Colombo Consumers' Price Index (CCPI) (2006/07=100), which is compiled by the Department of Census and Statistics, increased to 3.1 per cent in November 2015, compared to 1.7 per cent recorded in the previous month, on an year-on-year basis. This increase was mainly due to the removal of the high base effect of downward administrative price revisions effected since September 2014 and the recent price increase in several key items in the food category. Annual average inflation increased to 0.9 per cent in November 2015, compared to 0.7 per cent recorded in October 2015. CCPI increased by 1.4 per cent from October to November 2015.

In the meantime, the Department of Census and Statistics (DCS) released a National Consumer Price Index (NCPI, 2013=100) on 23 November 2015 covering price movements in all provinces in the country. The movements of the NCPI are broadly in line with the movements in CCPI. Headline inflation as per the year-on-year change in NCPI was at 3.0 per cent for October 2015

The GDP grew by 4.8 per cent in real terms during the third quarter of 2015, mainly attributable to 3.4 per cent, 6.2 per cent and 6.9 per cent growth in Services activities, Industry activities and Agriculture activities, respectively, in value added terms.

Tea and rubber production during the first ten months of 2015 declined by 2.0 per cent and 12.8 per cent to 278.1 million kg and 76.1 million kg respectively. However, coconut production recorded an increase of 6.5 per cent to 2,550.7 million nuts during this period.

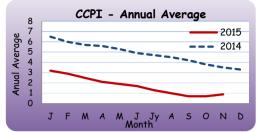

The FIPI increased by 9.8 per cent on a year-on-year basis in September 2015. This growth was mainly facilitated by increased production of chemicals and chemical products, wearing apparel and beverages sectors. They have recorded significant growths of 20.5, 19.9 and 14.1 per cent respectively during this period. This was mainly attributed to increased domestic and international demand.

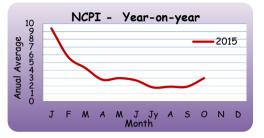

During the week crude oil spot prices showed mixed performance. At the beginning of the week Brent crude oil price fell, following a forecast from the International Energy Agency (IEA) that the global glut of oil is likely to deepen next year. However, WTI price rose as traders who have bet on lower prices are likely taking profits after six straight sessions of losses. Prices further rose as short-covering and technical support halted a slide to 11-year lows, but the market remained weak from oversupply. Prices then fell after the Federal Reserve raised rates and official figures showed a surprise build in U.S. crude inventories. The U.S. Fed hiked interest rates by 25 basis points for the first time in nearly a decade. Energy Information Administration reported U.S. crude stocks rose by 4.8 million barrels last week against Reuters forecast for a drop of 1.4 million barrels. Further, OPEC producers see little chance of significantly higher oil prices in 2016 as extra Iranian production could add to the ongoing glut. Further, fresh supply builds at the Cushing, Oklahoma delivery hub added to worries about a global glut.
