### **Inflation, as measured by the change in the National Consumer Price Index (NCPI) (2013=100), decelerated in June 2017.**

Inflation, as measured by the change in the National Consumer Price Index (NCPI) (2013=100), which is compiled by the Department of Census and Statistics (DCS), decelerated to 6.3 per cent in June 2017 from 7.1 per cent in May 2017, on year-on-year basis. Both Food and Non-food categories contributed towards the year-on-year inflation in June 2017. The change in the NCPI measured on an annual average basis remained at 6.1 per cent in June 2017, at same level of the previous month. When the monthly change is considered, the NCPI increased from 121.8 index points in May 2017 to 123.4 index points in June 2017. This monthly increase was mainly due to the increase in prices of the items in the Food Category. The NCPI Core inflation, which reflects the underlying inflation in the economy decreased to 4.1 per cent in June 2017 from 4.7 per cent in May 2017 on a year-on-year basis. This decline is due to relatively low monthly increase of items excluding Volatile food, Energy and Transport categories. Annual average NCPI Core inflation also declined from 6.4 per cent in May 2017 to 6.1 per cent in June 2017.

Inflation, as measured by the change in the Colombo Consumer Price Index (CCPI) (2013=100), which is compiled by the Department of Census and Statistics, decreased to 4.8 per cent in July 2017 from 6.1 per cent in June 2017, on year-on-year basis. When monthly change is considered, the CCPI declined by 0.7 index points to 119.4 index points in July from 120.1 index points in June 2017. This monthly decline was mainly due to the decrease in prices of the items in the Food category. CCPI Core inflation, which reflects the underlying inflation in the economy decreased to 4.9 per cent in July 2017 from 5.1 per cent in June 2017 on a year-on-year basis. Annual average CCPI Core inflation declined to 5.4 per cent in July 2017 from 5.5 per cent in June 2017.

---

### **GDP grew at moderate pace during the first quarter of 2017.**

The GDP grew by 3.8 per cent in real terms in the first quarter of 2017, mainly attributable to 6.3 per cent growth in Industry activities and 3.5 per cent growth in Services activities while Agriculture activities contracted by 3.2 per cent, in value added terms.

---

During the first half of 2017, due to the increasing trend of tea prices the domestic tea production increased marginally and production of rubber decreased due to the slowdown of tapping activities. Meanwhile, the coconut production also declined during the similar period.

---

### **During the week, crude oil spot prices showed a mixed performance.**

Within the week, both Brent and WTI prices fell by over US\$ 1.5 per barrel. Price decline at the beginning of the week was supported by strong dollar and weak domestic demand in China. In July, China's refinery operations have dropped steeper than expected. However, prices showed mixed performance since mid-week, as U.S. crude oil output has risen to 9.5 million barrels per day and U.S. crude stockpiles have dropped for the seventh consecutive week to their lowest level since January 2016.

---

### **IIP showed a marginal increase on year-on-year basis in May 2017.**

The IIP in May 2017 has increased by 0.1 per cent in comparison with the corresponding month of 2016. Among the major sub divisions of the manufacturing industries; volume of products of 'Coke and refined petroleum products' (12.0%); 'Rubber and plastic products' (10.2%) and 'Other non-metallic mineral products' (6.9%) have shown remarkable increase in production during the month of May, 2017 compared to that of May, 2016 and 'Chemicals & chemical products' and 'Beverages' decreased by 21.1% and 5.7% respectively during this period.
