Inflation, as measured by the change in the National Consumer Price Index (NCPI) (2013=100), which is compiled by the Department of Census and Statistics, decreased to 4.5 per cent in August 2016 from 5.8 per cent in July 2016, on year-on-year basis. Both Food and Non-food categories contributed towards the year-on-year inflation in August 2016. The change in the NCPI measured on an annual average basis increased to 3.6 per cent in August 2016 from 3.4 per cent in July 2016. When the monthly change in the NCPI is considered, the NCPI decreased by 1.6 per cent to 113.3 index points in August 2016 from 115.2 index points in July 2016. This monthly decrease was mainly due to the decrease in prices of the items in the Food category. The NCPI Core inflation, which reflects the underlying inflation in the economy decreased to 6.0 per cent in August 2016 from 6.8 per cent in July 2016, on year-on-year basis. Annual average NCPI Core inflation increased marginally to 5.6 per cent in August 2016 from 5.5 per cent in July 2016.

Inflation, as measured by the change in the Colombo Consumer's Price Index (CCPI) (2006/07=100) compiled by the Department of Census and Statistics decreased to 4.0 per cent in August 2016 from 5.5 per cent in July 2016, on year-on-year basis. Annual average inflation increased to 3.0 per cent in August 2016 from 2.7 per cent in July 2016. The monthly decrease in CCPI was 2.0 per cent. Core CCPI decreased to 4.1 per cent in August 2016 from 5.8 per cent in July 2016, on year-on-year basis. Annual average core CCPI increased to 5.0 per cent in August 2016 from 4.9 per cent in July 2016.

The GDP grew by 3.9 per cent in real terms in the first half of 2016, mainly attributable to 4.9 per cent growth in Services activities and 5.2 per cent growth in Industry activities while Agriculture activities contracted by 2.5 per cent, in value added terms.

During the first seven months of 2016 production of tea declined due to unfavourable weather conditions and low demand from prime export destinations while production of rubber declined due to the slowdown of tapping activities. However, the coconut production has recorded an increase during the same period.

The FIPI increased by 1.4 per cent on a year-on-year basis in June 2016. This increase was mainly due to increased production of food products, wearing apparel, rubber and plastic products and other non-metallic mineral products sub-sectors. This was mainly attributed to increased domestic and international demand.

During the week crude oil spot prices largely followed an increasing trend. At the beginning of the week prices rose after Venezuela said that OPEC and non-OPEC countries were close to reaching an output stabilizing deal and as clashes in Libya raised concerns that efforts to restart crude exports could be disrupted. Subsequently, Brent price fell after Venezuela's oil minister said that global supplies needed to fall by 10 per cent in order to bring production down to consumption levels. However, prices again rose supported by a reported draw in U.S. crude inventories for the third consecutive week, firm import data by Japan and an oil workers' strike in Norway, which threatened to cut North Sea crude output.

Expenditure on imports declined marginally by 0.2 per cent, year-on-year, to US dollars 1,676 million in June 2016. Import expenditure on vehicles, wheat and fertilizer declined significantly during the month.
