Real Sector

Inflation, as measured by the change in the National Consumer Price Index (NCPI) (2013=100), which is compiled by the Department of Census and Statistics, increased to 6.5 per cent in January 2017 from 4.2 per cent in December 2016, on year-on-year basis. Both Food and Non-food categories contributed towards the year-on-year inflation in January 2017. The change in the NCPI measured on an annual average basis increased to 4.6 per cent in January 2017 from 4.0 per cent in December 2016. When the monthly change is considered, the NCPI increased from 118.0 index points to 119.3 index points from December 2016 to January 2017. This monthly increase was mainly due to the increase in prices of the items in the Food category. NCPI Core inflation, which reflects the underlying inflation in the economy increased to 7.1 per cent in January 2017 from 6.7 per cent in December 2016. Annual average NCPI Core inflation increased to 6.2 per cent in January 2017 from 5.9 per cent in December 2016.

Inflation, as measured by the change in the Colombo Consumer's Price Index (CCPI) (2013=100), which is compiled by the Department of Census and Statistics, increased to 6.8 per cent from 5.5 per cent in January 2017, on year-on-year basis. Annual average inflation increased to 4.6 per cent in February 2017 from 4.3 per cent in January 2017. The monthly increase in CCPI was 0.5 per cent. CCPI Core inflation, which reflects the underlying inflation in the economy increased to 7.1 per cent in February 2017 from 7.0 per cent in January 2017. Annual average CCPI Core inflation increased to 5.0 per cent in February 2017 from 4.7 per cent in January 2017.

The GDP grew by 4.0 per cent in real terms in the first nine months of 2016, mainly attributable to 4.8 per cent growth in Services activities and 5.7 per cent growth in Industry activities while Agriculture activities contracted by 2.5 per cent, in value added terms.

During the months of January 2017 production of tea declined due to dry weather conditions and while production of rubber declined due to the slowdown of tapping activities. Meanwhile, the coconut production also marginally declined during the similar period.

The FIPI increased by 2.9 per cent on a year-on-year basis in December 2016. This increase was mainly due to increased Production of wearing apparel, Rubber and plastic products and Other non-metallic mineral products sub-sectors. This was mainly attributed to increased domestic and international demand.

During the week, crude oil spot prices followed a declining trend. At the beginning of the week, Brent oil price rose over the reports stating that Iraq would possibly participate in oil production cuts if OPEC extend the curbs into the second half of the year. However, prices gradually fell to their lowest levels since end November 2016, due to growing U.S. oil production. The U.S. Energy Information Administration reported that crude stockpiles in the U.S. have risen by 8.2 million barrels last week to a record high level of 528.4 million barrels, more than a quadruple of the forecasts, creating concerns that the global glut could persist even as OPEC tries to prop up prices with output curbs.
