Inflation, as measured by the change in the Colombo Consumers' Price Index (CCPI) (2006/07=100), which is compiled by the Department of Census and Statistics, declined to -0.2 per cent, on an year-on-year basis in July 2015, from 0.1 per cent recorded in June 2015. Annual average inflation declined from 1.7 per cent in June 2015 to 1.3 per cent in July 2015. CCPI increased by 0.7 per cent from June to July 2015.

Core inflation, which reflects the underlying inflation in the economy, increased to 3.5 per cent in July 2015, from 2.8 per cent in June 2015 on an year-on-year basis. Annual average core inflation remained unchanged at 2.8 per cent, as recorded in the previous month.

The economy grew by 6.0 per cent in real terms during the first quarter of 2015, supported by 10.1 per cent growth of the Services activities and 2.9 per cent growth of the Agriculture related activities, while the Industry activities contracted by 1.9 per cent in value added terms.

Tea production during the first five months of 2015 has increased marginally by 0.3 per cent from 142.6 million kg to 143.1 million kg. However, production of rubber during the first five months of 2015 recorded a decline of 17.3 per cent. Meanwhile, coconut production during the first four months of 2015 has declined by 1.3 per cent

The FIPI increased by 8.2 per cent on a year-on-year basis in March 2015. This growth was mainly facilitated by increased production of beverages, wearing apparel, chemicals and chemical products sectors. They have recorded a significant growth of 9.2, 30.8 and 9.5 per cent respectively during this period. This was mainly attributed to increased domestic and international demand.

During the week crude oil spot prices showed mixed performance. At the beginning of the week prices rose on weaker dollar and after a rally in U.S. gasoline and diesel due to a refinery outage. Subsequently, prices fell as oil production hit multi-year highs and China's currency devaluation raised concerns over the country's economic health. China's yuan fell to nearly four-year lows after the central bank weakened the yuan's official midpoint for a second day. OPEC raised its forecast of oil supplies from non-member countries in 2015 and forecast no extra demand for its crude this year. Crude oil prices again rose on weaker dollar and after U.S. government data showed crude stocks fell by 1.7 million barrels. However, end of the week U.S. oil prices dropped as data showing a big rise in key U.S. stockpiles intensified worries over a growing global glut and strong dollar. Further, the International Energy Agency said although low fuel prices were stimulating global demand for oil, the crude glut was likely to persist through 2016.
