Inflation, as measured by the change in the Colombo Consumers' Price Index (CCPI) (2006/07=100), which is compiled by the Department of Census and Statistics, remained unchanged at -0.2 per cent in August 2015, as recorded in the previous month, on an year-on-year basis. Annual average inflation declined to 1.0 per cent in August 2015 from 1.3 per cent in July 2015. CCPI decreased by 0.5 per cent from July to August 2015.

Core inflation, which reflects the underlying inflation in the economy, increased to 3.9 per cent in August 2015, from 3.5 per cent in July 2015 on an year-on-year basis. Annual average core inflation remained unchanged at 2.8 per cent, for the third consecutive month.

The GDP grew by 6.7 per cent in real terms during the second quarter of 2015, mainly attributable to 7.9 per cent growth in Services activities, supported by the growth in Industry activities by 2.0 per cent and Agriculture activities by 5.0 per cent in value added terms.

Tea production during the first seven months of 2015 declined by 2.1 per cent from 202.6 million kg to 198.4 million kg. Meanwhile, coconut production during the first Six months of 2015 has increased by 4.4 per cent. However, production of rubber during the first seven months of 2015 recorded a substantial decline of 15.9 per cent.

The FIPI increased by 14 per cent on a year-on-year basis in May 2015. This growth was mainly facilitated by increased production of tobacco, wearing apparel and other non-metallic mineral products sectors. They have recorded a significant growth of 16.9, 29.8 and 38.4 per cent respectively during this period. This was mainly attributed to increased domestic and international demand.

During the week crude oil spot prices showed mixed performance. At the beginning of the week prices fell after OPEC said weaker outlook for China would contribute to slower global demand growth next year. OPEC lowered its world oil demand growth to 1.29 million barrels per day (bpd) in 2016 from 1.46 million bpd in 2015. Prices then rose after American Petroleum Institute estimated 3.1 million barrel crude stockpile drawdown. Further, Iraq warned that it may slow spending on new fields in 2016. Subsequently, prices sharply increased as U.S. Energy Information Administration reported the largest crude drawdown in seven months at the key delivery point in Oklahoma. Meanwhile, U.S. stockpiles slipped by 2.1 million barrels as refineries increased operating rates. Towards the end of the week, prices fell again on fresh signs that the Middle East will continue to prioritise market share over prices, while the U.S. kept interest rates at historic lows on worries over the health of the global economy. OPEC said that they expected oil prices to rise by no more than \$5 a barrel a year, to reach \$80 by 2020.
