Inflation, as measured by the change in the Colombo Consumers' Price Index (CCPI) (2006/07=100), which is compiled by the Department of Census and Statistics, remained unchanged at -0.2 per cent in August 2015, as recorded in the previous month, on an year-on-year basis. Annual average inflation declined to 1.0 per cent in August 2015 from 1.3 per cent in July 2015. CCPI decreased by 0.5 per cent from July to August 2015.

Core inflation, which reflects the underlying inflation in the economy, increased to 3.9 per cent in August 2015, from 3.5 per cent in July 2015 on an year-on-year basis. Annual average core inflation remained unchanged at 2.8 per cent, for the third consecutive month.

The economy grew by 6.0 per cent in real terms during the first quarter of 2015, supported by 10.1 per cent growth of the Services activities and 2.9 per cent growth of the Agriculture related activities, while the Industry activities contracted by 1.9 per cent in value added terms.

Tea production during the first Six months of 2015 has declined marginally by 0.6 per cent from 173.6 million kg to 172.6 million kg. However, production of rubber during the first Six months of 2015 recorded a substantial decline of 17.4 per cent. Meanwhile, coconut production during the first Six months of 2015 has increased by 4.4 per cent.

The FIPI increased by 13.2 per cent on a year-on-year basis in April 2015. This growth was mainly facilitated by increased production of beverages, tobacco and wearing apparel sectors. They have recorded a significant growth of 9.4, 21.9 and 38.1 per cent respectively during this period. This was mainly attributed to increased domestic and international demand.

During the week crude oil spot prices showed mixed performance. At the beginning of the week prices rose due to a downward revision of U.S. crude production data and OPEC's readiness to talk with other oil producers about curbing output. U.S. Energy Information Administration (EIA) reported U.S. pumped just below 9.3 million barrels per day (bpd) in June, down by 1 million bpd from a revised May figure. Prices then fell after China's official Purchasing Managers' Index drop to 49.7 in August and U.S. manufacturing sector growth slowed to its weakest pace in more than two years, reinforcing fears of slowing global growth and weaker fuel demand. Prices were then mixed on rallying equities on Wall Street and rise in U.S. crude inventories. U.S. stocks rose more than 1 per cent as China's move to support its financial markets eased investor concerns while EIA reported crude stockpiles rose by 4.7 million barrels last week. Prices further rose on gains in Wall Street equities for a second straight day and the European Central Bank's pledge to keep monetary policy loose after weak inflation and growth forecasts.
