**1. Inflation in January 2011**

*Inflation, as measured by the Colombo Consumers' Price Index (CCPI) (2002=100), computed by the Department of Census and Statistics, decreased to 6.8 per cent in January 2011, on a year-on-year basis, from 6.9 per cent in December 2010, mainly due to the base effect. Meanwhile, the annual average inflation increased to 6.0 per cent in January from 5.9 per cent in the previous month, as a result of the price developments in the preceding twelve month period.*

The core inflation, which measures the price movement of non-food and non-energy items of the CCPI basket, decreased to 3.6 per cent on a year-on-year basis and 6.0 per cent on an annual average basis in January 2011 from that of 5.6 per cent and 6.3 per cent respectively, in December 2010.

The contribution to the monthly increase of 1.3 per cent in the Index came mainly from price increases in the sub category of Food and non-alcoholic beverages (2.1 per cent). Within the Food sub category price increases were registered for vegetables, fruits, coconut, coconut oil, red onions and fish and sea food, primarily led by the supply shortages resulted from heavy rains.

However, prices of rice, eggs, chicken, big onions and sugar declined. Further, price increases were recorded in the sub categories of Clothing and footwear (2.1 per cent); Education (1.6 per cent); Health (0.3 per cent); Furnishing, household equipment and routine household maintenance (0.1 per cent); and Miscellaneous goods and services (0.9 per cent). A marginal increase was also observed in the sub category of Housing, water, electricity, gas and other fuels due to upward revision in the price of gas. Meanwhile prices in the sub categories of Recreation and culture; Transport; and Communication remained unchanged during the month.

### 3. IMF Releases the Sixth Tranche of US dollars 216.6 million under the SBA Facility

*The fifth review of the Sri Lanka Stand-by Arrangement (SBA) has been successfully completed by the International Monetary Fund (IMF) and the sixth tranche to the value of SDR 137.8 million (approximately US dollars 216.6 million) has been disbursed by the IMF on 03 February 2011.*

With this disbursement, a total of US dollars 1.5 billion has been received thus far by Sri Lanka on account of the SBA facility that was approved in July 2009. These disbursements as well as other inflows on account of workers' remittances, inflows to the government to finance various infrastructure development projects and inflows to the private sector have helped raise the country's foreign reserves to a

very comfortable level. Consequently, the gross official reserves (without ACU receipts) now stand at US dollars 6.8 billion, which is equivalent to 6.2 months of imports.

The Letter of Intent (LOI) and the Technical Memorandum of Understanding (TMU) of SBA are now available in the web site of the Central Bank of Sri Lanka ([www.cbsl.gov.lk](http://www.cbsl.gov.lk)).

### 4. Monetary Policy Review – February 2011

*Inflation, as measured by the change in the Colombo Consumers' Price Index (Base=2002), has remained broadly stable in January 2011. Year-on-year inflation was 6.8 per cent in January compared to 6.9 per cent in the previous month, while annual average inflation reached 6 per cent in January from 5.9 per cent in the previous month. As in the previous months, the marginal increase in the index was largely driven by the food and non-alcoholic beverages category.*

The increase in the price of food items during the month could be attributed to the adverse weather conditions. While the paddy output is expected to be affected due to recent floods, the availability of stocked-up paddy and the possibility of the increase in the extent of cultivation during the yala season are likely to ease any price pressures in 2011. The recent price surges in other food crops are expected to subside as the situation normalises in the coming months. The global economy is set to recover faster in 2011 than previously expected. While the recovery is likely to improve earnings from exports further, the impact of the global recovery on the

demand for key commodities could have an impact on prices. Appropriate measures will continue to be taken to contain the effect of any such developments. Certain recently implemented fiscal measures, such as the duty waiver granted for customs import duty on petrol and the reduction in taxes on importation of milk powder, would reduce the upward price pressures arising from adverse international commodity prices. Overall, the expected improvements in the fiscal sector are likely to ease pressure on domestic prices in the medium term. Sri Lanka's official reserves strengthened further as the International Monetary Fund last week completed

its review of the country's economic performance approving immediate disbursement of the sixth tranche under the ongoing Stand-by Arrangement. Accordingly, total disbursements under the arrangement so far amount to SDR 964.6 million (approximately US dollars 1.516 billion). Provisional data up to end 2010 indicates that year-on-year growth in broad money is in line with expected money growth. The high growth momentum in credit to private sector continues and the Central Bank will continue to monitor these developments closely. While short term interest rates have responded positively to the reduction of policy interest rates in January 2011,

which was aimed at further encouraging substantial and sustained private sector participation in economic activity, lending rates of many banks are yet to adjust fully. Taking into consideration the above developments, the Monetary Board, at its meeting held on 07 February 2011, decided that the current monetary policy stance is appropriate. Accordingly, the policy interest rates of the Central Bank will be maintained at their current levels, i.e., the Repurchase rate at 7.00 per cent and the Reverse Repurchase rate at 8.50 per cent. The release of the next regular statement on monetary policy will be on 08 March 2011.

(a) A series with a wide coverage and 1997 as the base year. In order to accommodate the variability arising from a monthly frequency, in computing the monthly trade indices, first the volume index is computed as a Laspeyres index and then the unit value index is derived as the ratio between the value index and the volume index. This methodology avoids the subjective imputation of prices that would be required in deriving a price index first when certain items are not exported or imported in a particular month.

(a) A series with a wide coverage and 1997 as the base year. In order to accommodate the variability arising from a monthly frequency, in computing the monthly trade indices, first the volume index is computed as a Laspeyres index and then the unit value index is derived as the ratio between the value index and the volume index.

(a) A series with a wide coverage and 1997 as the base year. In order to accommodate the variability arising from a monthly frequency, in computing the monthly trade indices, first the volume index is computed as a Laspeyres index and then the unit value index is derived as the ratio between the value index and the volume index. This methodology avoids the subjective imputation of prices that would be required in deriving a price index first when certain items are not exported or imported in a particular month.

- (a) The above presentation conforms as far as possible to international practice as followed by the International Monetary Fund (IMF), in the Balance of Payments Manual, 5th edition (1993). In addition, beginning 1994, Offshore Banking Units have been treated as a part of the domestic banking system.
- (b) Provisional
- (c) Exports are recorded on f.o.b. valuation; imports on c.i.f. valuation.
- (d) Includes port related services.
- (e) Passage collections by foreign shipping agents and airlines are included in passenger fares.
- (f) Indicates outright grants received in the form of programme, food and commodity aid, cash and technical assistance.
- (g) Indicates outright grants received in the form of project aid.
- (h) Credit entries refer mainly to an increase in liabilities resulting from imports under trade credits. The debit entries in respect of such imports are in the merchandise account and are recorded on an arrivals basis. Debit entries refer to a decline in such liabilities and are recorded at the time of settlement of payment for such imports.
- (i) The change in capital of the monetary sector is based on local records.
- (j) The figures shown in the credit column relate to the increase in liabilities to the IMF arising from drawings from the IMF and the receipts under the Stand-by Arrangement facility in 2009. US dollar and Sri Lanka Rupee values reflect changes in the representative rate of the Special Drawing Rights (SDRs). Figures in the debit column are in respect of repurchases or repayments, made in installments to the IMF, in respect of earlier drawings. Subscriptions to the IMF, consequent to successive increases in Sri Lanka's quota, are also shown in the debit column.
- (k) General and special allocations of SDRs by the IMF.

(b) The NEER is the weighted average of nominal exchange rates of the 24 trading partner and competitor countries. Weights are based on the trade shares reflecting the relative importance of each currency in the currency basket.

(c) The REER is computed by adjusting the NEER for inflation differentials with the countries whose currencies are included in the basket.

(d) REER computation is based on CCPI.

(e) The REER Indices for 2010 and 2011 are provisional.

(a) Annualised Forward Premium ( $f^d$ ) is computed using the following formula.

Source: Central Bank of Sri Lanka

$$f^d = \{ [F_t^{t+1} - S_t] / S_t \} * 100 * (12/t)$$

Where  $F_t^{t+1}$  is the forward rate for period  $t+1$  that exists in period  $t$  and  $S_t$  is the interbank spot rate at period  $t$ .

(a) This monetary survey is based on the aggregated data pertaining to both Domestic Banking Units (DBUs) and Offshore Banking Units (OBUs) of banks operating in Sri Lanka. Definitional changes have been adopted in aggregating DBUs and OBUs data to avoid double counting and misclassification of assets and liabilities.

(Contd.)

The major changes are:

- (1) All DBU placements in OBUs are recorded as domestic assets, while all DBU borrowings from OBUs are recorded as domestic liabilities.
- (2) Foreign currency deposits of DBUs are classified on the basis of ownership rather than on the basis of currency. Hence, the following apply :
  - (i) One half (50 per cent) of NRFC deposits are treated as domestic deposit liabilities;
  - (ii) All RNNFC balances are treated as foreign liabilities;
  - (iii) All other domestic foreign currency accounts are treated as domestic deposit liabilities.

(b) Includes assets / liabilities of National Development Bank which merged with NDB Bank Ltd., with effect from August 2005.

(c) External assets (net) of the Central Bank and commercial banks (including outward bills).

(d) Currency and demand deposits of the public.

(e) Time and savings deposits of the public held with commercial banks.

- (a) This financial survey is based on the aggregated data pertaining to Domestic Banking Units (DBUs) and Offshore Banking Units (OBUs) of commercial banks, Licensed Specialised Banks (LSBs) and Registered Finance Companies (RFCs) operating in Sri Lanka. Definitional changes have been adopted in aggregating data pertaining to DBUs, OBUs, LSBs and RFCs to avoid double counting and misclassification of assets and liabilities. The major changes are:  
 (1) All DBU borrowings in OBUs are recorded as domestic assets, while all DBU borrowings from OBUs are recorded as domestic liabilities.  
 (2) Foreign currency deposits of DBUs are classified on the basis of ownership rather than on the basis of currency. Hence, the following apply:  
 (i) One half (50 per cent) of Non-Resident Foreign Currency (NRFC) deposits are treated as domestic deposit liabilities;  
 (ii) All Resident Non-National Foreign Currency (RNNFC) balances are treated as foreign liabilities;  
 (iii) All other domestic foreign currency accounts are treated as domestic liabilities.
- (b) Currency, demand deposits and quasi money in DBUs in this table differ from those in table 52 due to the fact that LSBs and RFCs are not treated as 'public' under this broad monetary survey (M<sub>4</sub>) definition.
- (c) Time and savings deposits of the private sector with commercial banks, LSBs and RFCs.

- (d) External assets of commercial banks include outward bills.
- (e) Credit extended by the Central Bank, DBUs, OBUs, LSBs and RFCs to the Government, net of Government deposits with banks and Government cash deposits.

(a) Under Sections 10c, 93, 94, 96 and 97 of the amended Monetary Law Act (Chapter 422), commercial banks and other financial institutions are required to maintain reserves against their deposit liabilities as prescribed by the Monetary Board. Currently, only commercial banks are subject to reserve requirements. With effect from 24 January 1992, an amount of till cash over and above two per centum of the total deposit liabilities, but not exceeding four per centum, could be maintained as a part of required reserves in the form of Sri Lanka currency notes and coins. Details of required reserve ratios, which were applicable in the past and computational methods have been published in the Appendix table on the 'Reserve Position of Commercial Banks' in the Annual Reports prior to 2003.

(b) Reserve data are for the last reserve week of each month. The required reserves recorded in the table refer to the cumulative reserves for the week, while commercial bank deposits with the Central Bank are the cumulative deposits for that particular reserve week. Excess/Deficit on SRR is the difference between the cumulative SRR for the reserve week and cumulative deposits of the commercial banks for the week.

(c) Excludes interbank deposits.

(d) With effect from 03 April 2003, the basis of computing the Statutory Reserve Requirement (SRR) was changed from deposit liabilities and vault cash balances at the close of business on Wednesday of the previous reserve week, to the average of deposit liabilities and vault cash balances during the week ending Tuesday of the previous reserve week.

## Notes :

- (1) Commercial banks charge a variety of fees and commissions on their services. The table gives a range of the maximum and minimum fees and commissions which are based on the information provided by commercial banks. These charges, which do not change very frequently are published semi-annually to enable the public to negotiate best terms. These fees and commissions could be different when services and products are provided as a package.
- (2) These are standard charges of commercial banks. However, charges for some specific products could include charges payable to banks abroad. For example, banks in Sri Lanka may include in their charges fees payable to banks abroad such as for adding confirmation to Letters of Credit, and for correction of discrepancies.
- (3) In the case of Documentary Credits, the charges for outward transmission from Sri Lanka would differ, on the mode of transmission used.
- (4) Loan application processing fees vary according to the loan amount.
