(a) Reserve data have been revised to include balances in DST's special Yen accounts in consultation with IMF,

and placement for war risk insurance. From October 2002 external assets are calculated at market values.

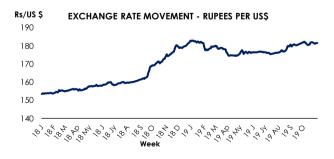

(b) Including ACU receipts.

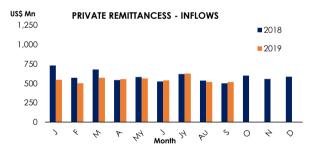

(c) Average for the last five working days of the month of October based on actual transactions.

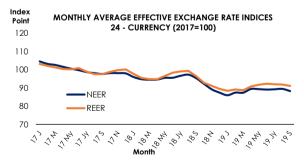

(d) The NEER is the weighted average of nominal exchange rates of the 24 trading partner and competitor countries. Weights are based on the trade shares reflecting the relative importance of each currency in the currency basket.

(e) The REER is computed by adjusting the NEER for inflation differentials (based on CCPI) with the countries whose currencies are included in the basket. The REER Indices for 2019 are provisional.
