Inflation as measured by the change in the NCPI (2013=100) increased to 4.8 per cent in November 2015, compared to 3.0 per cent recorded in October 2015, on an year on- year basis. The NCPI increased by 2.6 per cent from October to November 2015. This monthly increase was mainly due to the increase in prices of the items in the Food and Non Alcoholic Beverages category.

The Colombo Consumers' Price Index (CCPI) (2006/07=100), which is compiled by the Department of Census and Statistics, decreased to 2.8 per cent in December 2015, compared to 3.1 per cent recorded in the previous month, on an year-on-year basis. Annual average change in CCPI remained unchanged at 0.9 per cent recorded in November 2015. The monthly change in CCPI in December 2015 was 0.3 per cent.

The GDP grew by 4.8 per cent in real terms during the third quarter of 2015, mainly attributable to 3.4 per cent, 6.2 per cent and 6.9 per cent growth in Services activities, Industry activities and Agriculture activities, respectively, in value added terms.

Tea and rubber production during the first ten months of 2015 declined by 2.0 per cent and 12.8 per cent to 278.1 million kg and 76.1 million kg respectively. However, coconut production recorded an increase of 6.5 per cent to 2,550.7 million nuts during this period.

The FIPI increased by 9.8 per cent on a year-on-year basis in September 2015. This growth was mainly facilitated by increased production of chemicals and chemical products, wearing apparel and beverages sectors. They have recorded significant growths of 20.5, 19.9 and 14.1 per cent respectively during this period. This was mainly attributed to increased domestic and international demand.

During the week crude oil spot prices showed mixed performance. Crude oil prices rose at the beginning of the week due to falling inventories, reduced drilling and the lifting of a ban on most U.S. crude exports. However, prices then fell after an unusual build in U.S. stockpiles and signs Saudi Arabia will keep adding to the global oil glut. As per the U.S Energy Information Administration, crude inventories in the United States, the world's largest petroleum producer, rose by 2.6 million barrels last week. Further, the Saudi Arabia's energy minister has said that the country's policy of unrestrained output is a reliable policy and will not be changed. Prices reversed after U.S. energy firms cut oil rigs for a sixth week. In 2015, crude prices fell as much as 45 per cent for the year after a race to pump by Middle East crude producers and U.S. shale oil drillers created an unprecedented global glut that may take through 2016.
