Part I
EVENTS OF THE MONTH
July 2009

Fiscal Sector

- Nation Building Levy on manufacturing of rice from locally produced paddy was reduced from 3 per cent to 1.5 per cent.
- Excise duty on Liquefied Petroleum Gas (LP Gas) was increased from 5 per cent or Rs 26.50 per kg to 5 per cent or Rs.31.50 per kg, whichever is higher.
- Cess on malt extract based preparations used in the making of beverages was reduced from 5 per cent or Rs. 110 per kg to 5 per cent or Rs. 25 per kg, which ever is higher.
- Total tax on milk powder including customs import duty and other applicable levies was increased from Rs. 125 per kg to Rs. 145 per kg.

Other

- Diesel, petrol and kerosene prices were increase by Rs. 3, Rs. 10 and Rs. 1, respectively.
- Value of a 12.5 kg Cylinder of Shell LP gas was reduced by Rs. 53 while value of 12.5 kg Cylinder of Laughs LP gas was increased by Rs. 100.

Loans from the Hungarian Export-Import Bank

Three agreements were signed between the Government of Sri Lanka and the Hungarian Export-Import Bank on 14 July and 17 July 2009 as follows.

1. Loan for Euro 15.845 million (approximately Rs.2,543 million) - signed on 14 July 2009.

The proceeds of the loan will be used to finance supplying of one dredge and related equipment for excavation and cleaning of fit for Tsunami effected areas.

2. Loan for Euro 17.384 million (approximately Rs.2,818 million) - signed on 17 July 2009.

The loan proceeds will be utilized to finance the Rehabilitation of Kalatuwawa Water Treatment Plant Project.

3. Loan for Euro 16.714 million (approximately Rs.2,709 million) - signed on 17 July 2009.

The loan proceeds will be utilized to finance the Rehabilitation of Labugama Water Treatment Plant Project.

These loans are repayable in 15 years including a grace period of 3 years and each loan carries an interest rate of 1.82 per cent per annum.

Grant from the International Bank for Reconstruction and Development (IBRD)

An agreement was signed between the Government of Sri Lanka and the International Bank for Reconstruction and Development (IBRD) on 10 July 2009, for a grant of US dollar 0.45 million (approximately Rs.51.7 million) to finance the improving monitoring and evaluation of Samurdhi safety net program. The objective of the program is to finance the development and adoption of a comprehensive Management Information System (MIS) for the Samurdhi Food Stamp and Cash Transfer Program (FSCTP).

Part II

PRESS RELEASES

July 2009

1. Inflation drops to its lowest level in more than five years

The rate of inflation as measured by the point-to-point change in the Colombo Consumers' Price Index (CCPI) (2002=100), computed by the Department of Census and Statistics, dropped sharply to a five year low of 0.9 per cent in June, 2009. The annual average inflation rate also continued to decelerate since November, 2008 to reach 12.5 per cent in June, 2009 compared to 14.7 per cent in the previous month.

The CCPI increased by 1.3 per cent in June, 2009 over May, 2009. The contribution to the monthly increase in the Index arose mainly from sub category of Food and non-alcoholic beverages (2.5 per cent). Sub categories of Clothing, Housing, water, electricity, gas and other fuels, Furnishing, household equipment and routine household maintenance, and Miscellaneous goods and services were also recorded slight increases.

The Core inflation, on a point-to-point basis witnessed a sharp decline from 13.5 per cent in May, 2009 to 7.7 per cent in June, 2009. However, the monthly core index remained unchanged resulting in a marginal decrease in the annual average rate from 15.8 per cent to 15.2 per cent between the two months.

The containment of the inflation was mainly due to the lag effect of tight monetary policy stance pursued by the Central Bank and easing of commodity prices in the international market. However, it may move gradually upwards during the remainder of the year, while remaining at single digit levels throughout the period. Further, the annual average inflation rate will continue to decelerate reaching low single digit levels by the year end.

The prevalence of low inflation will be conducive to the growth prospects of the economy. Due to adverse developments that were in place during the last two quarters, it was estimated that the economy would

grow around 2.5 per cent in 2009 under a pessimistic scenario. However, the economic prospects have been improved significantly due to recent domestic and global developments. The end of the internal conflict of the country will pave way to open up the Northern and Eastern Provinces for economic activities and the expectations of the global recovery towards the latter part of the year will provide further growth impetus to the economy which is, at present, projected to grow at a range of 3.5 to 4.5 per cent.

2. External Sector Performance – May 2009

The trade deficit contracted for the fifth consecutive month in May 2009 by 64.0 per cent to US dollars 175 million. The cumulative trade deficit decreased by 61.9 per cent to US dollars 982 million during the first five months of 2009 from US dollars 2,577 million in the corresponding period of 2008. Private remittances increased by 2.9 per cent to US dollars 1,308.6 million during the first five months of 2009, from US dollars 1,272 million in the corresponding period of 2008. As a result, remittances during the first five months were US dollars 327 million (about 33 per cent) in excess of the trade deficit.

Export earnings dropped by 27.8 per cent in May 2009, to US dollars 538 million, reflecting year-on-year reductions in industrial and mineral exports. However, agricultural exports, which accounted for 26 per cent of total exports, grew by 2.5 per cent during May 2009, mainly due to the increase in exports of traditional crops. The exports of tea, rubber and coconut increased by 3.9 per cent, 24.8 per cent and 47.9 per cent respectively. Tea prices continued to fetch premium prices in the international market. At an average export price of US dollars 3.93 per kilo, it was almost on par with the levels maintained during this part of the year in 2008. Rubber and coconut prices, however, declined by 44.4 per cent and 39.0 per cent, respectively. Among the industrial exports, the earnings from the textiles and garments declined by 22.7 per cent for the second consecutive month in May 2009, due to the lag effect of the global recession. Textiles and garments exports to the European Union and the United States decreased by 17.9 per cent and 29.4 per cent respectively, due to lower demand emanating from these countries. The cumulative earnings from exports declined by 18.9 per cent to US dollars 2,623 million.

Expenditure on imports declined by 42.1 per cent to US dollars 713 million in May 2009, reflecting reductions in all three major categories of imports. Imports of consumer goods declined by 41.2 per cent to US dollars 140 million, largely on account of lower commodity prices. While expenditure on sugar increased on account of higher prices amidst the global supply constraint, expenditure on other commodities, such as rice, wheat and dairy products declined in May 2009. Expenditure on non-food consumer goods declined by 36.8 per cent, led by motor vehicles. Imports of intermediate goods declined by 42.6 per cent in May 2009, mainly due to the lower expenditure incurred on petroleum imports. Imports of investment goods also declined by 43.8 per cent, mainly due to the lower expenditure incurred on imports of building materials and machinery and equipment. The cumulative expenditure on imports declined by 38.0 per cent to US dollars 3,605 million.

The gross official reserves, with and without Asian Clearing Union (ACU) funds, recorded US dollars 1,487 million and US dollars 1,436 million respectively, by end May 2009. These include deposits of US dollars 145 million

Sri Lanka Customs

placed with two domestic banks. Based on the previous 12 month average imports (US dollars 983 million per month), these reserve values are equivalent to 1.51 and 1.46 months of imports, respectively. However, in view of the current and expected low imports, resulting from the sharp reduction in the oil and petroleum product import bills, the actual equivalent number of months of imports would be much higher.

The foreign exchange inflows have also responded favourably to the positive outlook brought about by the end to the three decades of conflict. In the meantime,

the Central Bank is in the process of building up its official reserves to a more comfortable level by absorbing foreign exchange from the market. Since end April 2009, it has absorbed US dollars 511 million from the market (upto 10 July 2009). In addition, the Sri Lanka Development Bonds (SLDBs) offered on 15 June 2009 was substantially oversubscribed by 152 per cent, enabling the mobilization of an additional US dollars 76 million for gross reserves.

The external trade and remittances performance during this period is further illustrated in the above table.

3. Monetary Policy Review – July 2009

Inflation, as measured by the year-on-year change in the Colombo Consumers' Price Index (CCPI) declined steadily till June 2009 reaching 0.9 per cent, the lowest value recorded in around 5 years. This decline was supported by the stringent monetary policy stance exercised by the Central Bank in the recent months and lower international commodity prices. While inflation is expected to gradually pick up from this month, particularly following the recent revision to fuel prices and its impact on domestic prices, inflation, on a year-on-year basis, is expected to remain at single digit levels throughout this year.

Considering the positive developments in inflation, the Central Bank has been gradually easing its monetary policy stance in order to maintain domestic financial markets liquid and economic activity buoyant. Towards this end, the Bank has thus far: removed the penal rate, reduced the Repurchase and Reverse Repurchase rates and, lifted the limitations placed on access to the repurchase and reverse repurchase facilities. Following a lag period, market interest rates have now begun to show a more pronounced decline in response to these measures. While yield rates on Treasury bills have shown a marked decline in the range of 600-680 basis points thus far during the year, a declining trend has emerged in other market interest rates as well. The gradual reduction in deposit rates has brought down the cost of funds of financial intermediaries, facilitating the subsequent decline in lending rates. The Central Bank notes with satisfaction the downturn in the market interest rates and expects financial intermediaries to continue with this trend to further align their deposit and lending rates with the Central Bank's policy interest rates as well as current economic fundamentals.

The pressure on the exchange rate has also eased. The decline in expenditure on imports outpacing the drop in earnings from exports has led to a substantial drop in the trade deficit during the first five months of the

year. This, coupled with the steady inflow of remittances, which have been well in excess of the trade deficit for this period, have impacted positively on liquidity in the domestic foreign exchange market. Meanwhile, the optimistic investor outlook was reflected in the inflow of investments to government securities during the last two months. This also enabled the Central Bank to absorb foreign exchange from the market and build up the country's foreign reserves. By 10 July 2009, purchases of foreign exchange by the Central Bank in the domestic foreign exchange market, in net terms, became positive, with the Central Bank having purchased a total of US dollars 652 million, so far in 2009.

Given the positive developments in the country, particularly since mid-May, economic activity is expected to pick up during the second half of the year. In this regard, the lower interest rate regime would enable a rebounding of private sector activity, underpinning the recovery in the economy.

Taking into account the economic developments discussed above, the Monetary Board, at its meeting held on 10 July 2009, has decided to maintain the policy interest rates of the Central Bank at their existing levels.

The release of the next regular statement on monetary policy will be on 19 August 2009.

4. “The Awakening North” – A Special Loan Scheme for Resumption of Economic Activities in the Northern Province

At a meeting conducted on 13th July 2009, at Temple Trees, with CEOs of Banking Institutions to discuss the contribution of the banking sector in the Northern Province development, His Excellency the President Hon. Mahinda Rajapaksa officially launched a Special Development Credit Scheme titled “The Awakening North” which is exclusively designed for the development of the Northern Province by the Central Bank of Sri Lanka (CBSL).

Hon. Basil Rajapaksa MP and Senior Advisor to the President, Hon. Ranjith Siyambalapitiya, Deputy Minister of Finance, Mr. Ajith Nivard Cabraal, Governor, CBSL, CEOs of Participating Credit Institutions and Senior Bank Officials attended the meeting.

The CBSL has introduced a Special Loan Scheme under the title “*The Awakening North*” with the purpose of providing credit facilities for capital investment for the resumption of economic activities in agriculture, livestock, fisheries, micro and small enterprises. This could boost the livelihood development of the people in the Northern Province of Sri Lanka. A total sum of Rs.3,000 million is earmarked to be disbursed initially under the Loan Scheme at a concessionary rate of interest among the eligible Micro, Small and Medium scale Enterprises (MSMEs) through Participating Financial Institutions (PFIs) already identified by the CBSL.

The Northern Province, comprising the districts of Jaffna, Killinochchi, Mannar, Vavuniya and Mullaitivu, covers a land area of 8,290 sq.km. representing 13.5 per cent of the total land area of the country. The estimated population is around 1.3 million or approximately 6 per cent of the total population of the country. Accordingly, the new Loan Scheme primarily envisages meeting the investment needs of the people to restart their livelihood activities. Under this scheme, they could obtain facilities from the banking sector to commence income generating activities (IGAs).

The Northern Province has many resources. Its natural resources including forests, agricultural land, wetlands, lagoons, bays and places of tourist attraction would provide a solid base for economic development in the Province. The major irrigation schemes, *i.e.*, Iranamadu, Giants Tank, Muthuaiyankaddukulam, Pavatkulam, Thannimairippukulam and Vavunikulam, and other minor irrigation schemes spread out in the Province will facilitate the agricultural and livestock development activities of the people. There are many viable IGAs already identified to restore the livelihood of the people with the assistance of the banking sector. Even under the conflict situation, the Northern Province produced 10 per cent of the total annual paddy production of the country. In the production of Other Field Crops (OFCs) such as Red Onions

(40% of country total), Chilies (10%), Green Gram (14%), Ground Nut (25%) *etc.*, the Northern Province contributes significantly to the total production of the country.

It has been estimated that 129,000 fishermen, representing 20 per cent of the total fishermen of the country, live in 219 fishing villages in the Northern Province. The total fish production in the Northern Province stood at 25,900 MT, representing 12 per cent of the country’s total in the year 2006. This shows that IGAs in the fisheries sector could be developed substantially in the coastal areas with the provision of banking facilities to the potential borrowers in the Northern Province.

Under the proposed Loan Scheme, credit facilities would be available for agriculture and related activities, livestock development projects, fisheries and related activities, micro and small scale enterprises and trade and other self employment projects. The PFIs are requested to provide 90 per cent of the total sub project cost, subject to a maximum limit of Rs.200,000 per borrower. The rate of interest to the borrower is 12 per cent and the repayment period could be extended up to the maximum of 5 years including a maximum grace period of 6 months depending on the nature of the activity. The PFIs are eligible to obtain refinance from the CBSL in respect of loans granted under the Scheme at 6 per cent per annum.

The following Financial Institutions which operate branches in the Northern Province, have been identified as the PFIs under “*The Awakening North*” Loan Scheme.

- Bank of Ceylon
- People’s Bank
- Hatton National Bank
- Commercial Bank
- Seylan Bank
- SANASA Development Bank

The PFIs are permitted to provide credit facilities to eligible borrowers to commence new income generating activities or to expand their existing IGAs. As usual, the prospective borrowers are required to provide at least 10 per cent equity contribution of the estimated cost of the project. The borrower could bring the equity capital in the form of cash, kind, materials or managerial capabilities. Security/collateral for such borrowing could be determined by the PFIs in negotiation with the borrower according

to the creditworthiness of the IGA and the respective borrower.

The Loan Scheme is a part of the efforts of the Government to rebuild the Northern Province. The

Regional Development Department of the CBSL will be responsible for the implementation of the Loan Scheme.

The Loan Scheme will be in operation w.e.f. 13th July 2009.

5. Provincial Gross Domestic Product – 2008

Central Bank of Sri Lanka (CBSL) has compiled Provincial Gross Domestic Product (PGDP) for 2008, based on the disaggregation of the Gross Domestic Product (GDP) estimated by the Department of Census and Statistics (DCS).

As already reported in the Annual Report of the Central Bank in 2008, the national GDP at current prices grew by 23.2 per cent in 2008, reaching Rs.4,411 billion with a per capita income of Rs.218,161, equivalent to US dollars 2,014. Its disaggregation across provinces is given in Table 1.

The regional disparity declined in 2008 and has been declining from 1996. During the year, the Western province's share in GDP reduced further from 46.5 per cent in 2007 (revised estimates) to 45.4 per cent in 2008, while contribution from all other provinces except Uva province either increased or remained at the same level over the previous year. Southern and Northwestern provinces contributed 10.6 per cent and 10.0 per cent to the GDP in 2008 compared to 10.5 per cent and 9.9 per cent respectively in 2007. Meanwhile, the Central, Eastern and Northcentral provinces also recorded improvements even though the contribution of each of these three provinces

to total GDP still remained at less than 10 per cent. The Northern (2.9 per cent) followed by the Uva (4.6 per cent) were the provinces with the lowest contributions to GDP.

As in the previous year, the Western Province continued to have the highest share of GDP, resulting from the high concentration of country's major resources such as infrastructure facilities, banking and finance, industries, business centers, airports and the main sea port.

Another notable feature is that the provinces with smaller GDP have grown faster. Northcentral province, Eastern province, Central province, Northwestern province and Southern province recorded nominal growth rates of 45.1 per cent, 30.7 per cent, 26.7 per cent, 24.5 per cent and 24.1 per cent respectively. In conformity with this observation, the Western Province with a high share of GDP grew slower. However, contrasting this observation, two provinces *i.e.*, Northern and Uva which had smaller

Table 1

	2008	1.6	0.8	0.9	0.5	0.7	0.9	0.8	0.7	0.7	1.0

* Revised ** Provisional

share in the GDP grew slower. These provinces require a further boost to develop income generating activities.

The per capita income in the Western province (Rs. 347,730 or US dollars 3,210) was 1.6 times the national per capita both in 2007 and 2008, while all other provinces continued to fall below the national per capita income. The Central and Northcentral provinces showed marginal improvements in 2008, while the Uva province showed marginal decline.

The sectoral contribution to GDP in provinces (Table 2) shows a considerable disparity. The contribution by Agriculture to the GDP of the Western Province (the richest province) was only 3.2 per cent, while the

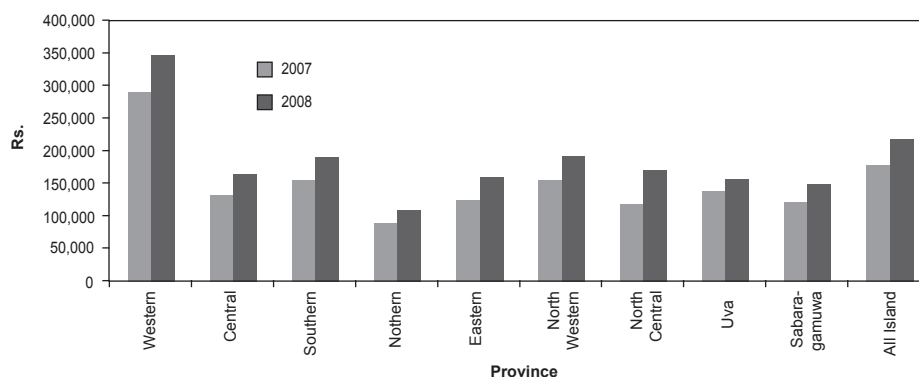

contribution from Industry and Services were at 31.7 per cent and 65.1 per cent respectively. This contrasts with contribution to the GDP by these sectors in 2008 in the four neighbouring provinces where the contribution from Agriculture was 19.6 per cent, Industry 29.5 per cent and Services 50.9 per cent. The outermost four provinces had a high share of Agriculture of 26.4 percent in 2008 and lower shares from Industry and Services compared to the national GDP. This shows that with the increase of spatial difference between the Western Province and other provinces the contribution by Agriculture to the provinces increases.

6. FIU of Sri Lanka signed Memoranda of Understanding with FIUs of Philippines and Nepal

The Financial Intelligence Unit (FIU) of Sri Lanka recently signed Memoranda of Understanding (MOU) with FIUs of Philippines and Nepal to share financial information to facilitate the investigation and prosecution of persons suspected of money laundering and terrorist financing. The signing ceremony was held in Brisbane, Australia on the 9th July 2009 during the Annual Meeting of the Asia Pacific Group on Money Laundering.

FIUs have been established in more than 130 countries as dedicated institutions to facilitate fight against money laundering, terrorist financing and other unlawful activities. In Sri Lanka the FIU was established in 2006 under the Financial Transactions Reporting Act (FTRA), No.6 of 2006 and now operates in the Central Bank of Sri Lanka.

Money launderers and terrorist financiers are most often internationally connected and operate across borders. Financial intelligence and authorities also need

to be internationally organized to fight these activities. Therefore, there is a need for FIUs to co-operate with each other and to exchange information. MOUs will facilitate greater co-operation and co-ordination among FIUs in the exchange of financial intelligence.

The FIU-Sri Lanka has already entered into MOUs with Malaysia, Afghanistan, South Korea and Indonesia. Arrangements are currently being made to sign similar MOUs with other FIUs in the region including India, Bangladesh and Japan.

7. Market Interest Rates Declined Further

In line with the gradual easing of the monetary policy stance by the Central Bank, interest rates have been on a declining trend since the beginning of this year. This was bolstered by improved market confidence and investor sentiment with the ending of the conflict, which resulted in an inflow of foreign investment to government securities. This trend was underscored by the new developments in relation to the financing facility by the IMF.

Accordingly, yield rates on Treasury bills declined sharply at the Treasury bill auction held on 22 July 2009 reflecting market confidence and positive sentiment. The yield rate on Treasury bills with a maturity of 91 days declined by 26 basis points to 10.79 per cent, the lowest since early October 2006. This trend was reflected in the yield rates of Treasury bills with the maturities of 182 days and 364 days. A similar trend was observed in the yield rates of Treasury bonds in the secondary market as well.

The total reduction in Treasury bills thus far during the year is in the range of 654 – 699 basis points.

The average weighted call money rate has also continued to be within the policy rate corridor at a single digit level benefiting from a healthy liquidity position maintained in the market. The present levels of call money rates are the lowest observed since the first quarter of 2006.

8. IMF Approves USD 2.6 billion Stand-By Arrangement Facility for Sri Lanka

The Executive Board of the International Monetary Fund (IMF) on 24 July 2009 approved a 20-month Stand-By Arrangement (SBA) facility of SDR 1.65 billion (approximately USD 2.6 billion), to Sri Lanka as a Balance of Payment (BOP) support. This accounts for 400 per cent of the country's current quota with the Fund and is the highest ever facility offered by the IMF to Sri Lanka. Immediately on approval of the facility, the first tranche amounting SDR 206.7 million (approximately USD 322 million) was made available to Sri Lanka, and this is the single largest disbursement the country had thus far received from the IMF. The remaining amount will be disbursed in seven tranches subject to the quarterly reviews on economic performance of the country.

Despite the unprecedented increase in fuel and commodity prices, particularly during the first half of the year, economic fundamentals of Sri Lanka had been improving steadily until the third quarter of 2008. However, by end 2008, the BOP turned into a deficit and external official reserves dropped significantly as a result of several adverse factors, such as, the sudden withdrawal of investment in Treasury Bills and Bonds by foreign investors, the hasty claims on short term credit facilities that were quite freely available for petroleum imports, the acute drying-up of commercial financing required for counterpart funds for the implementation of foreign funded projects under the public investment programme and severe valuation losses arising from the sharp depreciation of major international currencies against US dollar. Such factors have exerted an unforeseen and unfavorable pressure on the country's BOP and led to a substantial decline in external reserves.

In that context, in March 2009, Sri Lanka sought a SBA facility with exceptional access from the IMF amounting to USD 1.9 billion, 300 percent of country's current quota. In response to the request, a team of IMF officials visited Sri Lanka in late March to assess the impact of the global financial crisis on Sri Lanka and to consider as to whether Sri Lanka was in need of such assistance. The IMF officials had several key meetings with various government and non-government organizations to obtain first hand information. Further, the Sri Lankan delegation to the IMF Spring Meetings held several rounds of discussions with senior staff of the IMF. A Safeguards Assessment mission from the IMF also visited Sri Lanka to evaluate the reliability of information, procedures and processes of internal controls and concluded that the Central Bank of Sri Lanka employs a relatively strong framework of safeguards. However, despite the successful completion of all technical level negotiations and the finalization of the content of the Letter of Intent in April 2009, there was a delay in taking the SBA facility for discussion by the Executive Board of the IMF.

In the ensuing period, the Central Bank of Sri Lanka was able to build up official reserves by about US dollars 500 million on a net basis after supplying foreign exchange to meet all government debt service obligations as well. Further, inflation was brought down to below one per cent by end June 2009 from 28 per cent in June 2008.

With the ending of the decades long conflict with the LTTE in May 2009, a staff mission from the IMF arrived once again in Sri Lanka in early July, to understand the new environment and update the Program accordingly. Upon completion of the mission negotiations, the IMF indicated that the SBA facility would be taken for discussion by the Executive Board on 24 July 2009 and accordingly, the LOI was signed by the Sri Lankan authorities on 16 July 2009, with the key objectives under the SBA Program being to rebuild external reserves further, while strengthening the country's fiscal position and the domestic financial system.

The approval of the SBA facility on 24 July 2009 is an endorsement of country's economic policies by the IMF as all macroeconomic policies and targets under the 20-month Program are in line with policies already implemented and announced by the authorities. The Government budget deficit for 2009 is expected to be 7 per cent of GDP under the Program. The fiscal consolidation path accommodates expenditure for relief, rehabilitation and reconstruction of the conflict affected areas while protecting social expenditure such as expenditure for health, education and Samurdhi payments. It is also strongly believed that the endorsement of the Sri Lankan authorities' policies by the IMF would boost investor confidence in Sri Lanka and enhance the country's ability to attract local and foreign investment as well as loans from bilateral and multilateral agencies. These investments could be channeled for infrastructure development as well as for the post-conflict reconstruction and relief effort, thereby increasing country's production and job creation in the long run and lay the foundation for future economic growth and enhance macroeconomic stability.

Under the 20-month SBA Program, the final tranche will be disbursed in March 2011. The loan is repayable within 4 years commencing April 2012. The rate of interest of the SBA facility is composed of two components; the service charge and a fixed margin. The service charge is calculated weekly, based on the SDRs rate (which at present is 0.3 per cent per annum) while the fixed margin is 1 per cent per annum for the outstanding loan amount

up to 300 per cent of the quota. When the outstanding loan amount exceeds 300 per cent of the quota, a surcharge of 2 per cent per annum is to be levied. The interest rate of the SBA facility is significantly lower than the prevailing market rates.

A schedule of IMF facilities obtained by Sri Lanka during the period 1977 to 2009 is set out in Annexe I.

Annexe I

IMF Loans During 1977 to 2009 (SDR Mn)

Year	Description	Amount Approved	Amount Drawn
1977	Stand-by Arrangement	–	133.6

STATISTICAL APPENDIX

Definitions and Explanatory Notes

The following general notes supplement the footnotes given below the individual tables:—

1. The data cover monthly figures available at the time the Bulletin goes to print, and the latest available information does not relate to the same month, in every table.

To enable comparison, annual figures for recent years are given.

2. In an attempt to bring the material up-to-date provisional figures are included in some tables.
3. Figures in some tables have been rounded off to the nearest final digit. Hence there may be a slight discrepancy between the total as shown and the sum of its components.
4. Differences as compared with previously published figures are due to subsequent revisions.
5. The following symbols have been used throughout:—
 - n.a. = not available
 - = nil
 - ... = negligible

Source : Department of Census and Statistics

- (a) The index was based on household income and expenditure survey conducted in 2002.
The weights are based on the consumption pattern of the urban households within the Colombo district.
- (b) Annual and quarterly figures are averages of monthly figures.

Note: The Index numbers are calculated by the Labour Department on fixed weights based on the numbers employed as at 31 December 1978. The wage rate used in the calculation of Index numbers are minimum wages for different trades fixed by the Wages Boards.

Sources : Labour Department
Central Bank of Sri Lanka

- (a) The Index refers to wage rates of tea growing and manufacturing, rubber growing and manufacturing, coconut, cocoa, cardamoms and pepper growing trades only.
- (b) Includes baking, brick and tile manufacturing, coconut manufacturing, printing textile, tyre and tube manufacturing, coir mattresses & bristle fibre export, hosiery manufacturing, engineering, garment manufacturing, match manufacturing, biscuit manufacturing, tea export and rubber export trades only.
- (c) This includes cinema, motor transport and nursing homes trade only.
- (d) Combined Index for workers in Agriculture, Industry & Commerce and Services.
- (e) Provisional.

(a) Daily wages represent payments in cash where meals are not provided by the employer. Annual and quarterly figures are averages of monthly figures.

Source: Central Bank of Sri Lanka

(b) Wages in the construction sector are paid on both daily payment and contractual basis. The series on contractual basis in previous bulletin publications has been replaced by the series on daily payment basis from the monthly bulletin of December 2005 onwards for comparison with wages in other sectors.

(c) Daily wages up to December 2004 are the average of daily wages for the two activities. From January 2005 onwards the daily wages cover both activities under a single category following the restructuring of data collection schedules.

(d) Provisional.

(a) Consists of government expenditure excluding contributions to sinking funds, direct payment of public debt and subscriptions to international financial organisations. Also excludes book adjustments arising from losses on Advance Account operations incurred and financed in the previous financial year. Hence, the figures may not tally with the figures published in the accounts of the Government of Sri Lanka.

(b) Special payments and receipts on account of Sri Lanka's contribution to and from the IMF and the IDA and special loans from these payments are excluded from both recurrent expenditure and Central Bank Advances.

(c) Provisional.

(d) Excludes Treasury bills and Treasury bonds to non-residents in 2007.

(e) Includes Treasury bills and Treasury bonds issued to non-residents in 2007.

(a) A series with a wide coverage and 1997 as the base year. In order to accommodate the variability arising from a monthly frequency, in computing the monthly trade indices, first the volume index is computed as a Laspeyres index and then the unit value index is derived as the ratio between the value index and the volume index. This methodology avoids the subjective imputation of prices that would be required in deriving a price index first when certain items are not exported or imported in a particular month.

(a) A series with a wide coverage and 1997 as the base year. In order to accommodate the variability arising from a monthly frequency, in computing the monthly trade indices, first the volume index is computed as a Laspeyres index and then the unit value index is derived as the ratio between the value index and the volume index. This methodology avoids the subjective imputation of prices that would be required in deriving a price index first when certain items are not exported or imported in a particular month.

(b) Provisional.

(a) A series with a wide coverage and 1997 as the base year. In order to accommodate the variability arising from a monthly frequency, in computing the monthly trade indices, first the volume index is computed as a Laspeyres index and then the unit value index is derived as the ratio between the value index and the volume index. This methodology avoids the subjective imputation of prices that would be required in deriving a price index first when certain items are not exported or imported in a particular month.

(a) Special Drawing Rights, the unit of account of the International Monetary Fund.

Source: Central Bank of Sri Lanka

(b) The NEER is the weighted average of nominal exchange rates of the 24 trading partner and competitor countries. Weights are based on the trade shares reflecting the relative importance of each currency in the currency basket.

(c) The REER is computed by adjusting the NEER for inflation differentials with the countries whose currencies are included in the basket.

(a) Annualized Forward Premium (f^d) is computed using the following formula.

Source: Central Bank of Sri Lanka

$$f^d = \{[F_t^{t+1} - S_t] / S_t\} * 100 * (12/t)$$

Where F_t^{t+1} is the forward rate for period $t+1$ that exists in period t and S_t is the interbank spot rate at period t .

Source: Central Bank of Sri Lanka

- (1) Total amount of currency, including subsidiary notes and coins issued by the Central Bank.
 (2) Currency held by the Treasury and the Kachcheries.
 (5) Total demand deposits held by the Central Bank and the commercial banks.
 (6) Government demand deposits with the commercial banks and the Central Bank.
 (7) Inter bank deposits both local and foreign, including deposits of international organisations and commercial banks with the Central Bank.
 (10) Time and savings deposits of non-governmental sector held with commercial banks.
 (11) M₂ is defined as M₁ plus time and savings deposits of the public held with commercial banks.

Note: (a) Monetary data from 1990 have been reclassified as follows, to be consistent with the standard international practice.

Column 5 & 8 – Excludes the value of rupee demand deposits held by customers resident outside Sri Lanka. These deposits are now treated as foreign liabilities (Rs.1,286 million at end May 2009).

Column 10 – Excludes the value of rupee time and savings deposits held by customers resident outside Sri Lanka. These deposits are now treated as foreign liabilities (Rs.655 million at end May 2009).

(a) External assets (net) of the Central Bank and commercial banks (including outward bills).

(b) Currency and demand deposits held by the public.

(c) Credit extended by the banking system to the government, net of government deposits with banks and government cash balances.

(d) Monetary data from 1990 have been reclassified as follows, to be consistent with the standard international practice.

Column 1 – Excludes rupee demand deposits held by customers resident outside Sri Lanka. These are now treated as foreign liabilities (Rs.1,286 million at end May 2009).

Column 3 – Adjusted:

(i) to include effect of the quota subscriptions made to the IMF and liabilities on account of other transactions with IMF which are not reflected in the balance sheet of the Central Bank. However, with effect from January 2002, the total amount of IMF quota is included in the Central Bank's balance sheet with the adoption of International Accounting Standards (IAS).

(ii) to include the balance in the Crown Agent's Account of the Government (Rs.7 million at end May 2009).

(iii) to include the revaluation effect of the Structural Adjustment Facility and the Standby Arrangement with the IMF - Rupee Account until December 2002. Since January 2003, all IMF related assets and liabilities

(e) Includes assets/liabilities of National Development Bank which merged with NDB Bank Ltd., with effect from August 2005.

(f) Restructuring bonds worth Rs.19,392.6 million, which were issued by the government to the two state banks, have been converted to Treasury bonds upon their maturity in October 2006. This amount, which previously appeared under Other Assets has been included in Net Credit to Government since October 2006.

Source: Central Bank of Sri Lanka

have been revalued to current market rates in the balance sheet of the Central Bank.

(iv) to include rupee deposits of customers outside Sri Lanka as foreign liabilities (This reduces the net external assets of the commercial banks by Rs.1,951 million at end May 2009).

Column 6 – Net credit to the Government by the Central bank includes cash item in process of collection (Rs.0 at end May 2009) but excludes the Central Bank's assets on special advances given to the government on account of obligations to the IMF which had been shown in the CBSL balance sheet until September 2002.

Column 16 – Adjusted for cash items in process of collection (Rs.0 at end May 2009) and special advances given by the Central Bank to the government on account of IMF obligations. The amount of special advances was removed from the CBSL's balance sheet since October 2002 to be compatible with the accounting treatment of IMF quota under International Accounting Standards.

- (a) The balance sheet data of the Central Bank from 2002 January is based on the International Accounting Standards (IAS). Accordingly, foreign securities of the Central Bank have been valued at current market prices since January 2002. These data prior to January 2002 are according to local cost or face value whichever is less.
- (b) Includes securities acquired from government institutions.
- (c) According to IAS, the amount of Sri Lanka's quota with the IMF has been taken into the Central Bank's balance sheet.
- (d) According to IAS, balance sheet of the CBSL is prepared on accrual basis and receivables show interest receivables on foreign securities.
- (e) From February 1975, loans and advances to others include amounts granted under the Medium and Long Term Credit Fund. Credit provided under "Susahana" Refinance Credit Scheme is included from December 2005.
- (f) According to IAS, government and government guaranteed securities are at fair value basis since January 2002.

Note : The number of reporting banks were 23 until January 2006, and 22 from October 2008.

(a) Also includes Treasury bills purchased in the secondary market.

(b) Includes Central Bank securities and DFCC Bonds.

(c) Fixed and other assets consists of banks' property, furniture, fittings and sundries (commission, interest receivable etc.).

(d) Liquid assets consist of Cash on hand, Balances due from Central Bank, Foreign currency on hand and Balances due from banks abroad, Government of Sri Lanka Treasury bills and bills discounted. With effect from 18 May 1998, Treasury bonds are considered as part of liquid assets of commercial banks. Balances due from domestic banks and cash items in process of collection have been excluded from liquid assets and domestic inter-bank deposits have been excluded from demand deposits, because from the view point of the commercial banking system as a whole such claims and deposits cancel out.

(a) This monetary survey is based on the aggregated data pertaining to both Domestic Banking Units (DBUs) and Offshore Banking Units (OBUs) of banks operating in Sri Lanka. Definitional changes have been adopted in aggregating DBUs and OBUs data to avoid double counting and misclassification of assets and liabilities. The major changes are:

(Contd.)

- (1) All DBU placements in OBUs are recorded as domestic assets, while all DBU borrowings from OBUs are recorded as domestic liabilities.
- (2) Foreign currency deposits of DBUs are classified on the basis of ownership rather than on the basis of currency. Hence, the following apply :
 - (i) One half (50 per cent) of NRFC deposits are treated as domestic deposit liabilities;
 - (ii) All RNNFC balances are treated as foreign liabilities;
 - (iii) All other domestic foreign currency accounts are treated as domestic deposit liabilities.
- (b) External assets (net) of the Central Bank and commercial banks (including outward bills).
- (c) Currency and demand deposits of the public.
- (d) Time and savings deposits of the public held with commercial banks.

(e) Credit extended by the banking system to the government, net of government deposits with banks and government cash deposits.

Source: Central Bank of Sri Lanka

(f) Credit granted to Sri Lanka Telecom Ltd., has been excluded from public corporations and included in other private sector from December 1997 onwards.

(g) Includes assets / liabilities of National Development Bank which merged with NDB Bank Ltd., with effect from August 2005.

(h) Restructuring bonds worth Rs.19,392.6 million which were issued by the government to the two state banks, have been converted to Treasury bonds upon their maturity in October 2006. This amount, which previously appeared under Other Assets, has been included in Net Credit to Government since October 2006.

(a) This financial survey is based on the aggregate data pertaining to Domestic Banking Units (DBUs), Foreign Currency Banking Units (FCBUs), Licensed Specialised Banks (LSBs) and Finance Companies (FINCOs) operating in Sri Lanka. Definitional changes have been adopted in aggregating DBU, FCBUs, LSBs and FINCOs data to avoid double counting and misclassification of assets and liabilities. The major changes are:

- (1) All DBU placements in FCBUs are recorded as domestic assets, while all DBU borrowings from FCBUs are recorded as domestic liabilities.
- (2) Foreign currency deposits of DBUs are classified on the basis of ownership rather than on the basis of currency. Hence, the following apply:
 - (i) One half (50 per cent) of NRFC deposits are treated as domestic deposit liabilities;
 - (ii) All RNNFC balances are treated as foreign liabilities;
 - (iii) All other domestic foreign currency accounts are treated as domestic deposit liabilities.

(b) External assets (net) of the Central Bank, Commercial banks (including outward bills), LSBs and FINCOs.

(c) Currency, demand deposits and quasi money in DBUs in this table differ from those in table 52 due to the fact that LSBs and FINCOs are not treated as public under this broad monetary survey (M₄) definition.

Source: Central Bank of Sri Lanka

(d) Time and savings deposits of the private sector with commercial banks, LSBs and FINCOs.

(e) Credit extended by the monetary authority, DBUs, LSBs and FINCOs to the Government, net of Government deposits with banks and Government cash deposits.

* Revised.

* The contents and format of this table have been revised.

(a) Under Sections 10c, 93, 94, 96 and 97 of the amended Monetary Law Act (Chapter 422), commercial banks and other financial institutions are required to maintain reserves against their deposit liabilities as prescribed by the Monetary Board. Currently, only commercial banks are subject to reserve requirements. With effect from 24 January 1992, an amount of till cash over and above two per centum of the total deposit liabilities, but not exceeding four per centum, could be maintained as a part of required reserves in the form of Sri Lanka currency notes and coins. Details of required reserve ratios, which were applicable in the past and computational methods have been published in the Appendix table on the 'Reserve Position of Commercial Banks' in the Annual Reports prior to 2003.

(b) Reserve data are for the last reserve week of each month. The required reserves recorded in the table refer to the cumulative reserves for the week, while commercial bank deposits with the Central Bank are the cumulative deposits for that particular reserve week. Excess/Deficit on SRR is the difference between the cumulative SRR for the reserve week and cumulative deposits of the commercial banks for the week.

(c) Excludes interbank deposits.

(d) With effect from 03 April 2003, the basis of computing the Statutory Reserve Requirement (SRR) was changed from deposit liabilities and vault cash balances at the close of business on Wednesday of the previous reserve week, to the average of deposit liabilities and vault cash balances during the week ending Tuesday of the previous reserve week.

(e) SRR, which was 10 per cent with effect from 19 October 2001 was reduced to 9.25 per cent with effect from 17 October 2008.

(f) SRR was reduced from 9.25 per cent to 7.75 per cent with effect from 28 November 2008.

(g) SRR was reduced from 7.75 per cent to 7.00 per cent with effect from 27 February 2009.

Source: Central Bank of Sri Lanka

(a) All interest rates are as at the end of period, unless otherwise stated.

(b) This is the rate at which the Central Bank grants advances to commercial banks for temporary liquidity purposes. With effect from 04 January 1991, the rate was increased to 17 per cent from 15.5 per cent. As at end 1999 this rate was 16 per cent. With effect from 02 October 2000 the rate was increased to 18 per cent and further increased to 25 per cent with effect from 21 November 2000. With effect from 02 July 2001, this rate was brought down to 23 per cent and further reduced to 18 per cent with effect from 27 December 2001. On 15 August 2003, the rate was reduced to 15 per cent.

(c) Average Weighted Deposit Rate (AWDR) is calculated monthly by the Central Bank based on the weighted average of all outstanding interest bearing deposits of commercial banks and the corresponding interest rates.

(d) The Average Weighted Prime lending Rate is estimated weekly by the Central Bank based on commercial banks' lending rates offered to their prime customers during the week. These monthly figures are average values of estimated weekly rates.

(e) The Sri Lanka Inter-Bank Offered Rate (SLIBOR) is computed daily by the Central Bank, based on rates offered by commercial banks in the inter-bank market. The rate shown is the average of such offered rates by selected commercial banks.

(a) Issue of Treasury bonds commenced in March 1997.

(b) The yields on Rupee Loans are administratively determined and not market determined unlike the yields on Treasury bill and Treasury bonds.

(c) The secondary market information is based on data provided by Primary Dealers in Government Securities and is available since October 2000.

(d) Yield rates are averages of bid and offer rates.

(e) Interest with tax for 4 year maturity.

Note : Treasury bonds are not issued on a regular basis unlike treasury bills. Hence a continuous series of primary market yields is not available.

(a) Rate on ten year certificates. The issue of this certificate is discontinued. The rate reflects the rate on earlier issues.

(b) Issuing National Savings Certificates commenced in October 1997.

(c) Private savings and development banks include Sanasa Development Bank which was established in October 1997. From 2003 it only includes Sanasa Development Bank.

(d) DFCC Bank commenced deposit mobilisation in April 1996.

(e) The minimum rate represents the refinance rate charged under the Small and Medium Scale Industries (SMI) Scheme. NDB became a licensed commercial bank with effect from 01 August 2005.

* Revised.

ATM and Credit Cards		
ATM cards – Issuing fee	Rs. 500	Rs. 75
Credit cards – Issuing fee	Rs. 6,000	Rs. 180
Renewal fee	Rs. 3,000	Rs. 120

Notes :

- (1) Commercial banks charge a variety of fees and commissions on their services. The table gives a range of the maximum and minimum fees and commissions which are based on the information provided by commercial banks. These charges, which do not change very frequently are published semi-annually to enable the public to negotiate best terms. These fees and commissions could be different when services and products are provided as a package.
- (2) These are standard charges of commercial banks. However, charges for some specific products could include charges payable to banks abroad. For example, banks in Sri Lanka may include in their charges fees payable to banks abroad such as for adding confirmation to Letters of Credit, and for correction of discrepancies.
- (3) In the case of Documentary Credits, the charges for outward transmission from Sri Lanka would differ, on the mode of transmission used.
- (4) Loan application processing fees vary according to the loan amount.
