Inflation as measured by the change in the NCPI (2013=100) decreased to 4.2 per cent in December 2015, compared to 4.8 per cent recorded in November 2015, on year on- year basis. The NCPI increased by 1.1 per cent from November to December 2015. This monthly increase was mainly due to the increase in prices of the items in the Food and Non Alcoholic Beverages category.

Inflation, as measured by the change in the Colombo Consumers' Price Index (CCPI) (2006/07=100), which is compiled by the Department of Census and Statistics, decreased to 0.9 per cent in January 2016 from 2.8 per cent in December 2015, on year-on-year basis. Annual average inflation declined to 0.7 per cent from 0.9 per cent recorded in December 2015. The monthly change in CCPI in January 2016 was -0.2 per cent.

The GDP grew by 4.8 per cent in real terms during the third quarter of 2015, mainly attributable to 3.4 per cent, 6.2 per cent and 6.9 per cent growth in Services activities, Industry activities and Agriculture activities, respectively, in value added terms.

Tea and rubber production during the first eleven months of 2015 declined by 3.3 per cent and 11.6 per cent to 303.3 million kg and 82.1 million kg respectively. However, coconut production recorded an increase of 6.7 per cent to 2,799.1 million nuts during the first eleven months.

The FIPI increased by 8.6 per cent on a year-on-year basis in October 2015. This growth was mainly facilitated by increased production of other non-metallic mineral products, wearing apparel and beverages sectors. They have recorded significant growths of 18.0, 16.9 and 12.3 per cent respectively during this period. This was mainly attributed to increased domestic and international demand.

During the week, crude oil spot prices showed mixed performance. At the beginning of the week prices fell on worries about China and rising oil supplies. China's purchasing managers' index dropped to a three-year low in January. Output from OPEC rose to 33.1 million barrels per day (bpd) last month as Indonesia's membership to the group was reactivated. Further, Goldman Sachs reported it was "highly unlikely" that OPEC would co-operate with Russia to cut oil output. Iran is aiming for crude exports of 2.3 million bpd in the fiscal year beginning on March 21. Meanwhile, U.S. crude stocks surged to more than half a billion barrels. Further, milder weather forecast for the last eight weeks of the U.S. November-March winter heating season has also dampened demand hopes. However, prices then rose on weaker dollar. The dollar index fell to an over seven-week low amid growing uncertainty that the Federal Reserve would be able to hike U.S. interest rates again this year. Subsequently, WTI price fell on uncertainty that cash-strapped OPEC member Venezuela's effort to lobby crude producers for joint output cuts would succeed.
