slowdown in domestic economic activity and the impact of policy measures adopted. In financing the budget deficit, the government relied primarily on foreign sources with foreign financing increasing to 59 per cent of the total financing requirement. Financing from domestic sources was largely through bank borrowings, which accounted for 65 per cent of the domestic financing requirement, exceeding the level of bank financing envisaged in the budget for 2012.

Government revenue as a percentage of GDP declined to 13 per cent from 14.3 per cent in the previous year although revenue increased by 5.7 per cent in nominal terms. The lacklustre performance of government revenue was entirely due to a reduction in tax revenue as a percentage of GDP to 11.1 per cent in 2012 from 12.4 per cent in 2011. Tax revenue was significantly below the original estimate for 2012 owing to a reduction in import related taxes resulting from a decline in imports, especially consumer goods including motor vehicles, and a slowdown in economic activity. Non tax revenue remained at 1.9 per cent of GDP as in the previous year.

Current and capital expenditure of the government declined from 21.4 per cent of GDP in 2011 to 19.7 per cent of GDP in 2012. The decline in expenditure is a reflection of the government's efforts to rationalise recurrent expenditure and curtail non-priority capital expenditure. The reduction in recurrent expenditure was mainly on account of the rationalisation of expenditure in respect of salaries and wages and government purchases of goods and services. Capital expenditure, as a percentage of GDP declined to 5.3 per cent in 2012 from 6 per cent in the previous year, mainly due to resources being channeled to strategically important infrastructure development projects.

The resource gap was financed mainly by foreign sources through higher foreign investments in government securities, the issue of an international sovereign bond and project loans, which accounted for 59 per cent of the total financing requirement.

The balance 41 per cent was financed through domestic sources. With respect to domestic financing, the government relied heavily on the banking sector in 2012. Borrowings from the banking sector in 2012 were significantly higher amounting to Rs. 131.5 billion compared to the budget estimate of Rs. 64 billion, although the share of banking sector borrowings in total domestic financing declined to 65 per cent in 2012 from 81 per cent in the previous year.

The debt to GDP ratio by end 2012 increased to 79.1 per cent, reversing the declining trend observed in the recent past, largely due to exchange rate movements. In nominal terms, the outstanding government debt increased notably by 16.9 per cent to Rs. 6,000 billion at end 2012 from Rs. 5,133 billion at end 2011. The total foreign currency denominated debt stock increased by Rs. 207 billion (2.7 per cent of GDP) during 2012 due to the depreciation of the rupee against major foreign currencies.

Monetary Sector Developments

The Central Bank followed a stringent monetary policy stance during the year to contain the rapid expansion in monetary aggregates and thereby preserve macroeconomic stability but was able to relax its policy stance by December as the policy measures yielded the desired outcomes. Monetary policy was tightened significantly by the policy rates being raised twice and by a ceiling on the growth of rupee credit being imposed in order to stem the high growth in monetary and credit aggregates. Accordingly, the policy interest rates of the Central Bank were increased by 50 basis points in February. A second round of policy tightening was carried out in April, where the Repurchase rate was raised by 25 basis points to 7.75 per cent and the Reverse Repurchase rate was increased by 75 basis points to 9.75 per cent, thus widening the policy interest rate corridor to 200 basis points. At the same time, to effect a more rapid curtailment of credit, the Central Bank imposed a ceiling on the growth of rupee denominated credit by licensed banks in 2012. Accordingly, a Direction was issued under Section 101(1) of the Monetary Law Act (MLA) restricting the growth of credit to 18 per cent while an additional 5 per cent was allowed to banks that brought in funds from abroad to bridge the difference. In view of the asymmetric impact it could have on some banks, alternative limits of Rs. 800 million, or Rs. 1 billion for banks that mobilise funds from abroad, were imposed. As the growth of credit and monetary aggregates decelerated, the Central Bank was able to signal an early exit from the tight policy stance in December 2012 by easing its policy interest rates by 25 basis points and allowing the credit ceiling to expire at the end of the year. Consequently, the tightening cycle

in the year 2012 was one of the shortest experienced by the Sri Lankan economy in recent years.

Excess rupee liquidity in the domestic money market remained in a moderately surplus position until August 2012 compared to the large excess experienced in 2011, but declined to a broadly balanced position thereafter. Excess liquidity was about Rs. 12 billion on average during the first eight months of the year increasing significantly to Rs. 59 billion by end July with the Central Bank purchasing a part of the proceeds from the fifth international sovereign bond issue. However, in view of the need to maintain tight liquidity conditions in the market in line with the prevailing monetary policy stance, the Central Bank took measures to unwind the excess liquidity through term repurchase agreements and the outright sale of Treasury bills from its portfolio, albeit with limited success due to insufficient participation by market players. However, market liquidity declined from end August, ranging between surplus and deficit positions with the reversal of foreign exchange swaps and the continued sale of Treasury bills necessitating injection of liquidity through term reverse repurchase agreements. By the last quarter, the purchase of Treasury bills from the primary market and foreign exchange from the domestic foreign exchange market, particularly in December, improved market liquidity to a balanced position. The Central Bank continued to hold auctions under open market operations (OMO) and offer standing facilities on a daily basis to manage overnight liquidity and guide market interest rates.

The Monetary Programme was prepared according to the expected developments in the macroeconomy and was used to guide monetary operations during the year. Nominal GDP was originally projected to be about 15 per cent, on account of a projected growth in real GDP of 8 per cent and a GDP deflator of 6 per cent. Based on these projections, the targeted growth of broad money and reserve money were set at 15 per cent as the money multiplier was expected to remain broadly stable. Credit extended to the private sector was expected to expand by about 19 per cent, which formed the basis for the subsequent Direction issued by the Central Bank capping the growth of rupee denominated credit. Growth of real GDP was revised downwards on several occasions during the course of the year on account of the tight policies adopted, the protracted global economic recovery and the impact of adverse weather conditions. However, the growth targets for monetary aggregates were maintained unchanged given that growth of nominal GDP remained broadly at the same level.

Market interest rates were allowed to move up to facilitate the desired deceleration in credit and

monetary aggregates in line with the Central Bank's policy direction. The overnight interbank market rates remained around the upper bound of the policy rate corridor during the year until the relaxation of policy from mid-December 2012. Both deposit and lending rates in the market moved up further in 2012, continuing the trend from the last quarter of 2011, reflecting the increased policy interest rates, the ceiling on credit and the tight liquidity conditions in the market. Yield rates across all maturities of Treasury bills in the primary market increased till around mid-year before remaining stable until December 2012. Excess funds from banks were being invested in government securities as the credit ceiling necessitated some banks to pace out their lending to the private sector. The upward movement in market interest rates was also reflected in the secondary market yield curve for government securities, which moved above the level in 2011 by year end.

Financial Sector Developments

The financial sector expanded during the year maintaining its stability in spite of vulnerabilities arising from the fragile conditions in the global financial markets and possible threats from the domestic economy. Several measures were taken early in the year to curb domestic demand and safeguard stability in the economy. The cap on credit growth placed in March 2012 also helped stem the potential adverse impact of continued high credit growth on the stability of the banking industry and thereby, the entire financial sector. The overall soundness of the financial sector improved in terms of capital and liquidity levels. The branch network increased further, promoting access to finance facilitating the efforts to achieve a balanced regional growth. However, compared to the previous year, domestic financial markets remained sluggish due to stringent measures taken by the authorities, although improved investor confidence was evident by the net inflows to the Colombo Stock Exchange. As in previous years, the Central Bank continued to strengthen the supervisory and regulatory environment to promote the safety of the financial system while fostering innovation and modernisation.

The overall soundness of the financial sector improved with institutions retaining adequate capital and liquidity levels while the branch network widened further and the asset base broadened over the year. The banking sector continued to dominate the financial sector landscape with its share of assets increasing in 2012. Growth of assets of the banking sector remained unchanged from 2011 largely due to the cap on credit growth placed in March 2012 but profitability was higher in 2012. The increase in profits helped build up the capital funds of banks. The total capital adequacy

ratio of the banking sector is expected to remain at a level well above the minimum threshold placed by the regulator. The declining trend in non-performing loans (NPL) observed since 2009 slowed in 2012, largely reflecting the high interest rate environment. As at end 2012, the Sri Lanka Deposit Insurance Scheme (SLDIS) comprised 78 member institutions and a fund balance of approximately Rs. 9.7 billion. The non-bank financial institution (NBFI) sector consisting of Licensed Finance Companies (LFCs) and Specialised Leasing Companies (SLCs) expanded its asset base while increasing its branch network with improved soundness of the institutions within the sector. The Central Bank's continued efforts to promote the risk management practices at NBFIs helped improve the overall soundness of these institutions. The Central Bank closely monitored the progress made by distressed finance companies in restructuring their business while continuing efforts to stem the conduct of unauthorised finance businesses. The key performance indicators of Primary Dealers in government securities improved during the year. Despite the subdued performance in the equity market, the unit trust industry recorded significant growth in terms of total assets and net asset value benefiting from portfolio diversification. Insurance companies maintained their soundness with key indicators such as total assets, premium income, investment income and profitability all on an upward trend. The main superannuation funds continued to experience a growth in their asset base and membership, while being able to maintain a healthy return on investments. The funds of the Employees' Provident Fund (EPF), which accounts for about 79 per cent of the superannuation sector assets, reached Rs. 1,144 billion by end 2012.

Conditions in the domestic financial markets remained subdued compared to the previous year largely due to the stabilisation policies adopted by the authorities. Money market liquidity fluctuated from surplus to deficit positions reaching a broadly balanced position, particularly towards the latter part of the year. The interbank call market rate increased during the first half of 2012 responding to tight policy measures adopted including the credit ceiling imposed on banks, and thereafter hovered around the upper bound of the Central Bank's policy interest rate corridor, declining towards the middle of the corridor with the easing of policy interest rates in mid-December. A notable feature during the year was the increased activity in the commercial paper market, which could be attributed to the credit restrictions imposed on bank lending and the resultant high interest rates charged by banks. A similar trend was mirrored by the corporate bond market. Net foreign inflows to the CSE increased significantly in 2012 despite the continuation of a fragile performance. Amongst factors that affected activity at

the stock exchange were the relatively higher yields on fixed income securities, volatility in the exchange rate, tight liquidity conditions in the market and the knock-on effects of uncertainties prevailing in global financial markets. The limits imposed on credit by stock brokers, although relaxed subsequently, also hampered market performance during the early months of the year.

The supervisory and regulatory framework was further strengthened during the year to promote the stability of the financial system and safeguard customers. Several Directions 22 were issued to licensed banks during the course of the year pertaining to standards of business conduct and market practices in foreign exchange transactions, outsourcing of businesses, operations and classifications. Licensed Finance Companies were issued Directions in relation to information systems security and upper limits for interest rates offered on deposits. Similarly, the Specialised Leasing Companies were issued directions on assessment of fitness and propriety of directors and key management personnel and changes to definitions in the compilation of key indicators. In order to strengthen the audit process and to meet the required standards, a panel of external auditors was appointed to conduct external audits of non-bank financial institutions.

Outlook

The deficit in the external current account needs to be narrowed to a sustainable level over the medium term. Improved access to international capital markets and a more flexible exchange rate helped cushion the external sector in 2012. However, policies should focus on narrowing the current account deficit to a more sustainable level by reducing import dependence, improving export competitiveness and diversifying goods and services exports as well as markets. Expenditure on the importation of food and beverages could be significantly reduced through policies being taken to encourage domestic production, particularly in the areas of dairy and sugar production. Further, the importation of oil is expected to decline over the medium term with the shifting to coal power and other

alternative sources of energy. In the area of exports, merchandise trade needs to penetrate into emerging market economies to benefit from the rebalancing of the global economy, while retaining and increasing market share in traditional export destinations. Policies to promote value addition into fast expanding supply chain industries and entrepôt trade are expected to sustain earnings from exports. Further, earnings from trade in services are poised to grow with the 5-hubs namely, the maritime, aviation, knowledge, commercial and energy sectors and tourism emerging as key growth sectors in the economy.

Inflation is expected to moderate in 2013 with the easing of demand driven inflationary pressures and favourable supply side developments. Maintaining price stability is important for investor and consumer confidence as well as to maintain macroeconomic stability. Going forward, monetary policy will be carefully calibrated to balance between maintaining inflation at a low and stable level and stimulating growth towards its full potential. In this respect, the continued fiscal consolidation process and the implementation of appropriate policies to address supply side bottlenecks that increase the volatility of prices are expected to provide the required space for the smooth implementation of monetary policy.

The Sri Lankan economy is expected to continue on a high growth path benefitting from improved infrastructure facilities and favourable macroeconomic fundamentals. Encouraging the private sector to reap the benefits of the government's investments in infrastructure and facilitating them to expand productive capacity would be vital to achieving the envisaged medium term growth targets. Maintaining consistent policies and a conducive business environment will attract higher foreign direct investment (FDI) helping to bridge the gap between the current level of domestic savings and investment required to sustain the projected high growth momentum. Policies to improve productivity and encourage innovation are also needed to move to higher value added economic activities.

4. Monetary Policy Review – April 2013

The Sri Lankan economy grew at a robust rate of 6.4 per cent in 2012 amidst significant challenges, registering a strong average growth rate of 7.5 per cent for the period 2010-2012. This growth was supported by a resilient Agriculture sector, which grew amidst adverse weather conditions, and by sustained Industry sector growth. Although the tourism and finance sub-sectors grew rapidly, the Services sector recorded moderate growth due to low external trade activities in 2012.

As projected, year-on-year (y-o-y) inflation for March 2013, fell significantly, mainly due to the base effect and reflecting a continuing decline of food prices. Headline inflation (y-o-y), which remained at 9.4 per cent on average for 9 months declined to 7.5 per cent, while core inflation (y-o-y) also declined to 6.8 per cent in March from 7.4 per cent in the previous month. Both headline and core inflation have remained at single digit levels for 50 consecutive months. Inflation is expected to remain at these benign levels supported by prudent demand management policies, although the proposed revisions to administered prices are likely to exert some upward pressure on price levels.

The balance of payments (BOP), which turned around in 2012 recording a surplus of US dollars 151 million at end 2012, remains in surplus so far this year and is expected to improve further with increased foreign currency inflows. During the year so far, the Central Bank has absorbed US dollars 560 million on a net basis, raising gross official reserves to US dollars 6.9 billion, which is equivalent to 4.5 months of imports.

The growth of broad money supply (M_{2b}) decelerated to 17 per cent in February 2013, its lowest level in 25 months. Within broad money, credit extended to the private sector increased by

Rs. 18 billion in February, recording a y-o-y growth of 13.3 per cent. Meanwhile, credit obtained by the public sector amounted to Rs. 36.7 billion in February, but with expected adjustments to administratively determined prices and continued fiscal consolidation, the reliance of the public sector on bank financing is expected to decline in the coming months. The resulting availability of funds, together with foreign capital raised by the banking sector in recent months would provide the necessary stimulus to strengthen private sector activity.

Monetary policy measures taken so far indicate that expected results are being realised, providing reasonable stimulus for a higher economic growth. At the same time, further deceleration of demand driven inflation on a sustainable basis would provide space for further easing of monetary policy.

Accordingly, the Monetary Board at its meeting held on 12th April 2013, was of the view that the current monetary policy stance was appropriate and decided to maintain the Repurchase rate and the Reverse Repurchase rate of the Central Bank at their current levels of 7.50 per cent and 9.50 per cent, respectively.

The date for the release of the next regular statement on monetary policy would be announced in due course.

5. Inflation in April 2013

Inflation, as measured by the Colombo Consumers' Price Index (CCPI) (2006/07=100) computed by the Department of Census and Statistics decreased to 6.4 per cent on a year-on-year (YoY) basis in April 2013 from 7.5 per cent in the previous month. The inflation rate on an annual average basis remained unchanged at 8.8 per cent in April 2013 as recorded in the previous month.

Core inflation on a YoY basis also decreased to 6.1 per cent in April 2013 from 6.8 per cent in the previous month while it increased marginally on an annual average basis to 6.5 per cent in April 2013 from 6.4 per cent in March 2013.

The CCPI decreased by 0.5 per cent in April 2013 over the previous month, with the Index declining in absolute terms to 170.0 from 170.8 in March 2013. The contribution to the monthly decrease in the Index came mainly from price decreases in the Food category by 1.4 per cent. The price of rice, most varieties of vegetables, fruits, fresh fish, eggs, big onions, red onions and limes decreased during the month. However, an increase in the prices of some varieties of dried fish, dhal, coconut and prepared food was reported. Within the Non-Food category, prices increased in the sub-categories of Clothing and Footwear (by 0.3 per cent); Housing, Water, Electricity, Gas and Other Fuels (by 0.9 per cent); Furnishing, Household Equipment and Routine Household Maintenance (by 0.1 per cent); Recreation and Culture (by 0.5 per cent); Education (by 0.1 per cent) and Miscellaneous Goods and

Services (by 0.1 per cent). An increase observed in the sub category of Housing, Water, Electricity, Gas and Other Fuels was due to the partial impact of the upward revision in the electricity charges with effect from 20th April 2013. Meanwhile, the prices in the sub-categories of Health; Communication; and Transport were unchanged during the month.

6. Colombo Consumers' Price Index (CCPI)

2011, 2012 and 2013

STATISTICAL APPENDIX

Definitions and Explanatory Notes

The following general notes supplement the footnotes given below the individual tables:—

1. The data cover monthly figures available at the time the Bulletin goes to print, and the latest available information does not relate to the same month, in every table.

To enable comparison, annual figures for recent years are given.

2. In an attempt to bring the material up-to-date provisional figures are included in some tables.
3. Figures in some tables have been rounded off to the nearest final digit. Hence there may be a slight discrepancy between the total as shown and the sum of its components.
4. Differences as compared with previously published figures are due to subsequent revisions.
5. The following symbols have been used throughout:—

n.a. = not available
– = nil
... = negligible

(a) Revised

(b) Provisional

(c) Based on the Industrial Production Survey and classified in accordance with the International Standard Industrial Classification (ISIC) Revision 4. (2010 = 100)

(d) (1) Includes manufacturing and export processing industries. Small industry is defined as those units having supply of electricity at 400/230 volts and contract demand is less than 50 KVA, medium industry as supply of electricity at 400/230 volts and contract demand is equal or more than 50 KVA and large industry as supply of electricity at 11 KV, 33 KV and 132 KV.

(2) Figures include electricity consumption of hotels.

(e) Sales other than to Ceylon Electricity Board.

(f) Excluding Petroleum exports.

Note: The Index numbers are calculated by the Labour Department on fixed weights based on the numbers employed as at 31 December 1978. The wage rate used in the calculation of Index numbers are minimum wages for different trades fixed by the Wages Boards.

Sources : Labour Department
Central Bank of Sri Lanka

- (a) The Index refers to wage rates of tea growing and manufacturing, rubber growing and manufacturing, coconut, cocoa, cardamoms and pepper growing trades only.
- (b) Includes baking, brick and tile manufacturing, coconut manufacturing, printing textile, tyre and tube manufacturing, coir mattresses & bristle fibre export, hosiery manufacturing, engineering, garment manufacturing, match manufacturing, biscuit manufacturing, tea export and rubber export trades only.
- (c) This includes cinema, motor transport and nursing homes trade only.
- (d) Combined Index for workers in Agriculture, Industry & Commerce and Services.
- (e) Provisional.

(a) Daily wages represent payments in cash where meals are not provided by the employer. Annual and quarterly figures are averages of monthly figures.

Source: Central Bank of Sri Lanka

(b) Wages in the construction sector are paid on both daily payment and contractual basis. The series on contractual basis in previous bulletin publications has been replaced by the series on daily payment basis from the monthly bulletin of December 2005 onwards for comparison with wages in other sectors.

(c) Daily wages up to December 2004 are the average of daily wages for the two activities. From January 2005 onwards the daily wages cover both activities under a single category following the restructuring of data collection schedules.

(d) Provisional.

(a) Consists of government expenditure excluding contributions to sinking funds, direct payment of public debt and subscriptions to international financial organisations. Also excludes book adjustments arising from losses on Advance Account operations incurred and financed in the previous financial year. Hence, the figures may not tally with the figures published in the accounts of the Government of Sri Lanka.

Sources : Ministry of Finance and Planning
Central Bank of Sri Lanka

(b) Excludes foreign investments in Treasury bills.

(c) Excludes foreign investments in Treasury bonds.

(d) Net foreign investments in Treasury bills and Treasury bonds are included.

(e) Provisional

(a) Computed from weekly averages.

(b) Footnote (d) of Table 14 in the Annual Report 2011 gives the conversion formula used for the conversion of the volume of the three main types of coconut exports to their nut equivalent (from kgs).

(c) This refers to prices of the best quality copra.

(a) Trade Indices were revised with a wide coverage and 2010 as the base year and calculated in terms of rupees. In order to accommodate the variability arising from a monthly frequency, in computing the monthly trade indices, the first volume index is computed as Laspeyres index and then the unit value index is derived as the ratio between the value index and the volume index. This methodology avoids the subjective imputation of prices that would be required in deriving a price index first when certain items are not exported or imported in a particular month.

(a) Trade Indices were revised with a wide coverage and 2010 as the base year. In order to accommodate the variability arising from a monthly frequency, in computing the monthly trade indices, the first volume index is computed as Laspeyres index and then the unit value index is derived as the ratio between the value index and the volume index. This methodology avoids the subjective imputation of prices that would be required in deriving a price index first when certain items are not exported or imported in a particular month.

(a) Trade Indices were revised with a wide coverage and 2010 as the base year and calculated in terms of rupees. In order to accommodate the variability arising from a monthly frequency, in computing the monthly trade indices, the first volume index is computed as Laspeyres index and then the unit value index is derived as the ratio between the value index and the volume index. This methodology avoids the subjective imputation of prices that would be required in deriving a price index first when certain items are not exported or imported in a particular month.

- (a) The above presentation conforms as far as possible to international practice as followed by the International Monetary Fund (IMF), in the Balance of Payments Manual, 5th edition (1993). In addition, beginning 1994, Offshore Banking Units have been treated as a part of the domestic banking system.
- (b) Provisional
- (c) Exports are recorded on f.o.b. valuation; imports on c.i.f. valuation.
- (d) Includes port and airport related services.
- (e) Passage collections by foreign shipping agents and airlines are included in 'passenger fares'.
- (f) Indicates outright grants received in the form of programme, food and commodity aid, cash and technical assistance.
- (g) Indicates outright grants received in the form of project aid.
- (h) Credit entries refer mainly to an increase in liabilities resulting from imports under trade credits. The debit entries in respect of such imports are in the merchandise account and are recorded on an accrual basis. Debit entries refer to a decline in such liabilities and are recorded at the time of settlement of payment for such imports.
- (i) Includes US\$ 973 million of long-term borrowings by commercial banks in 2012.
- (j) The change in capital of the monetary sector is based on local records.
- (k) The figures shown in the credit column relate to the increase in liabilities to the IMF arising from drawings from the IMF and the receipts under the Stand-by Arrangement facility in 2009. US dollar and Sri Lanka rupee values reflect changes in the representative rate of the Special Drawing Rights (SDRs). Figures in the debit column are in respect of repurchases or repayments, made in instalments to the IMF, in respect of earlier drawings.

(a) Special Drawing Rights (SDRs), the unit of account of the International Monetary Fund.

Source: Central Bank of Sri Lanka

(b) The NEER is the weighted average of nominal exchange rates of the 24 trading partner and competitor countries. Weights are based on the trade shares reflecting the relative importance of each currency in the currency basket.

(c) The REER is computed by adjusting the NEER for inflation differentials with the countries whose currencies are included in the basket.

(a) Annualised Forward Premium (f^d) is computed using the following formula.

$$f^d = \{ [F_t^T - S_t] / S_t \} * 100 * (12/T)$$

Where F_t^T is the forward rate for period t that exists in period t ($T = 1, 3$) and S_t is the interbank spot rate at period t .

(b) Provisional.

(a) Currency held by the Treasury and the District Secretariats.

(b) Total amounts of currency, including subsidiary notes and coins issued by the Central Bank.

(c) Demand deposits of the government held with commercial banks and the Central Bank.

(d) Inter bank deposits both local and foreign including deposits of international organizations and commercial banks with the Central Bank.

(e) Total demand deposits held by the Central Bank and commercial banks.

 (f) M₂ equals currency held by the public plus rupee denominated demand, savings and time deposits held by the public.

(a) The number of reporting banks were 23 until January 2006, 22 from October 2008, 23 from August 2011 and 24 from December 2011.

(b) Fixed and other assets consists of banks' property, furniture, fittings and sundries (commission, interest receivables etc.)

(c) Liquid assets consist of Cash on hand, Balances due from Central Bank, Foreign currency on hand and Balances due from banks abroad, Government of Sri Lanka Treasury bills and bills discounted. Balances due from domestic banks and cash items in process of collection have been excluded from liquid assets and domestic inter-bank deposits have been excluded from demand deposits, because from the view point of the commercial banking system as a whole such claims and deposits cancel out.

(a) M_{2b} is based on the aggregated data pertaining to both Domestic Banking Units (DBUs) and Offshore Banking Units (OBUs) of Licensed Commercial Banks operating in Sri Lanka. Definitional changes have been adopted in aggregating DBUs and OBUs to avoid double counting and misclassification of assets and liabilities.

(Contd.)

The major changes are:

- (1) All DBU placements in OBUs are recorded as domestic assets, while all DBU borrowings from OBUs are recorded as domestic liabilities.
- (2) Foreign currency deposits with DBUs are classified on the basis of ownership rather than on the basis of currency. Hence, the following apply:
 - (i) One half (50 per cent) of Non-Resident Foreign Currency (NRFC) deposits are treated as domestic deposit liabilities;
 - (ii) All Resident Non-National Foreign Currency (RNFC) balances are treated as foreign liabilities;
 - (iii) All other domestic foreign currency accounts are treated as domestic deposit liabilities.

(b) External assets (net) of the Central Bank and commercial banks (including outward bills)

(c) Currency and demand deposits of the public

(d) Time and savings deposits of the public held with commercial banks

(Contd.)

(a) M₄ is based on the aggregated data pertaining to Licenced Specialised Banks (LSBs) and Licenced Finance Companies (LFCs), in addition to the institutions covered in M_{2b}.

(b) Currency, demand deposits and quasi money of DBUs in this table differ from those in Table 56 due to the fact that LSBs and LFCs are not treated as 'Public' under the Financial Survey (M₄) definition.

(c) Time and savings deposits of the private sector with commercial banks, LSBs and LFCs.

(d) LSBs include Regional Development Banks/Pradeshya Sanwardhana Bank (which was established on 14 July 2010 by amalgamating Regional Development Banks, DFCC Bank, National Savings Bank, State Mortgage and Investment Bank, MBSL Savings Bank Ltd., SANASA Development Bank Ltd., HDFC Bank of Sri Lanka, Sri Lanka Savings Bank Ltd. and Lankaputhra Development Bank Ltd.

(e) Credit extended by the Central Bank, LCBs, LSBs and LFCs to the Government, net of Government deposits and Government cash balances.

Source: Central Bank of Sri Lanka

(f) The sharp increase in credit to private sector by LFCs in some months could be attributed to already established Specialised Leasing Companies (SLCs) obtaining LFC licenses.

Source: Central Bank of Sri Lanka

(a) Under Sections 10c, 93, 94, 96 and 97 of the amended Monetary Law Act (Chapter 422), commercial banks and other financial institutions are required to maintain reserves against their deposit liabilities as prescribed by the Monetary Board. Currently, only commercial banks are subject to reserve requirements. With effect from 24 January 1992, an amount of till cash over and above two per centum of the total deposit liabilities, but not exceeding four per centum, could be maintained as a part of required reserves in the form of Sri Lanka currency notes and coins. Details of required reserve ratios, which were applicable in the past and computational methods have been published in the Appendix table on the 'Reserve Position of Commercial Banks' in the Annual Reports prior to 2003.

(b) Reserve data are for the last reserve week of each month. The required reserves recorded in the table refer to the cumulative reserves for the week, while commercial bank's deposits with the Central Bank are the cumulative deposits for that particular reserve week. Excess/Deficit on SRR is the difference between the cumulative SRR for the reserve week and cumulative deposits of the commercial banks' for the week.

(c) Excludes interbank deposits.

(d) With effect from 03 April 2003, the basis of computing the Statutory Reserve Requirement (SRR) was changed from deposit liabilities and till cash balances at the close of business on Wednesday of the previous reserve week, to the average of deposit liabilities and till cash balances during the week ending Tuesday of the previous reserve week.

(e) SRR was increased from 7.00 per cent to 8.00 per cent with effect from 29 April 2011.

- (a) Pursuant to Section 51 of the Monetary Law Act, the Central Bank's holdings of notes and coins are not considered as part of its currency issue.
- (b) Currency notes in the denomination of Rs. 20 were issued from 4 August 1980, Rs. 1,000 from 23 December 1981, Rs. 500 from 9 February 1982, Rs. 200 from 4 February 1998, Rs. 2,000 from 17 October 2006 and Rs. 5,000 from 4 February 2011.
- (c) Currency notes of Rs. 5, Rs. 2 and Re. 1 are also included. The value of these notes remained unchanged at Rs. 37.2 million, Rs. 26.7 million and Rs. 5.0 million, respectively as at end March 2013.
- (d) This includes commemorative coins issued upto 31 March 2013. As at end March 2013, the values of Rs. 100 coins, Rs. 500 coins, Rs. 1,000 coins and Rs. 5,000 coins stand at Rs. 4.4 million, Rs. 21.8 million, Rs. 253.9 million and Rs. 39.4 million respectively. The total value of other commemorative coins, as at end March 2013, stands at Rs. 253.9 million.

Source: Central Bank of Sri Lanka

(a) All interest rates are as at the end of period, unless otherwise stated.

(b) The rate at which the Central Bank grants advances to banking institutions as the lender of last resort.

(c) Average Weighted Deposit Rate (AWDR) is calculated by Central Bank monthly, based on the weighted average of all outstanding interest bearing deposits of commercial banks and the corresponding interest rates.

(d) The Average Weighted Prime Lending Rate (AWPR) is calculated by the Central Bank weekly, based on commercial bank's lending to their prime customers during the week. The monthly figures are average values of estimated weekly rates.

(e) The Sri Lanka Inter-Bank Offered Rate (SLIBOR) is computed daily by the Central Bank, based on rates offered by commercial banks in the inter-bank market. The rate shown is the average of such offered rates by selected commercial banks.

(a) Secondary market information is based on data provided by Primary Dealers in Government Securities.

Sources: Central Bank of Sri Lanka

(b) The yield rates on Rupee Securities are administratively determined. The given rates include taxes.

Primary Dealers in Government Securities

(c) Trading volumes reported are cumulative for the period.

(d) Yield rates are averages of bid and offer rates

(e) Unlike Treasury bills, Treasury bonds are not issued on a regular basis. Hence a continuous series of primary market yield rates does not exist.

Standing instructions	Rs. 750	Rs. 50
Monthly service charges	Rs. 2,500	Rs. 25
Loans		
Application processing fees	Rs. 100,000	Rs. 100
Inspection charges	Rs. 50,000	Rs. 100
ATM and Credit Cards		
ATM cards – Issuing fee	Rs. 500	Rs. 100
Credit cards – Issuing fee	Rs. 5,000	Rs. 200
Renewal fee	Rs. 10,000	Rs. 180

Notes :

- (1) Commercial banks charge a variety of fees and commissions on their services. The table gives a range of the maximum and minimum fees and commissions which are based on the information provided by commercial banks. These charges, which do not change very frequently are published semi-annually to enable the public to negotiate best terms. These fees and commissions could be different when services and products are provided as a package.
- (2) These are standard charges of commercial banks. However, charges for some specific products could include charges payable to banks abroad. For example, banks in Sri Lanka may include in their charges fees payable to banks abroad such as for adding confirmation to Letters of Credit, and for correction of discrepancies.
- (3) In the case of Documentary Credits, the charges for transmission outward from Sri Lanka would differ depending on the mode of transmission used.
- (4) Loan application processing fees vary according to the loan amount.

(a) End period.

(b) The Milanka Price Index (MPI) was introduced in January 1999 to replace the Sensitive Price Index. The MPI was replaced by S&P Sri Lanka 20 Index (S&P SL20) with effect from 1st January 2013.

(c) The S&P SL20 was introduced in June 2012.
