Inflation, as measured by the change in the National Consumer Price Index (NCPI) (2013=100), which is compiled by the Department of Census and Statistics, decreased to 4.1 per cent in November 2016 from 5.0 per cent in October 2016, on year-on-year basis. Both Food and Non-food categories contributed towards the year-on-year inflation in November 2016. The change in the NCPI measured on an annual average basis remained unchanged from last month at 4.0 per cent in November 2016. When the monthly change is considered, the NCPI increased from 114.7 to 116.6 index points from October to November 2016. This monthly increase was mainly due to the increase in prices of the items in the Non-food category. The NCPI Core inflation, which reflects the underlying inflation in the economy increased to 6.8 per cent in November 2016 from 5.7 per cent in October 2016. Annual average NCPI Core inflation increased to 5.8 per cent in November 2016 from 5.7 per cent in October 2016.

Inflation, as measured by the change in the Colombo Consumers' Price Index (CCPI) (2006/07=100) compiled by the Department of Census and Statistics, increased to 4.1 per cent in December 2016 from 3.4 per cent in November 2016, on year-on-year basis. Annual average inflation increased to 3.7 per cent in December 2016 from 3.6 per cent in November 2016. The monthly increase in CCPI was 1.0 per cent. CCPI Core inflation, which reflects the underlying inflation in the economy, increased to 6.3 per cent in December 2016 from 5.1 per cent in November, on year-on-year basis. Annual average core inflation increased to 5.1 per cent in December 2016 from 5.0 per cent in November 2016. CCPI Core increased by 1.1 per cent from November to December 2016.

The GDP grew by 4.0 per cent in real terms in the first nine months of 2016, mainly attributable to 4.8 per cent growth in Services activities and 5.7 per cent growth in Industry activities while Agriculture activities contracted by 2.5 per cent, in value added terms.

During the first eleven months of 2016 production of tea declined due to unfavourable weather conditions and low demand from prime export destinations while production of rubber declined due to the slowdown of tapping activities. However, the coconut production has recorded an increase during the similar period.

The FIPI decreased by 8.4 per cent on a year-on-year basis in September 2016. This decrease was mainly due to decreased production of food, beverages, wearing apparel and chemicals and chemical products sub-sectors. This was mainly attributed to decreased domestic and international demand.

During the week crude oil prices largely showed mixed performance. At the beginning of the week prices fell on concerns that record Iraqi crude exports and rising U.S. output would undermine OPEC's effort to curb global oversupply. Oil exports from the southern ports of Iraq, OPEC's second-largest producer, reached a record high of 3.51 million barrels per day (bpd) in December while Iraq's State Oil Marketing Company had given three buyers in Asia and Europe full supply allocations for February. Prices further declined to the lowest in nearly a month, on strong U.S. dollar. However, towards the end of the week prices rose on news that key crude exporters including Russia and Saudi Arabia were cutting production to reduce a global crude glut, and forecasts of record demand in China.

Lower expenditure incurred on importation of personal motor vehicles and fuel contributed largely to this decline.
