Inflation, as measured by the change in the National Consumer Price Index (NCPI) (2013=100), which is compiled by the Department of Census and Statistics (DCS), increased to 5.0 per cent in October 2016 from 4.7 per cent in September 2016, on year-on-year basis. Both Food and Non-food categories contributed towards the year-on-year inflation in October 2016. The change in the NCPI measured on an annual average basis increased to 4.0 per cent in October 2016 from 3.8 per cent in September 2016. When the monthly change is considered, the NCPI increased from 113.5 index points in September 2016 to 114.7 index points in October 2016. This monthly increase was mainly due to the increase in prices of the items in the Food category. The NCPI Core inflation, which reflects the underlying inflation in the economy, remained unchanged at 5.7 per cent in October 2016 compared to September 2016, on both year-on-year and Annual Average basis.

Inflation, as measured by the change in the Colombo Consumers' Price Index (CCPI) (2006/07=100) based on compilation by the DCS, decreased to 3.4 per cent in November 2016 from 4.2 per cent in October 2016, on year-on-year basis. Annual average inflation remained unchanged at 3.6 per cent in November 2016. The monthly increase in CCPI was 0.6 per cent. CCPI Core inflation increased to 5.1 per cent in November 2016 from 4.2 per cent in October 2016, on year-on-year basis. Annual average core inflation increased to 5.0 per cent in November 2016 from 4.9 per cent in October 2016.

The GDP grew by 3.9 per cent in real terms in the first half of 2016, mainly attributable to 4.9 per cent growth in Services activities and 5.2 per cent growth in Industry activities while Agriculture activities contracted by 2.5 per cent, in value added terms.

During the first ten months of 2016 production of tea declined due to unfavourable weather conditions and low demand from prime export destinations while production of rubber declined due to the slowdown of tapping activities. However, the coconut production has recorded an increase during the same period.

The FIPI decreased by 0.6 per cent on a year-on-year basis in August 2016. This decrease was mainly due to decreased production of beverages, wearing apparel and chemicals and chemical products sub-sectors driven by subdued domestic and international demand.

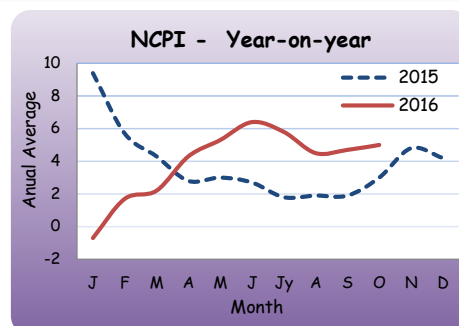

During the week crude oil prices showed mixed performance. At the beginning of the week prices rose after OPEC stated that they expect oil demand in 2017 to be as robust as this year. However, prices then fell on persistent doubts that a planned production cut would be deep enough to end a supply overhang that has pressured markets for over two years, as both OPEC and Russia have reported record production. In November, OPEC's oil output set a record high of 34.19 million barrels per day (bpd) while Russia also reported a average daily oil production of 11.21 million bpd, its highest in almost 30 years. Further, the U.S. Energy Information Administration reported stocks at Cushing, Oklahoma, increased by 3.8 million barrels, the most since 2009. However, by the end of the week WTI price rose on growing optimism that non-OPEC producers might agree to cut output at a meeting on Saturday.
