Inflation as measured by the change in the NCPI (2013=100) decreased to 4.2 per cent in December 2015, compared to 4.8 per cent recorded in November 2015, on year on- year basis. The NCPI increased by 1.1 per cent from November to December 2015. This monthly increase was mainly due to the increase in prices of the items in the Food and Non Alcoholic Beverages category.

Inflation, as measured by the change in the Colombo Consumers' Price Index (CCPI) (2006/07=100), which is compiled by the Department of Census and Statistics, decreased to 0.9 per cent in January 2016 from 2.8 per cent in December 2015, on year-on-year basis. Annual average inflation declined to 0.7 per cent from 0.9 per cent recorded in December 2015. The monthly change in CCPI in January 2016 was -0.2 per cent.

The GDP grew by 4.8 per cent in real terms during the third quarter of 2015, mainly attributable to 3.4 per cent, 6.2 per cent and 6.9 per cent growth in Services activities, Industry activities and Agriculture activities, respectively, in value added terms.

Tea and rubber production during the first eleven months of 2015 declined by 3.3 per cent and 11.6 per cent to 303.3 million kg and 82.1 million kg respectively. However, coconut production recorded an increase of 6.7 per cent to 2,799.1 million nuts during the first eleven months.

The FIPI increased by 8.6 per cent on a year-on-year basis in October 2015. This growth was mainly facilitated by increased production of other non-metallic mineral products, wearing apparel and beverages sectors. They have recorded significant growths of 18.0, 16.9 and 12.3 per cent respectively during this period. This was mainly attributed to increased domestic and international demand.

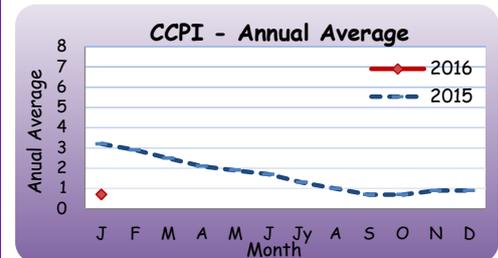

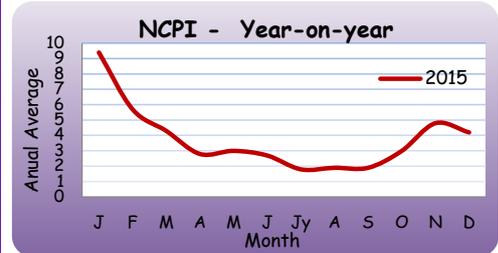

During the week crude oil spot prices followed a declining trend. At the beginning of the week prices fell on worries that U.S. crude stockpiles has reached new record highs, while a Saudi-Venezuela meeting to boost prices showed only little progress. Price declines were also supported by tumbling U.S. equity markets amid persistent fears about global economic slowdown. Prices further fell close to 12-1/2 year lows hit last month, after the U.S. Energy Information Administration (EIA) lowered its oil demand growth forecast for the next two years. Further, International Energy Agency (IEA) warned the world would remain awash with unwanted oil for most of 2016. EIA reported inventories at Cushing, Oklahoma rose to an all-time high of 65 million barrels. Further, Goldman Sachs said prices would remain low and volatile between \$20 - \$40 per barrel until the second half of the year.
